Basketball forced to pause

After surging to a 4-1 start, a positive COVID test led to a 10-day quarantine for the Hawks

Lili Hobday
Staff Writer

On Monday February 15th, the Humboldt boys basketball team was heading to practice and looking forward to their game the next day. But when they pulled up to the school, their coaches were standing outside, the doors were locked and the lights were off. Someone on the team had tested positive for COVID-19. The boys season could not have been going better before this. They were 4-1, having lost only to Johnson by one point. This is a huge improvement to their 6th place finish last year. The week of the 14th was going to be a big one for them, since they were playing the current conference leader Central and would get a chance to redeem themselves against Johnson. Although the games are to be rescheduled, senior Elijah Ojo said this experience threw a lot of the team off. “We thought nothing was going to happen to anyone the whole season. It was very unexpected and right before a big game.” Now they are back in action after having quarantined for 10 days.

Part of the team’s success is owed to new players Xavier and Dominic Garcia. The senior and sophomore are the sons of assistant coach Gil Garcia and nephews of head coach Maggie Garcia. When asked why they decided to transfer to Humboldt, Xavier said, “I thought it would be a good opportunity for me to meet new people and get some new connections. My mom went to Humboldt and my dad and uncle have been coaching here for some time. Both boys have had a big impact on the team. Xavier is averaging 21 points and according to Eli-jah, “Dom has come up big in our last three games, especially against Highland when he hit some clutch threes to win us the game.”

Will there be an in-person graduation?

Paloma Leone-Getten
Staff Writer

OWLs class of 2021 is already in the midst of their senior year, but most students have yet to step inside the building, raising questions about their graduation ceremony in June. The class of 2020 held a virtual graduation due to the pandemic, but with COVID numbers slowly decreasing and vaccinations being distributed, will this year’s seniors be able to pull off an in-person ceremony?

Despite the fact that in-person academic help has just begun at OWL, there is still a possibility that there could be some sort of in-person graduation for the seniors. “We have to wait and see what happens with the infection rates, but we’re going to try to do everything we can to hold an in-person graduation in some way, either inside or outside,” said Spanish teacher Tim Leone-Getten. “June is probably a little early for it to be a completely regular graduation, but we hope to have as good of a graduation as we can, as normal as we can.” For there to be any sort of in-person graduation, obviously COVID numbers would have to decrease, and vaccinations would need...
Virtual competition is not quite as fun, but it will have to do for now. Williams is the leading scorer this season. The seniors hope to become more widely distributed. "It has been harder to get interviews and research materials when we can’t meet with people in person."

Virtual History Day is certainly going to be very different. The judging experience will be completely different, and the timing is going to be interesting as well. But at the core of it, it’s still History Day. There’s still the same rush of excitement on the day, and students still learn and hone their research and writing skills. And hopefully next year, History Day will be something closer to normal.

Senior Spotlight
Kate Moe

How tall are you?
I’m around 5’1-5’2.

What’s your favorite class so far and why?
My favorite class is probably English because of the discussion we have, the diversity of ideas, and the explanations of everything we read.

Who’s your favorite senior?
I don’t know any seniors.

Where do you think you’re going to go for college?
I haven’t thought about where I’m going to college yet. I’m still learning how to use the web.

Who’s your favorite senior?
I don’t know any seniors.

What’s the best thing about distance learning?
The best thing about distance learning is having a lot of time to complete work.

What’s the worst thing about distance learning?
The worst thing about distance learning is not seeing people. I personally am a very social person so it’s hard for me.

that One Little Kid
Liam Nowatzki

What extracurriculars are you involved in?
Basketball. I’ve been at owl for 4 years, I started in 9th grade.

What are your plans for next year?
I am going to go to Whitman College or possibly Norwegian Folk School.

What’s been your favorite class in high school?
AP Lang because how of Kevin framed the class and listening to Unwritten.

