

Carpentry

Program of Study: A2A

Architecture and Construction Career Cluster

Level 1 Course

Principles of Construction

Level 2 Course

Construction Technology I

Level 3 Course

Construction Technology II

Level 4 Course

Practicum of Entrepreneurship

The Carpentry Program of Study explores the occupations and educational opportunities related to construction, installation, and repair. Repairs include fixtures made of wood, such as concrete forms including frameworks, partitions, joists, studding, rafters, and stairways. This program of study may also include exploration into installing, moving, and dismantling of machinery and heavy equipment according to layout plans, blueprints, or other drawings.

Industry Based Certifications:

- NCCER Core
- NCCER Carpentry Fundamentals, Level 1
- NCCER Carpentry Fundamentals, Level 2
- S/P2 Safety
