Bethlehem Area School District  
2019-2020 Budget

Executive Summary  
June 17, 2019

## **Introduction and Background**

The 2019-20 Bethlehem Area School District (BASD) budget was developed with the goal of sustaining program initiatives while advancing student academic opportunities inside the available resources. The proposed final budget of \$291.2 million represents a 3.47% overall increase from the 2018-19 budget of \$281.3 million. The increase in the 2019-20 budget is attributed to several key cost drivers: salaries (+\$4.6 million), PSERS (+\$2.5 million) and charter schools (+\$1.0 million).

The net increase in operating cost for the 2019-20 year without the impact of the mandated pension and charter school tuition expenditure increases is only 2.95% above the operating costs for the current year. This follows an increase of only 2.23% increase in 2018-19 reflecting very conservative spending on internal discretionary costs.

This proposed final budget includes no additional tax increase for the first time in over two decades. It is important to note that without the locally funded mandated \$30.75 million in charter school tuition expenses and \$37.4 million in PSERS costs, the BASD budget would have required no tax increase for the past six (6) years.

To guide us through this challenging budget development period, we established several budget goals:

- Sustainable budgeting – aligning on-going programs to reliable revenue sources
- Maintain mandated programs, existing contracts and agreements
- Preservation – focus on stabilizing and preserving educational programs.
- Address the structural deficit of long-term costs outpacing long term revenue growth

Additionally, the District's *Roadmap to Educational Excellence 5.0* identifies four components necessary for school improvement: core academic learning; stretch learning; student engagement; and personal skill development. This "comprehensive" school experience is critical to our mission as a public school and guided our efforts throughout the budget process.

## **Revenue and Expenditure Highlights**

While anticipated state education funding is projected to increase by approximately \$1.4 million, it should be noted that the increased mandated charter school and pension cost is \$152,189 more than the increase in subsidy, resulting in a net negative for the District. Over the last twelve years, there has been a steady decline in the state subsidy available for educational programs in BASD as stagnant funding and rising mandated tuition and pension have now depleted all new subsidy dollars in 2019-20. Additionally, this proposed final budget anticipates a slight increase in federal

funding for Title I School Improvement and Title IV security initiatives. Although there are minimal increases in subsidy, the overall trend of shifting the burden of financing our public schools to the local taxpayer continues.

This final budget is below the Act 1 Index and uses no available Act 1 exceptions approved for the District. The District was approved by the PA Department of Education for a \$844,619 Special Education exception.

This proposed final budget represents a 2.95% overall increase in BASD expenditures excluding PSERS and charter school tuition costs.

Within this conservative budget plan, we are able to provide expanded student access to digital learning tools by providing secondary students chromebooks that they can take home for study after school. Additionally, this budget supports the continued development of key educational initiatives including Project Lead the Way, Reading by Grade 3, elementary Spanish, American Sign Language, secondary math and science, online hybrid learning, professional development, Equity in Education, College and Career Pathways, Community Schools, Leader in Me, and AP course offerings.

## **Conclusion**

The 2019-20 BASD budget balances educational needs with financial/economic realities. This final budget is designed to protect core educational programs. We continue to educate the whole child through student engagement, personal skill development and stretch learning that prepares our students to be productive graduates in whatever career or educational path they chose. The bottom line is that pension and charter school tuition costs are now the greatest threat to the financial stability of the district. Ultimately, policy level issues such as the charter school funding formula and pension cost increases must be solved at the state level. In the meantime, local school districts are forced to cut programs and raise taxes to maintain responsible educational programs.

<b>Net Operational Gap</b>	<b>\$3,553,197</b>	<b>(\$661,004)</b>	<b>(\$941,523)</b>	<b>-0.23%</b>

The primary cost drivers impacting the deficit above include several high dollar mandated costs or programs that often overshadow our success and the outstanding commitment of the entire BASD community including the board, administrative parents and students in the achievements of our school district. The impact of these few areas presents a very difficult challenge in maintaining a fiscally conservative operational approach while still providing exciting, creative and inspiring educational opportunities for our students.

<b>Net Deficit Remaining</b>	<b>\$2,535,174</b>

# 2019-20 GENERAL FUND BUDGET

## Expenditure Summary by Functional Area

June 17, 2019

The Function describes the activities for which a service or material is acquired. The functions of an LEA are classified into five broad areas: 1) Instruction, 2) Support Services, 3) Operation of Non-instructional Services, 4) Facilities Acquisition, Construction and Improvement Services, and 5) Other Financing Uses. Functions consist of activities, which have somewhat the same general operational objectives. For example, the subfunctions (the first major subdivision of a function), of the function Support Services consist of such areas as transportation, pupil personnel services, administration, etc. The function for Instruction is broken down by program (e.g., regular, special, vocational, etc.). Construction of the functional coding structure beyond the subfunction classification is based on the principle that the classification of activities should be combinable, comparable, relatable and mutually exclusive.

## 2019-20 GENERAL FUND BUDGET

### Expenditures by Functional Area - Expanded View

June 17, 2019

This summarizes the activities for detail area where services are delivered. Functions consist of activities, which have somewhat the same general operational objectives. For example, the subfunctions (the first major subdivision of a function), of the function Support Services consist of such areas as transportation, pupil personnel services, administration, etc. The function for Instruction is broken down by program (e.g., regular, special, vocational, etc.). Construction of the functional coding structure beyond the subfunction classification is based on the principle that the classification of activities should be combinable, comparable, relatable and mutually exclusive. The expenditure and expense accounting system has been so structured that all the costs within the particular subdivisions of that function can be combined to form a summary total of related costs. Costs are recorded only once so that they are mutually exclusive.

<u>DESCRIPTION</u>	<u>17-18 ACTUAL</u>	<u>18-19 BUDGET</u>	<u>19-20 BUDGET</u>	<u>VARIANCE</u>	<u>% CHANGE</u>	<u>% of BUDGET</u>
<b>1000</b> <i>Instruction: Instruction includes all those activities dealing directly with the interaction between teachers and students and related costs, which can be directly attributed to a program of instruction. Included here are the activities of aides or classroom assistance of any type (clerks, graders, teaching machines, etc.) that assist in the instructional process.</i>