How many years have you been at OWL?
I’ve been at owl for 4 years, I started in 9th grade.

Basketball, 1
Humboldt senior Brian Williams after hitting 1000 points this season.

Another big success for the boys this season was seniors Brian Williams and Xavier Garcia hitting 1000 points. Williams is the leading scorer in Humboldt boys basketball history having hit 1000 a few games before Garcia, but the boys will compete for that title for the remainder of the season. During a game against Highland, Brian was fouled with 999 points. When he made his free throw the team and the select few fans went crazy. Brian was brought to the middle of the court and given his 1000 point ball. Garcia had a similar experience. The team’s first game back from quarantine, he hit a 3 a few minutes into the 2nd half, making him the 2nd player in Humboldt boys basketball history to hit 1000 points.

As for the girls team, this season has come with some serious blows. Last year they put together a 7-4 season, and varsity team. This year they lost 4 out of 5 of their varsity starters and the whole program consists of 8 players. Despite these setbacks, the team is 5-2 going into the second half of their season and is projected to finish either second or third in the conference. "This year has been difficult, but we’re doing our best. It’s nice to be back at the court and to be able to see people plus all the girls playing are dedicated to making the best of this short season and we’re having lots of fun," said Humboldt 11th grade Hai Gay Soe.

Graduation, 1
To become more widely distributed. Principal Dave Gun kale said that the district had not made a decision on graduation as of press time.

Many seniors are holding out hope that they will be able to experience their graduation with their classmates. "I want an in-person graduation because ever since 8th grade to 10th grade at OWL. I’ve seen people graduate on stage, and many of them have told me it’s a wonderful feeling knowing you did it," said senior Elijah Ojo. Senior Ella Pratt agreed.

Mintesinot, 1
playing a lot of outdoor basketball which he wouldn’t get the opportunity to do in Minnesota right now. He also went snorkeling and got the chance to see stingrays and sea turtles and even a shipwreck.

Along with activities Mintesinot has also gotten to experience new food and culture in Barbados. "Possibly my favorite part of being in Barbados is the food truck near our house. We can walk down there and get cheap jam and lentil pie," he said. He says the island life is pretty laid back and he hasn’t had to adapt to much of a culture change.

Overall Mintesinot has been enjoying Barbados, but not everything has been perfect. COVID-19 has had its effect on the island. Even though it was safe when they arrived, it didn’t remain like that for the entire time. Some tourists not following the restrictions caused COVID to spread throughout the island. In this turn led to heavier restrictions and more protocols.

On February 3rd all businesses except for pharmacies and grocery stores were required to close along with a 7pm curfew and beach restrictions. These are currently set to end soon, but it could remain intact because of the amount of cases.

Currently Mintesinot and his family are planning on returning back to Minnesota on April 8th. This date could change, however, depending on the plan for school. While he does enjoy being in Barbados, he does miss his family and friends back home. His dad wasn’t able to join them on their trip because of work restrictions and neither was his dog or cat, so he looks forward to being able to see them again.

History Day will be something achievable and it would make me happy knowing many of them have told me it’s something ever since 8th grade to 10th grade at OWL. I’ve seen people graduate on stage, and many of them have told me it’s a wonderful feeling knowing you did it," said senior Elijah Ojo. Senior Ella Pratt agreed.
OWL theater readies for Shakespearean fun
Hazel Carroll
Staff Writer
It’s been a challenging year for theatre kids. With school and community events canceled and even Broadway having shut down last March, theatregoers everywhere have been starving for an outlet. Well, good news OWL students! This year’s spring show is Shakespeare’s Twelfth Night.

Twelfth Night was originally written by Shakespeare in 1601. The play surrounds a love triangle involving a duke, a crossdressing twins (where brother may be dead), and a grief-stricken cousin. A group of suitors, servants, and a not-so-dead twin form the supporting cast that fills out this classic comedy. “Twelfth Night is Shakespeare’s comedy that celebrates love, foolishness, and discovering our true selves. It is full of mistaken identities and mischief. I cannot think of a more fun way to return to the theatre,” said theatre teacher Rebekah Rentzel.

