Southeast Service Cooperative

Facilities Management

EH&S Basic Services include consulting services associated with general regulatory compliance in each identified regulatory area. Services are pre-planned each spring by IEA staff and client staff together. Services involve periodic site visits and off-site work and might include annual training, review of program records, chemical inventories, fiscal planning, committee meetings, management plan modification recommendations, and program implementation recommendations, including budget planning. Lab and technical hazard testing, such as asbestos, mold, indoor air quality, lead, etc., is provided at an additional cost at the client's request. Basic services may address the following regulatory areas, as directed by members:

Accident & Injury Reduction Program (AWAIR)
Asbestos
Blood Borne Pathogen Standards/Exposure Control Plan
Chemical Hygiene (Lab Safety)
Community Right-to-Know
