

IT'S MISSOURI LAW

Vaccinations are a child's best protection against the most common childhood diseases.

Immunizations are important for children because they prevent 14 different diseases.

Although children received vaccinations in early childhood, they need additional shots during school years.

A student's Missouri state-compliant immunization record should include the following vaccines for specific age/grade levels:

For preschool (by 3 years old):

- 4 DTaP (Diphtheria, Tetanus, Pertussis)
- 4 HIB (Haemophilus Influenzae Type B)
- 3 IPV (Polio)
- 1 MMR (Measles, Mumps, Rubella)
- 4 Prevnar or Pneumococcal Conjugate
- 1 Varicella (Chicken Pox)

For elementary school (by 4 years old, for kindergarten):

- 4 or 5-DTaP (Diphtheria, Tetanus, Pertussis)
- 3 or 4-Hep B
- 4-HIB (Haemophilus Influenzae Type B)
- 3 or 4-IPV (Polio)
- 2-MMR (Measles, Mumps, Rubella)
- 4-Prevnar or Pneumococcal Conjugate
- 2-Varicella (Chicken Pox)

For middle school (at 11 years old, by 8th grade):

- 1-Meningococcal
- 1-TDaP booster (Tetanus, Diphtheria, Pertussis)

For high school (at 16 years old, by 12th grade):

- Meningococcal booster

If a student's record is incomplete, enrollment/registration will stop until the record is complete or parent/guardian contacts the school nurse.