However, OWL’s production of Twelfth Night is not Shakespeare as written. “For my senior project I’m working on adapting Twelfth Night to make it more accessible,” said Rentzel. “I’m also interested in leaning into the play’s queer tones and reimagining it in a modern setting.”

Iris is working with the teacher Rebekah Rentzel, Leo Bickelhaupt’s AP Literature and Composition class, the Theatre Advisory Board, a writing crew, and a group of theatre-loving students who gather for read-throughs of the original script to transform this show. “I am very excited to see the adaptation come together. My vision is that it will feel complete and correct in its changes to setting and characters.” The cast plans to transform the high society of Renaissance England into the modern music industry. “We’re currently playing [...] with some ideas,” said Iris, including Olivia (the countess) as a musician who just broke up with her band, Orsino (the duke) as the leader of a record label that wants to recruit Olivia, and Viola as someone who pretends to be a man to take part in a boy band that Orsino wants to set up.

Now, this all sounds great, but where’s the middle of a pandemic, how will they pull off this? Currently, things are pretty up in the air, but the team has put together several plans ranging from recording the entire thing over Zoom, to having live outdoor performances. “Though details aren’t concrete, the show will go on in one way or another.”

Finally, the most important part: audition news. Auditions will be held in late March, so keep watch for more information. Performances will be held at the end of May.

OWL Robotics making the most of virtual fun
Unable to build robots, focus shifts to team building and research
Willa Campion
Staff Writer
Over google meet, a group of 6-12 graders discussed their robot designs, Beyoncé’s partnership with Peloton, and ways to improve mental and physical health through virtual 3D gym classes at home. In another virtual event, students learned and explored programming robots to move and complete complex tasks. These members of OWL’s robotics team, The Open Circuits, meet every Wednesday despite this year’s virtual challenges.

FIRST robotics is a nationwide competition for high school students around the country. Each year, students work together to a research an innovative solution to a real-world problem and build and program a robot to complete different tasks on a game field, such as throwing whiffle balls into a basket. The robotics program was founded 8 years ago by science teacher Rebecca Palmer and has continued ever since. The Open Circuits team is currently coached by science teacher Megan Hall.

I got a test at 8:30 a.m. on Sunday, and by 10:00 I was at the Mall of America for the shot. I got briefed last, but once I found the site it was really well organized and very quickly. Round two is scheduled for Saint Patrick’s Day. My arm was kind of sore the next day, but I’m really happy to have round one in the bank. – Megan Hall, English teacher.

My mom dropped me off at the Minneapolis convention Center, I walked through the checkpoints quickly, then this really nice nurse gave me the shot. It didn’t hurt at all. As soon as the vaccine went into my arm, I felt a huge sense of relief. I’ll be fully vaccinated on March 26. – Megan Hall, Science teacher.

I got an email that I could sign up for an appointment, so I signed up for an appointment 2 days later. I went to the Minneapolis Convention Center on a Friday night, and while it was really smooth and well-run, I barely had to wait before I got my shot. There were lots of people around, but there weren’t long lines. It was sort of bizarre because I’d been thinking about it for months and it happened so quickly after thinking about it for so long. – Tim Leone-Getten, Spanish teacher.

