Philosophy

Extra-curricular programs will prepare students for success by encouraging involvement, development of character and positive individual traits, and fulfillment of competitive desires. Students will learn the value of practice, fair play, conditioning, self-discipline, adherence to rules and policies, willingness to work, ability to persist even when losing, and an ability to analyze why they lost and how to compensate for it. They will learn to be humble in victory and to learn from defeat. The student will gain an appreciation for teamwork and ethical conduct while fostering a sense of belonging to the school and community. In the effort to offer a cohesive and coordinated educational program, the district insists upon ethical behavior and good citizenship of its students not only in extra-curriculars, but also in school, in the classroom, in the home, and within the community. As the needs of the student body change, the extra-curricular programs will be dynamic in their focus and consideration of new opportunities for student participation. The competition within each program provides a setting for Phoenix High School students, staff and community members to demonstrate good sportsmanship and respect for others, both in victory and defeat. Our families, school and community should be able to take pride in the participants, coaches, advisors and themselves who represent Phoenix High School.

Extra-curricular Program Goals in General

1. The extra-curricular program should realize the value of participation without overemphasizing the importance of winning or excelling. This will be particularly emphasized at the sub-varsity level(s).
2. The extra-curricular program should develop and improve positive citizenship traits among the program's participants.
3. The extra-curricular program should emphasize the total educational curriculum to participants.
4. The extra-curricular program should constantly strive for the development of well-rounded individuals, capable of taking their place in modern society.
5. The extra-curricular program should provide genuine opportunities for students to develop positive habits and attitudes and social skills.

6. The extra-curricular program should provide a superior program of student activities that includes appropriate activities for every student.

TEAM SELECTION

Philosophy

In accordance with our philosophy of athletics and our desire to see as many students as possible participate in the athletic program while at Phoenix High School, we encourage coaches to keep as many students as they can without unbalancing the integrity of their sport. Time, space, facilities, equipment, personal preference, and other factors will place limitations on the most effective squad size for any particular sport.

Cutting Policies

1) Responsibility

- a) Choosing the members of each team is the sole responsibility of the coaches/advisors.
- b) Non-varsity coaches shall take into consideration the policies established by the head coach in that particular program when selecting final team rosters.
- c) Prior to team selection, the coach/advisor shall provide the following information to all candidates for the team:
 - (1) Extent of tryout period
 - (2) Criteria used to select the team
 - (3) Number to be selected
 - (4) Practice commitment if they make the team
 - (5) Game commitments

2) Procedure

When a team selection becomes a necessity, the process will include **five (5)** important elements.

- 1) Each candidate shall have competed in a minimum of **three (3)** practice sessions
- 2) Cut lists are not to be posted.
- 3) Coaches will discuss alternative possibilities for participation in the sport, or other areas of the activities program.
- 4) If a coach anticipates a cut will be made, he/she must discuss the situation with the Athletic Director in advance of any announcement being made to students or parents.
- 5) Coaches must provide documentation as to why the player did not make the team. The documentation needs to contain some objective measures used in the process.

Program Level Goals

Varsity Athletics

One of the main goals of varsity athletics is to put our most committed, responsible and talented athletes in competition to win the contest. Starting positions and playing time are not guaranteed to seniors making a team or anyone else. Student-athletes at any grade level possessing the necessary skills and commitment have the same opportunity to make any level of team. Playing time and starting positions will be determined by an evaluation used by the head coach. The criteria for determining playing time and starting positions will be made clear at the beginning of the season. When asked, coaches will communicate with student athletes on an individual bases about what the player needs to do to receive more competition time.

Junior Varsity Athletics

At the junior varsity level players will be developing skills and experiences that will facilitate them in being a successful varsity player when the time arrives. The focus at this level is being competitive while providing all deserving team members a chance to participate in competitions. Junior varsity coaches will also utilize a system to determine starting positions as well as amount of time played in the competitive competition. The focus at this level is less on winning and more on athlete development. Scheme, fundamentals, and terminology used will be established by the head varsity coach. The junior varsity and varsity coach must work together to ensure athletes will be ready for the higher competition at the varsity level. Ultimately the junior varsity program is an extension of the varsity program.

Activities

Similar to athletics, success in activities requires commitment and resilience. Students are expected to participate in practices/activities leading up to competitions and respect the role of their advisor and teammates.
