

**POLICY - PROMOTING FOREIGN EXCHANGE OPPORTUNITIES**

**3142.2**

The District recognizes the benefits derived from participation by District students in student exchange programs. Some programs are year-long, some for one semester only and some for a summer. Such programs promote international understanding and have other benefits which accrue to the student and to the school population as a whole if the student returns to complete a program of study in the District. The Superintendent or the Superintendent's designee will establish procedures to provide information about exchange programs to interested students and to advise them if they want to earn academic credit for their participation in the program.
