

		<b>Teacher Prep Period/Student Break</b>	<b>12:10</b>	
		<b>Office Hours/Asynchronous Student Work</b>	<b>12:50 p.m. - 2:33 p.m.</b>	
		<b>End of Student/Teacher Day</b>	<b>2:33</b>	
		<b>Periods 1-9 Synchronous with Instruction provided through the Canvas Platform</b>		
		<b>12:50 Synchronous Student Work through Canvas Platform with Teacher Availability</b>		

Students in grades 6th - 12th will follow the school day bell schedule shown above. Teachers will use district-provided devices (laptops or Chromebooks with built-in cameras and microphones). If possible teachers will be permitted to work from their building classrooms, unless there is an emergency preventing the use of the building, to connect with their assigned students in grades 6th-12th, via Google Meet and teacher-created courses using the Canvas platform. Students login to their Google Meet during their assigned time for each period class following the required lessons posted within Canvas by each teacher. Assignments and asynchronous work may also be available via Canvas. In addition, substitute teachers will be provided with additional training to work online when needed. Each student in grades 6th-12th grade has an assigned, take-home model, Chromebook. Students receiving services and pull-out instruction such as Special Education, Speech, Gifted Instruction, and/or Physical Therapy and Occupational Therapy will receive services through synchronous modalities using the same platforms and video-conferencing tools. Students without wi-fi access or with limited bandwidth will be provided with hotspot devices with unlimited or limited data. Some students may qualify for internet services through the FCCC Emergency Funds. The COVID-19 Pandemic provided an opportunity to test bandwidth and wifi in all geographic areas of the district and to trouble-shoot areas with challenging signal/reception. A classroom cyberspace, the district's cyber program area, will also be available for students without home wi-fi access. This space will have an external entrance/exit in proximity to the area and can accept students as deemed necessary and appropriate. The space will include physical devices, school-based internet services, and at least one faculty member for technical or academic assistance. In addition, wifi is available within close proximity to each building for extreme cases.

RVHS students attending the STEAM Academy will participate in online and asynchronous instruction during periods 1-4 (following their regular schedule).
