Affectionately known as "The Lemon Squeezer".

This very expressive table system is based upon elements of quarter circles which may be combined to form an appealing table system (see combination examples). Rounded side parts are used as blinds and determine the formal attraction of this furniture.

All table tops have a cable conduct at the back and an additional cable cover is available to hide the vertical cable conduct.

Surfaces

from solid wood veneer and plastic

Wooden surfaces are either directly plastic-coated or covered with an HPL laminated plastic, depending on their application. Differences in colour underline the characteristics of solid wood surfaces and cannot be avoided. Solid wood changes its colours under the influence of light. Table and work surfaces with solid wood veneer have only limited abrasion resistance. We recommend our highly resistant plastic decors for these types of surfaces. We use environmental-friendly lacquers for our solid wood surfaces.

DESIGN OPTIONS

Other surfaces and veneers upon request.