I ‘wast’ the vaccine lottery on my birthday, and was able to be at MOA Tuesday after- noon for my first dose! It’s a super slick operation, well or- ganized and efficient. I got my jab within 10 minutes of arriv- ing. Waiting the 15 minutes for my vaccine was the longest, but I kept myself en- tertained windmililing my arm around. While I was later my arm didn’t hurt, though my mouth is super dry. 10/10 would recommend. – Katie Caven, Social stud- ies teacher.
How Georgia turned blue

Three theories about what the swing means in the big picture

Maxwell Jovidan
Staff Writer

In the aftermath of the Georgia runoff elections, a lot of people have been wondering what the exact shape of Georgia’s political future will be. Democrats Raphael Warnock and Jon Ossoff won their races twice, and the newly elected Democratic Party the “blue” stronghold of Georgia in November by now President Joe Biden. Georgia’s decades-long stretch as a GOP stronghold has been shattered, and going forward, there seems to be a more major change in the political community as to what this will mean for Georgia’s political future.

The first theory claims that Georgia will become a highly competitive swing state for several elections to come, bearing a similarity to battlegrounds like Wisconsin and Pennsylvania. This theory says that the Georgia vote, which only flipped this cycle due to President Donald Trump’s massive un- popularity, the Coronavirus pandemic, and the GOP Senate candidates. After all, Georgia has been a Republican stronghold for generations, and such a sudden change of course seems unlikely to hold in the long run.

The second theory posits that Georgia is already competitive, just not enough to carry over its GOP roots in subsequent elections. This theory states that Georgia’s vote would have been broken on GOP control of the state in elections, and that the floodgates are now open for a Democratic stronghold to emerge. This logic posits that the flip on the President level was no fluke given the fact that Jon Ossoff and Raphael Warnock won in January, and if that can hold to 2022. Democrats may be able to take even governor and tackle voter suppression, making the state swing in Democratic’s favor. This would be very similar to what has happened in states such as Virginia and Colorado where both of which have become relatively strongholds for Democrats after flip- ping to Barack Obama in that year’s Presidential Election. Especially Virginia, which is similar to Georgia in that it went from a GOP lock to a Democratic stronghold after a blue wave trend took off in its suburbs. Though this trend is of sky high minority turnout, thanks to Stacey Abrams and other local organizers, Georgia could flip blue in blue wave elections, but would generally hold for the GOP in oth- er situations.

The third and final theory claims that Georgia is already on the road to becoming a Democratic stronghold in future elections. This theory posits that the seal has been broken on GOP control of the state in elections, and that the floodgates are now open for a Democratic stronghold to emerge. This logic posits that the flip on the President level was no fluke given the fact that Jon Ossoff and Raphael Warnock won in January, and if that can hold to 2022. Democrats may be able to take even governor and tackle voter suppression, making the state swing in Democratic’s favor. This is a fact that is, until the next election.

Was impeachment worth the time, cost, and effort?

Despite a second acquittal for Trump, the process was still worth pursuing

Ted Dobkins

On January 13th, 2021, former President Donald Trump became the first President in all of U.S. history to be impeached for the second time in his presidency. Impeachment, a process that has been used for generations, has a sudden change of course unlikely to hold in the future.

The 232 yea votes were not the required two-thirds majority (roughly 290 votes), so it didn’t go through. This is likely the most bipartisan vote ever in the House, as it’s been explained before. I believe that this whole impeachment process (even though it didn’t go through) is still considerably worth it, and it shows the need for a crucial and important play by the House. Even if former President Trump wasn’t convicted, it was still an important step, because it showed that many leaders of our government and nation can not stand for Trump’s ac- tions on January 6th.

The fact that this is Trump’s second impeachment is what continued after he was out of office, will show in history that we didn’t just get him go free, and that we still tried our best to hold him accountable for his actions that led to the in- surrection. This impeachment will also hopefully show his followers that Trump’s actions were not okay, and that he didn’t just go off for any of chances of punishment, but most im- portant this documents this from ever happening again, and shows that a president can not go off and false other the point of the inscription. And even though he was not convicted, this would be a news history books that politicians couldn’t and didn’t stand for Trump’s actions and convictions, which will never happen again.

