April 12, 1932

Gentlemen:

Due to the fact that the \$50 non-resident tuition promised by the state will be cut to \$30 the Wright City High School suffers a shortage of more than \$1,000 in expected revenue. If our teachers are to be paid we must have help from the districts whose students are enrolled. We believe that you, all members of the board, and all citizens of your district will approve payment of tuition from your district funds. Otherwise the plain facts are that the expense of education for these students for this term must be borne by someone else.

Had the money promised been forthcoming no such plea would be made. We want only funds for actual expense of running the school. If a deficiency appropriation is made by the legislature the money you pay to help us in this emergency will be returned to you--every dollar of it. We believe this will be done. In fact, a member of our Board has been informed by State Superintendent Lee that he has every hope a deficiency bill will be passed and the money made available in March, 1933. But that will not help now.

Our school board can only issue warrants or borrow money up to expected revenue. Our funds are exhausted, we are issuing warrants against the expected revenue from the state. But we must have help from your district. Please confer with your board and let us hear from you at your earliest convenience. We know that no citizen of your district desires to see the teachers go without pay for work they have honestly performed. We have gone the limit but our 90 cent tax levy is not enough to care for this additional load. Again, We Must Have Help.

For your convenience we are enclosing a stamped return envelope. Both the state and county superintendents have assured us that payment by your district is legal and just. We hope to hear from you soon. We recommend that you call a special meeting of your Board. We will be glad to send a representative from our Board if desired.

Make warrant payable to Wright City, District.

Sincerely yours,

Wright City Board of Education
