All prices printed herein supersede all previous prices and are subject to change without notice. SALES POLICY

GLOSS-TEK COLORS AND WOOD-TEK

Aurora Storage Products are coated in Gloss-Tek™ an eco-friendly, non-emissive textured powder coat. There are 31 standard colors; custom colors are available and are subject to longer lead time and an additional charge. A metal color chip of the special color is necessary for paint matching.

NOTE: Even with metal sample matching, shading and gloss can vary. Be careful when matching new equipment to product of the same color that has been in the field for several years. Products closely exposed to fluorescent lighting or sunlight can fade. If a perfect match is required, forward a sample to Customer Service.

WOOD-TEK PRODUCT

Orders of non-standard Wood-Tek stain and wood species require a stain match and approval. Special caution must be given to matching new product to product which has been in the field for several years. Product exposed to sunlight or fluorescent lighting can fade or darken. Aurora will not guarantee or be responsible for the character of wood including natural variations in color, grain, and texture, and may differ slightly from sample.

If the goods are damaged by the carrier while in transit, the buyer has the sole obligation of seeking recourse from the carrier. If the goods are lost by the carrier, buyer may at their option either:

- 1) File a freight claim with carrier.
- 2) Place a new purchase order with Aurora.

ORDER CHANGES

DAMAGE IN TRANSIT

CAUTION: When you give the delivering carrier a clear receipt for a shipment in which there is damaged merchandise or a shortage, the carrier and Aurora are relieved of further responsibility.

All packaging is in accordance with carrier requirements.

For your protection, before accepting any shipment, examine it carefully. If there is evidence of damage or a shortage, insist that the delivering carrier make suitable notation to that effect on the freight bill before you sign it.

If, after receipt of shipment, concealed damage is discovered, immediately **notify the delivering carrier**, requesting immediate inspection.

The inspection report should be used to support your claim against the carrier. *NOTE:* Carriers require notification of concealed damage within 24 hours of delivery. Aurora also needs to be notified of any concealed damage claims.

Any claim for damage or shortage on non-PRIME carrier shipments must be noted by you with the non-PRIME delivering carrier. Aurora will not accept the return of merchandise damaged in transit. TIMES-2 DIMENSIONS

VERTICAL PLANNING INSTRUCTIONS

By knowing how many louvers are necessary to accommodate certain filing applications, the inside of Times-2 becomes easy to plan. The two following charts show available size openings and the number of louvers in each height unit.

TABLE #1

Louvers inside the Times-2 are spaced every 1¾". The shelf takes up some of that space, so the "clear" openings as marked below are somewhat smaller. For speed and convenience, a Vertical Planning Sheet is designed to lay out both stock and custom arrangements within your Times-2.

The number of louvers and useable space needed for each size opening are:

Louver	Useable Space	Application
1 Louver =	1¾"	Reference Shelf
2 Louvers =	3"	Flat forms (on shelves)
3 Louvers =	4¾"	Microfilm/fiche/trays
4 Louvers =	6½"	Accessory Drawer for CD/DVD & Small Media
5 Louvers =	8¾"	Reduced documents, e.g. Parking Tickets, Voter Registration, Fingerprint Cards
6 Louvers =	10"	Standard file folder/hanging folders/security drawer/file drawer
7 Louvers =	11¾"	3-ring binders/expanded hanging folders
8 Louvers =	13½"	Printouts/oblique folders/computer printouts
9 Louvers =	15¼"	Ledger binders

Rollout Drawers with Hanging Folder Frames:

This product usually requires 6 louvers clearance but the top most drawer always requires 7 louvers to clear tabs on top tabbed folders.

TABLE #2

Each height Times-2 has a defined number of useable louvers:

- 2-Tier (letter or legal) 13 louvers
- 3-Tier (letter or legal) 20 louvers
- 4-Tier (letter or legal) 25 louvers
- 5-Tier (letter or legal) 31 louvers
- 6-Tier (letter or legal) 37 louvers
- 7-Tier (letter or legal) 43 louvers
- 8-Tier (letter or legal) 49 louvers

Times-2 Plus Sizes (Letter or Legal)	Total Louvers	Total Height
5-Tier Adds 3 Extra Louvers	34	66½"
6-Tier Adds 3 Extra Louvers	40	76½"
7-Tier Adds 4 Extra Louvers	47	89"

Once you know both the number of louvers required for a specific size opening and the number of louvers available in the unit you've selected, then the math is simple.

Using Table #1 and Table #2 above, you can mix and match easily! **It all adds up.**

**Vertical Planning sheets are available to help you design the interior of the Times-2 cabinets. See Page 33.*

Standard Letter and Legal

Preconfigured units:

- Have 6 louvers between each shelf
- Have a 10" clearance
- Have 10½" centers
- Will lose 1 shelf if using top tab folders
- Are designed for end tab folders
- Will have 11" clearance for top shelf

WEIGHT CONSIDERATIONS

Capacity, workflow, square footage and equipment selection are four important elements for space planning. The fifth element leading to a successful design is confirmation of your building's weight load.

To ensure your project is a success, please confirm that the building floor is capable of supporting a fully loaded system that consists of the estimated Aurora system and media weight. We can help by providing your team with equipment and media weight estimates. We can also help with providing alternate equipment configurations and floor load reinforcement solutions if needed.

Please note that the estimated weight for letter and legal filing are based on an average of the ranges published by BIFMA* (Business and Institutional Furniture Manufacturers Association). Both filing estimates from BIFMA and other media estimates provide here by Aurora can vary based on the specific type of materials stored. We provide these estimates only as a guide.

The charts below show the capacity of each model Times-2 and the comparison to four drawer lateral and vertical files. The chart doesn't tell the full story. A conventional drawer file will store a maximum of 35 LFI per square foot of floor space. Times-2 will house up to 72 LFI per square foot. The capacity gain, when combined with the floor space savings and the greater access improvements, means productivity increases as well as cost savings.