But what’s next? Has the impeachment process even matters? Will Trump go off free? Well, right now we don’t real- ly know what might happen in the long run, but the impeach- ment has definitely led to other actions, for example, just days after the impeachment ended, Mississippi Democratic Rep- resentative and chairman of the House Homeland Security Committee, Bennie Thomp- son, is suing former President Trump and his attorney Rudy Giuliani, in a lawsuit that ac- cuses them of inciting the in- surrection. Thankfully, like one continue, more information might be discovered in investigations and the litigations, which can further convict the former president and possibly impeach him.

But also because former President Trump was not con- victed, he still has benefits of a former President, he still receives heavy amounts of taxpayer money, and he can even technically still run for future office. So the impeachment didn’t affect him too much personally, but it is still highly documented and noted upon, so the country will not for- get about this anytime soon. And because of this, the sec- ond impeachment might also well end up being the deciding state in many Presidential and Senate elections in the future, and it is certain to be the sub- ject of much speculation by pundits in the meantime, sim- ilar to what you see here. But one group that will definite- ly be happy with this intense political period concluded an investigation. No more ad bombs and record breaking cam- paigns will be bothering the people in Georgia anymore. That is, until the next election.

Regardless of which theory you find most compelling, there remains a lot of uncer- tainty and nuance in Georgia’s political future. It could very well become a competitive swing state for several elections to come, and that the floodgates are now open for a Democratic stronghold to emerge. This logic posits that the seal has been broken on GOP control of the state in elections, and that the floodgates are now open for a Democratic stronghold to emerge. This logic posits that the flip on the President level was no fluke given the fact that Jon Ossoff and Raphael Warnock won in January, and if that can hold to 2022. Democrats may be able to take even governor and tackle voter suppression, making the state swing in Democratic’s favor. This is a fact that is, until the next election.

Minari is a straightforward, heartwarming story that elicits a range of emotions

Jack Cheatham

In a shock to no one, 2020 wasn’t the greatest year for movies. The pandemic threw everything for a loop, with the film industry included, with theaters and filming having to shut down in March. This pushed most major block- busters back and put a major dent in the theater industry. The movies that did come out were mostly smaller or stream- ing exclusives, both of which were watched easily from home.

Although some great mov- ies did release straight to vid- eo like Soul or Da 5 Bloods there aren’t nearly as many last year. But one movie that brought us Parasite, Marriage Story, and others. One movie that I am looking to the future for is Minari, a film which a compatriot for this year’s awards.

Minari tells a simple sto- ry of a Korean family moving from California to rural Ar- kansas in pursuit of the Amer- ican Dream. This is in part due to the father Jacob who dreams of planting and selling Korean crops in near- by city Dallas and quitting his job helping. The rest of the family has to adjust to a drastically different life- style and eventually great with the move. Soon Joa arrives to help watch the kids. Problems begin as farming goes bad and health problems arise.

I really enjoyed this movie and was worth the wait. Ev- erything it attempts to go for is pulled off expertly and it all seems very personal, which I 9/10.

Nomadland hits home

Narrative is captivating, film-making is underwhelming

Otis King

**Survivor still rules**

*If we can’t interact with others, at least we can watch people on TV*

**Lillian Hennessey**  
Staff Writer

According to a recent study done by British company Ofcom, overall screen time usage has gone up by 31% since the start of the pandemic. Personally, I’ve seen a major increase in the amount of time that I spend watching TV. Last week, there was one day where I spent a shocking 10 hours watching the tube. With all the TV I’ve been watching, I’m certain that I’ve found the absolute perfect quarantine show: Survivor.

Survivor has been on the air since 2000, and it still goes strong. This makes it for 40 amazing seasons, and a combined 400 hours of television (roughly). If you’re not familiar with the show, it’s essentially a survival show combined with social elements, where somebody gets voted off at the end of the episode by their castmates (or as the show deems them, tribe members). The earlier seasons focused more on the survival aspect, but has recently trended more towards the social aspect, with the signature catchphrase of the show being “Outwit, Outplay, Outlast.”

