BIOGRAPHY

Welcome to 8th grade engineering at RSA! This will be my eighth year here at RSA and my third teaching engineering. I am a South Texas ISD Science Academy graduate, and an alumnus of St. Edward's University in Austin, Tx with a Bachelors of Arts in Criminology. I currently live in Harlingen with my wife, Elizabeth (an art teacher at Science Academy), our daughter Avery, son Owen, two dogs Daphne and Ollie, and cat Mochi. We love spending time doing activities together and going on road trips. In my spare time, I enjoy tinkering with electronics, home projects, and the occasional video game.

I'm excited for this opportunity to be part of this great year with you and look forward to all the exciting projects and opportunities we have ahead.
