

BLOCKS!

PARENT

MOBILE APP

Account Creation

We have sent invitation emails to the email address that is listed in Skyward. Look for an email from Blocks! with the subject line "Sign Up To Parent Dashboard". You will click the button that says "Sign Up".

Fill in the information needed; your email address, create a password, retype in your password, enter in your first and last name, student SCHOOL email and then click create account.

Create a Blocks! account

E-mail
stutechhelp@pike.k12.in.us

Password ***** Repeat password *****

First name Suzy Last name Parent

Phone or cell number (optional)

Student E-mail (must be a valid school-owned email)
50060292@students.pike.k12.in.us

Create account

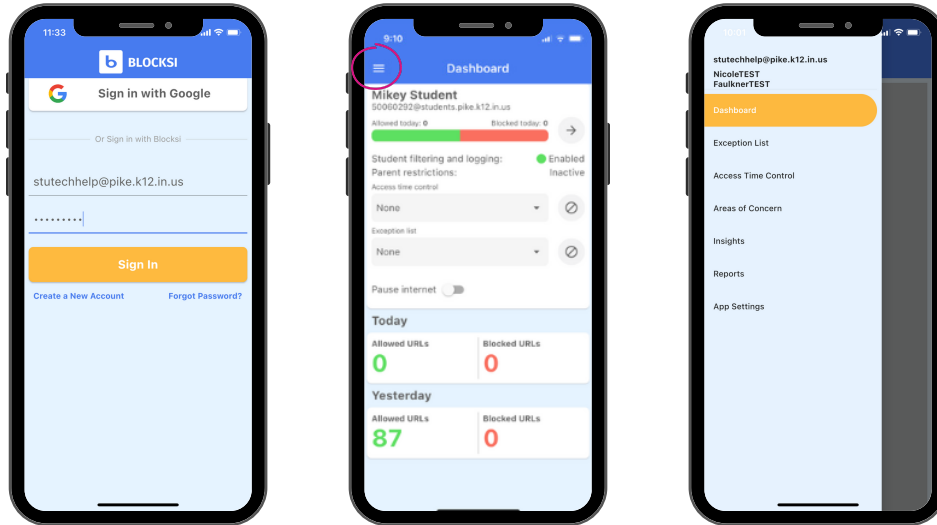

NOTE: The email you provide **MUST** match what is on file in Skyward. Student emails **MUST** be their school email, no personal emails. EX: 500#####@students.pike.k12.in.us

You will then need to verify your email. Check your email for another message from Blocks!. Click the orange button to verify your account. You will be redirected back to the Blocks! website.

