Program Purpose

The Early Childhood Inclusive Practices Certificate was designed and built by experts in the field to prepare early learning and care professionals working in centers, family child care, and special education programs to address the complexities of caring for and educating young children with a variety of physical, learning, and social needs including those children with identified disabilities.

Participants will increase their awareness and understanding of individualized learning, simple adaptations, behavioral strategies, and methods of communication. In addition, participants will learn about available resources, strategies, and supports that will enhance the quality care and responsiveness to all children in their setting.

Program Participants

- Providers/Teachers of children Birth to 5
- Special Education Staff
- Family Child Care Providers
- Coaches
- Administrators

Optional Professional and Continuing Education (PCE) units available through USD.

The certificate in Early Childhood Inclusive Practices does not lead to a teacher license or endorsement.
