

Pathways in Technology Early College High School

What is P-TECH?

Pathways in Technology Early College High Schools (P-TECH) provide students with a seamless path from high school, to post-secondary education, to employment. LaVega ISD's P-TECH Academy offers students the opportunity to earn a high school diploma and work credentials, including certifications and licenses, and education credentials, which include educational certificates, professional certificates, diplomas, and degrees. They also engage in work-based education at every grade level, such as internships, apprenticeships, or other forms of job training programs.

Opportunities

- Attend Summer Bridge Program and tour local industry facilities.
