Surfaces

from solid wood veneer and plastic

Wooden surfaces are either directly plastic-coated or covered with an HPL laminated plastic, depending on their application. Differences in colour underline the characteristics of solid wood surfaces and cannot be avoided. Solid wood changes its colours under the influence of light. Table and work surfaces with solid wood veneer have only limited abrasion resistance. We recommend our highly resistant plastic decors for these types of surfaces. We use environmental-friendly lacquers for our solid wood surfaces.

DESIGN OPTIONS

Other surfaces and veneers upon request.

Colours for metal coatings

The coloration of the metal parts is made by a highly abrasion-proof and environmental-friendly baking powder-coating.
With reservation for colour deviations to original RAL register.
Antibacterial equipping of surfaces upon request.

RAL 5003 Sapphire blue
Fine structure (1)
RAL 9011 Graphite black
