

<b>Intranasal Diazepam/Midazolam Return Demonstration</b>		
<b>Skill</b>	<b>Initials</b>	<b>Date</b>
Call 911 at onset of seizure		
Identify necessary supplies to prepare and administer intranasal midazolam/versed/diazepam. Medication dose matches order.		
Verbalize administration technique (administer 1/2 dose into each nostril)		
Turn student on side to reduce risk of aspiration.		
Verbalize side effects (drowsiness, sedation, nausea, vomiting, agitation, hallucinations, rash, difficulty breathing, and/or slow respirations)		
Verbalize emergency situations. *Immediately with onset of seizure. *For difficulty breathing and/or slow respirations less than 9 breaths per minute.		
I, _____, understand the process to prepare and administer intranasal diazepam/midazolam/versed. I am aware of the side effects and have knowledge of what to do in an emergency situation.
