

Loom Knit Hat

Supplies needed

Large knitting loom (41 pegs) and hook

Super Bulky Yarn size 6

Yarn needle

Make a slip knot with yarn leaving a tail and place on anchor peg. Wrap the yarn around the peg to the right of the anchor peg in a clockwise motion. This is called the e-wrap method.

Continue e-wrapping around each peg until you get to the last peg. There will be one loop on each peg. Slide the loops down to the bottom of each peg, and then make another pass wrapping each peg above the first loop. When you get all of the pegs wrapped twice, take the hook and pull the bottom loop up over the top loop of the last peg and off of the peg. Repeat with all the remaining pegs. Continue knitting e-wrap rows that same way until you have 20 rows all together. The cast on row counted as row 1. When you have knitted a few rows release slip knot from anchor peg.

Once you get 20 rows completed, it's time to fold it up to make the brim of the hat. Pull the work up through the center of the loom. Then place each loop from the starting edge of the hat back onto the pegs making sure to keep the line of stitches straight. Tuck your yarn tail in between the layers. Once you have all the starting loops on the pegs, use the hook to bring the bottom loop up over the top loop and off each peg. You'll end up with a folded brim that is double thick and a nice, clean edge that doesn't roll.

Continue knitting with the e-wrap method for 20 more rows.

Now it's time to finish off the top of the hat. Wrap the yarn around the loom one and a half times and cut the yarn. This will give you enough yarn to finish off the top. Thread the end of the yarn onto your yarn needle. Bring the needle up through the first stitch and then pull the loop off the peg. Repeat that with the next peg to the right and until you get to the last peg and the hat is off the loom.

Pull the end of the yarn to cinch up the top. Sew through a few stitches around the cinched-up circle, pull the yarn really tight and tie a knot. Weave the end of the yarn under several stitches and cut off the excess yarn. Turn your loom hat right side out and it's finished!
