INSTRUCTION

School-Based Coordinated Program

The Governing Board perceives that resources acquired to assist students in one program often can benefit other students without in any way depriving the originally targeted group. The board encourages school-based coordinated programs as a means for achieving flexibility and coordination in the use of the categorical funds received by each school.

The Superintendent or designee shall give all principals information about the School-Based Program Coordination Act. This information shall be passed on to staff and parents/guardians. A School Site Council shall be established at each school to consider whether or not it wishes the school to participate in the school-based coordination program. All interested persons shall have an opportunity to meet in public and establish the Site Council.

Any Site Council wishing its school to participate in the school-based coordination program shall identify funding sources to be coordinated and shall develop a school plan which ensures that all students acquire the knowledge, understanding and skills of the District's core curriculum. The school plan shall be approved by the Governing Board and kept at the school site.

Each school plan shall address the needs of all the school's special student populations and shall provide for ongoing evaluation of the school's educational program. The plan shall describe proposed expenditures of the funds that are being coordinated. Proposed expenditures of funds shall include salaries and staff benefits for persons providing direct services to students, e.g. library aide, one-to-one tutor, classroom aide, homework center aide, etc.

The Site Council shall annually review the school plan, revise it as needed, and establish a new budget. The Board shall annually review and approve or disapprove all site Councils' plans.

Funds coordinated by this program shall be used to supplement, not supplant, existing state and local appropriations.
