

Research Studies

The Notus School District No. 135 recognizes the value of participation in educational research. Studies using observation, surveys, and experimentation can aid in the improvement of the instructional program in the school system as well as growth in the profession for individual teachers and researchers.

Simultaneously, the District recognizes that the amount of time available for student learning is limited and must be handled carefully. It is, therefore, important that only those research studies that are of the greatest value to the District should be allowed to be conducted in the school system.

All research proposals from outside sources will be submitted in prospective form, with the instruments attached, to the Superintendent at least three (3) weeks prior to the date on which the research study is to be conducted. The prospectus will include the researcher's name, address and phone number, as well as a description of the purpose of the study, the procedures to be used, the treatment of the data and the distribution of the study. The Superintendent will approve or disapprove all research studies. Approval will be based on educational significance, project design, and disruption to the regular school process. The primary criteria in approving research studies will be the value to the District. A final copy of the study will be provided free of charge to the District.

Research studies making use of any survey, test, questionnaire, enumeration, or measuring device shall comply with all applicable requirements noted in Policy 2140.
