

STEM is our mission!

As a K-8, tuition free public STEM charter school, we believe that STEM pervades every part of our lives. By exposing students to STEM and giving them opportunities to explore STEM-related concepts, they will develop a passion for it and hopefully pursue a job in a STEM field.

Just think about it, Science is everywhere in the world around us. Therefore, we push for our students to be constantly involved in understanding all aspects of science. Technology is continuously expanding into every aspect of our lives. At BPLA, we focus on 21st Century skills and take an active approach to integrating technology throughout our environment. Engineering is the basic design of roads and bridges, but also tackles the challenges of changing global weather and environmentally friendly changes to our home. Our teachers push multiple engineering concepts and explore hands-on learning projects that push all engineering pathways. Mathematics is in every occupation, every activity we do in our lives. As a STEM charter, math is embedded in daily conversations, thinking probes, and application activities.

It is the mission of Bettis Preparatory Leadership Academy is to inspire the students of Bettis Preparatory Leadership Academy to pursue Science, Technology, Engineering, and Mathematics (STEM) as their area of focus and to help them become academically successful students of integrity who will positively impact our society and world.