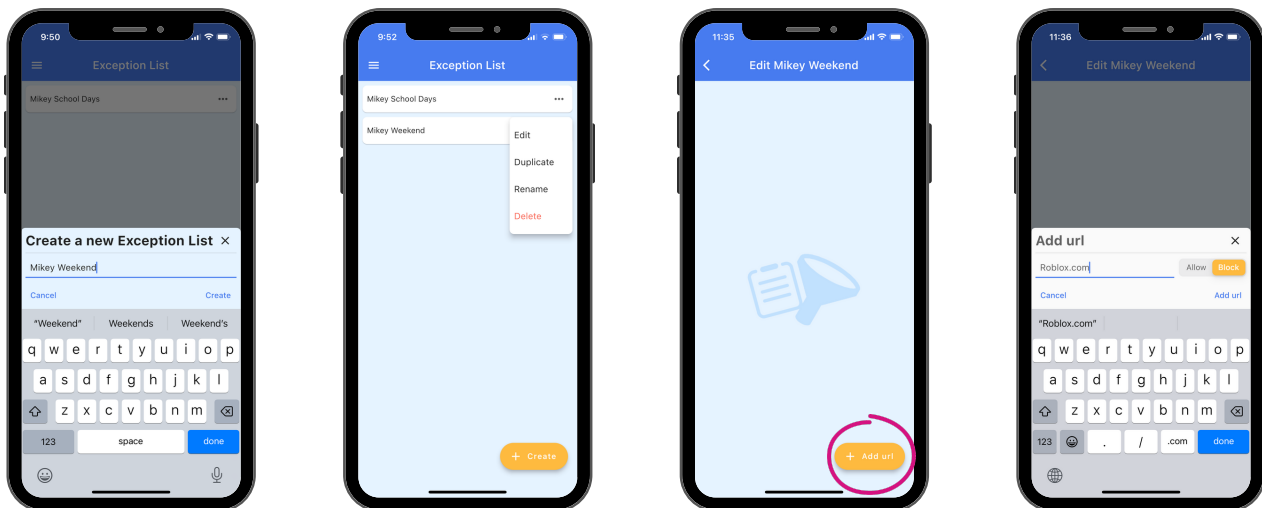

Click the button to access the Parent Dashboard or click the Blocks! logo in the top left corner and then select "Sign in as Parent or Guardian" from the drop-down box in the top right corner.

Sign in, Home Screen, Controls

Download and open the Blocks Parent App. Sign in with the email address and password you used to complete registration. You will see the Dashboard and your student's recent stats listed below. Use the 3 lines in the top left to access the menu.

Mobile Exception List

Similarly, you can click on the "Exception list" from the menu, click the "Create" button in the bottom corner to create a new block list for your student. You can click the three dots to edit the list. Click "Add URL" in the bottom corner to add a URL or website that you want to block. Click "Done" to save this website.

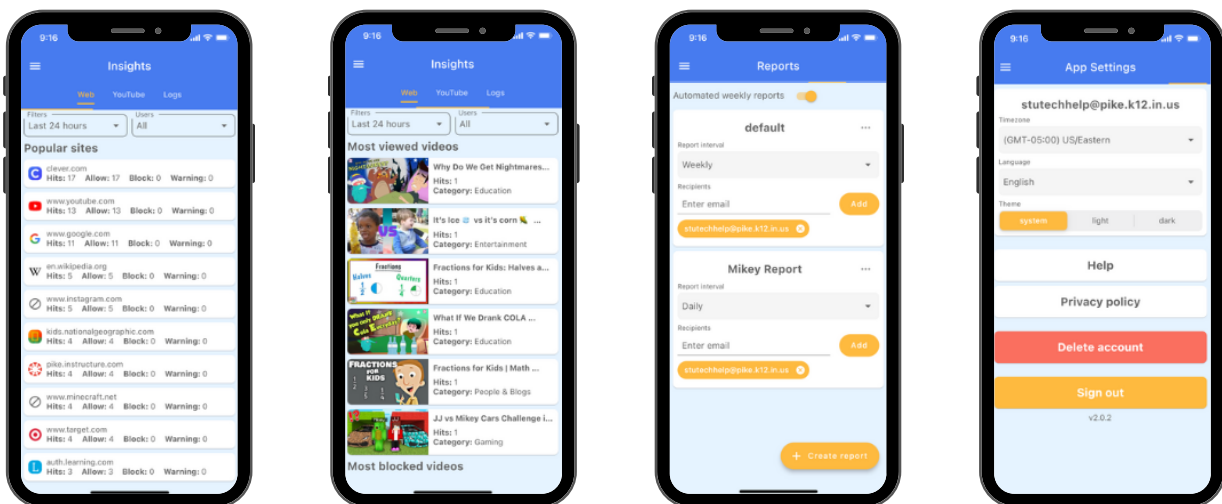

Mobile Access Time Control

Click the three lines in the top left to open the menu and select Access Time Control. Click the **+Create** button and add your student's name to set a new access time control. Use the dial to block the times that you do not want your student to have access to their Chromebook. Please note that if you want the time to span from 9pm on Monday to 7am on Tuesday, you will have to set 9pm to midnight on Monday and save, and then set midnight to 7am on Tuesday. You can use the stacked rectangle icon to copy a time control to another day.

Make sure you return to the Dashboard and apply the controls. Select "None" and then choose the list you want apply. You can also pause the internet for the Chromebook. Students will have access to internet while at school and then it will be paused again once they are home.

Insights, Reports, Settings

Back in the menu you will see Insights where you can view what your student has accessed on the web or on YouTube. You can also view and create new reports. App settings is where you can view the help guide, change your time zone and language and sign out.
