IRWIN SEATING COMPANY

The Irwin Difference

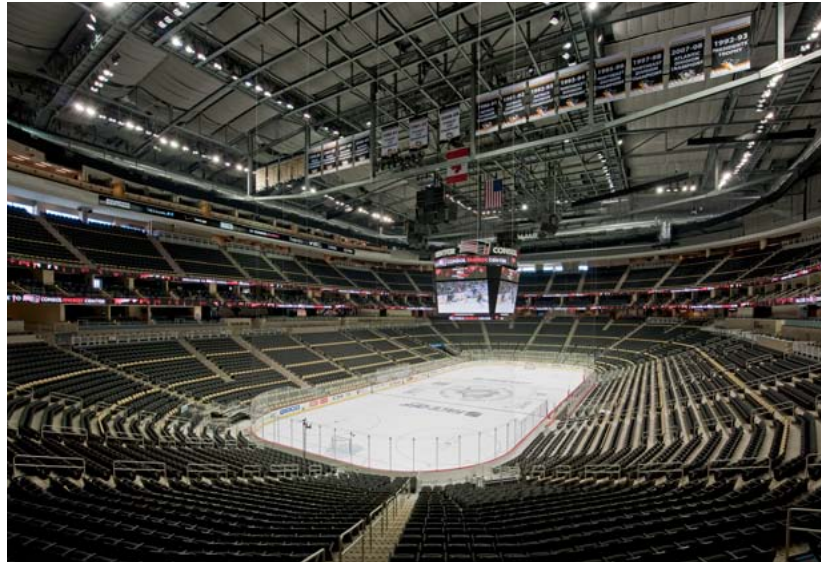

People, Products & Services

For over 100 years, Irwin Seating Company's sole focus has been on meeting our customers' needs for public seating solutions. We achieve this through innovative design, by manufacturing the industry's most durable products and by providing unmatched service before, during, and after the installation of a project. Everyone at Irwin Seating Company is focused on quality, continuous improvement and customer satisfaction. This commitment is what the Irwin Difference is all about and why we are the world's leading supplier of fixed audience seating.

Yankee Stadium - New York, New York

We start by asking the right questions and listening to our customers' needs to understand their requirements for a successful project. We provide design consultation for seating layout, chair customization and offer sight line studies and ADA recommendations to ensure an unencumbered experience by all.

Consol Energy Center - Pittsburgh, Pennsylvania

We recognize the importance of stewardship and understand seating must be reliable, easy to maintain, stylish, and comfortable for years to come. This is accomplished through the use of superior materials, including impact resistant plastics, seat lift mechanisms that are virtually maintenance free and fabrics that pass the industry's most strenuous tests.

St. Louis University, Chaifetz Arena - St. Louis, Missouri

Our expertise will help to take care of the physical environment so the audience can focus on the event. We coordinate installation with the construction contractor using factory certified installers and offer full chair restoration services to return old, worn chairs to their original beauty. Talk with your Irwin Seating Company representative today and experience the Irwin Difference.

Right: Amway Center - Orlando, Florida
