

# ZOOM Instructions

Zoom is a virtual conferencing program that will allow us to stay connected with our students. We'll be able to see and talk to each other.

The teacher will set up the meeting and send you the Meeting ID and password (if applicable.) You can use Zoom with a computer, laptop, tablet, or phone. Follow these instructions if you have not used it before:

Computer/Laptop	Tablet/Phone
<p data-bbox="94 548 781 793">Go to <a href="https://www.zoom.us">www.zoom.us</a> and click "Join a Meeting." Then type in the meeting ID and password. You may be prompted to allow audio and video (this lets us hear and see your child through the webcam.) If you don't see anything at first, give it a few minutes because you may be in the virtual waiting room until the meeting officially begins.</p>  <p>The screenshot shows the Zoom website homepage. The 'JOIN A MEETING' link in the top right navigation bar is highlighted with a black arrow. Below the navigation bar, there is a green banner with the text 'Zoom for video, conference rooms &amp; phone.'</p>	<p data-bbox="824 548 1511 779">You'll need to download the app. Then, click on "Join" and type in the meeting ID and password. Make sure the audio and video are connected. If you don't see anything at first, give it a few minutes because you may be in the virtual waiting room until the meeting officially begins.</p>  <p>The top screenshot shows the Zoom app page on an app store. The 'ZOOM Cloud Meetings' app is listed with a rating of 4.5 stars and 90K reviews. Below the app card are three promotional images. The bottom screenshot shows the 'Join a Meeting' screen in the Zoom app. A black arrow points to the 'Don't Connect To Audio' toggle switch, which is currently turned off. Below this are 'Turn Off My Video' and a numeric keypad.</p> <p data-bbox="824 1104 1484 1136">Leave these off so we can see and hear your child.</p>

1. If you are having an issue and you can't hear the meeting even after allowing your phone/tablet's audio and camera to join, your phone may have another app that's running in the background using the audio. Try closing out all opened programs. If that doesn't work, try restarting the app or phone to see if that fixes the problem.
2. If on a laptop and you don't want the pictures to keep shuffling between people, you can change the setting to see everyone (go to Gallery View in the upper right corner.) This will make it look like the Brady Bunch. If you want to focus on the presenter (go to Speaker View in the upper right corner.) You can focus on a specific person by clicking the picture of the person. You should see 3 dots in the corner. Click those dots and select "pin video."
