Welcome to Endeavor

Endeavor is a learning support program designed to bring Franklin's commitment to personalized learning to life for students with specific academic needs, promoting their independence and success.

It combines the convenience and reliability of on-site support with the efficiency of a specialist teacher well-versed in the Franklin culture, curriculum, and program expectations.

Endeavor has its roots firmly grounded in the philosophical and practical principles of Oxford University's tutorial mentorship model. We utilize contemporary research in special education pedagogy combined with the creativity of design thinking to provide students with a strength-based and innovative academic and executive functioning tutoring program.

Additionally, Endeavor is built upon our affiliate school's 45+ years of sustained success in the field of learning support.

Our expert specialist teachers take a holistic approach to help students with learning differences — providing them with the strategies, learning support structures, and skill development that optimize their academic abilities and empower them to succeed.

Our Holistic and Collaborative Approach

- Each Endeavor student will have an academic and learning support profile to ensure that everyone – students, parents, and faculty – is aware of which support structures and specific learning adjustments aligned to the student’s needs are in place.
- Endeavor specialists are an integral part of our curriculum and assessment design process. This ensures that all planning and adjustments occur before a student is introduced to the content or assessment.
- Specialists collaborate daily with classroom teachers, co-curricular facilitators, and athletic

coaches to collect live, and in many cases time-sensitive, data about students to design the most effective strategies for enhancing their progress in all facets of school life.

- Endeavor specialists are educators trained to work with all learners. They help students identify and understand how they learn best – and how to use that knowledge to enjoy academic and intellectual growth. Endeavor students build skills and refine their approaches to learning while engaging with course material that they need to master. They also learn how to articulate their needs and become self-advocates.

We Utilize Data-driven Progress Reporting

- Franklin is dedicated to providing meaningful and digestible data when monitoring and communicating student progress with families on a regular basis – ensuring a harmonious and strategic approach to setting measurable goals.
- Franklin's focus on skill development in the areas of problem-solving, self-management, collaboration, and the effective utilization of technology are also key components of Endeavor student reporting.

We Provide Personalized, Comprehensive Support and Skill Development

- Endeavor students are matched with a specialist on a 1:3 teacher-student ratio. Specialists are selected with careful thought toward skill and personal development, and the pairing remains in place for the entire year.
- Our core curriculum was designed with learning adjustments embedded into every academic unit. This ensures that all students' teaching and learning needs have been well-considered, planned for, and implemented using best practices.

HOMEWORK

- Annotations are due on Mondays and Thursdays before class
- Submit two annotated pages on Canvas but all pages for that night should be annotated
- Homework is worth 10% of your T1 grade but it also allows us to have meaningful discussions and analyze the text

About Our Team of Endeavor Experts

- Every student in the program will have a specialist, as well as the support of the entire Endeavor team behind them.
- All Endeavor specialists receive professional development and participate regularly in global conferences and workshops highlighting effective research-based teaching strategies and best practices in the field.

Endeavor Scheduling

- Endeavor instruction is built into a student's schedule. Learning support is provided throughout the school day and will include two to three meetings per week.
- Endeavor sessions are scheduled during seminar periods, ensuring students do not miss out on curriculum periods and can return to classes with the rest of their cohort.

As Endeavor provides students with additional academic learning support, it is a fee-based program. To learn more, please email admissions@franklinjc.org or call us at 201-234-4781.
