Use Your Imagination to Create a Backyard Obstacle Course

With playgrounds closed and gyms not accessible, it’s time to get creative and find ways to channel your energy. Consider a DIY obstacle course. You can create your course indoors or outside. Obstacle courses can be a little rough-and-tumble so be sure to have parent supervision when running!

- You can use a number of household objects and toys to structure your course:
  - Do a Hula-Hoop Hop, jumping from one hoop to the next.
  - Use a broom or shovel set between 2 chairs for crawling under or over.
  - A 2x4 or rope can make a good balance beam.
  - Use furniture (indoor or outdoor) to crawl under.
  - Pool noodles are especially handy. Stick a pen in the ground and insert it into the hole on the bottom of the noodle. Create a noodle tunnel to crawl through.
  - A tire or rope swing or swing set offer multiple use options.
  - Large cardboard boxes are awesome. Use them to climb in and out of or create a tunnel to crawl through. Toy indoor pop-up tunnels can be used too.
  - An agility ladder is a great obstacle. If you don’t have one, lay a real ladder (be careful) on the ground or draw an agility ladder on the sidewalk with sidewalk chalk.
  - Designate a section as an animal walk, where people have to either bear crawl, crab walk or duck walk.
  - Use a boulder, tree stump, or a sturdy stool or outside furniture to jump on or off of.
  - Use a kiddie pool or laundry baskets to run circles around.

Start by creating a map, then place the various obstacle elements with how you plan to move through the space.

- Make it a family challenge and time yourselves to see who’s fastest.
