KEEP YOUR KIDS SAFE Online

Internet Safety – Awareness Is the First Step

Training Objectives

Participants will receive.

- Understanding the variety of ways and ease of children accessing the internet and social media
- Learn strategies to teach children/teen about personal and family privacy.
- Learn ways to identify signs that a child/teen has fallen for a scam and may be afraid to tell parents
- Learn how to set up home computers with parental controls so information is not private or hidden from parental view.

Trainer

Tyffany Wanberg

THIS TRAINING IS FOR CAREGIVERS AND SERVICE PROVIDERS WORKING WITH YOUTH AND FAMILIES

This training will focus on online safety, which is also referred to as internet safety, e-safety, and cyber safety. Participants will learn how to stay safe online. This training encompasses all technological devices that have access to the internet such as PCs, laptops, smartphones, and tablets. The presenter will discuss how operating on an online space is something most of us do unconsciously. It is important that we stop to consider the potential dangers that exist on the web, especially for our children.

Being safe online means individuals are protecting themselves and others from online harms. There are risks that may jeopardize their personal information, lead to unsafe communication, or even affect their mental health and well-being.