Survivor is the perfect show for quarantine, for many reasons.

- **The obscure number of seasons will keep you occupied** for ages, maybe even until the pandemic is over! Even though there are 40 seasons, the show keeps itself fresh with interesting themes. For example, some seasons have the theme of “Blood & Water,” where participants compete against their own family members. Additionally, many seasons have some re-turning players, so you get to watch some of your favorite players throughout multiple seasons.
- **However, my all time favor-**
- **ite part of Survivor is its host,** Jeff Probst. Without question, Jeff Probst is one of the best TV hosts of all time. He’s charismatic, adventurous, cute, and really knows how to move the show along and cause drama. Honestly, if Jeff Probst left the show I would probably stop watching. Lastly, Survivor is great to watch while social distancing, because it’s a game. We can’t interact with others, at least we can watch other people do it on TV.

Hulu and Amazon Prime have seasons 1-31, and Netflix has seasons 20 and 28, which are widely accepted as the two best seasons of the show.

**Games beyond Among Us**

**Options for crews to play virtually together**

**Avery Koll**  
Staff Writer

With the Among Us craze starting to die down a bit, some of you might be wonder-ing what other options are there for digital games that can be played with your crew vir-tually.

My crew has played a lot of Among Us... but we have played one game that was not Among Us. Codenames. Codenames was originally a card game, but with the pan-demics, it, like many other games, has been ported digitally. Even the official Code-name webpage has a virtual version of Codenames. To play Codenames, you split into two teams and assign one player on the team as a spymaster.

The spymasters receive a layout of words that are on their team, civilians and as-ssassin. They give one-word clues that can point to one or more words on the board, and the other players on the team attempt to guess their team’s words while avoiding the words of the other team and assassin. If you choose the oth-er team’s card your turn is over, but if you choose the assassin the game is over, nobody wins.

Another game to play is Jackbox. Now I’ve talked a bit about Jackbox in the past, but really it is a fun and easy game to play. All you need to do is able to play someone who has a Jackbox party pack, and a device where you can access Jackbox.tv. But some of the games have a limited number of players, but with that there is the audience feature, the au-dience can still actively partici-pate in the game, but depend-ing on the game the audience participation can vary.

In one of my favorite games, Trivia Murder Party, only eight people can play and the rest join the audience. The audience can win even the game in some cases. There is also a game called Bracketeering where you can play the game. The goal of Bracketeering is to get your answer to the end of the bracket and get the most points. For this game the au-dience doesn’t get to fully play along with the others, they just vote for your favorite answer.

Of course there are more options for crews to play virtually together, and I am not even going to mention all of them. This is just a short list of what I have personally enjoyed playing.

**New release has potential, but it’s not there yet**

Cyberpunk 2077 changes interfere with what could have been a great storyline

**Elizabeth Hallanger**  
Staff Writer

Over the years, videos games have constantly strived to be bigger and better, and in all honesty, I love it. Getting to see the evolution of graphics, game mechanics, and overall story, is the reason video games is such a treat.

For me personally, I don’t really have high standards for video games. You could give me a game with the most mind numbing mechanics known to man, and as long as it had pretty graphics, I would play it. However, when Cyberpunk 2077 was first released, my hopes were high. I’ve always been a big fan of the sort of aesthetic the game was offer-ing, and along with the promis-ing it of being an open-world adventure with plenty of de-tail and things to do, so I was counting down the days until its release.

While I had heard some skepticism from the gaming community, saying that it would flop like other games that had promised similar things, my hopes were still high. When my friend and I finally got our hands on the game, we were waiting excit-ingly for the game to begin, and... it was something. So, did the game actually turn out to be as good as it was planned? Or, does it look like it’ll be remembered for its monumental failures in the same way as its predecessors? Because from what I experi-enced, it seems like it’s leaning towards the latter.

The game’s main storyline is one of the best parts of the game. It’s simple, but it’s engaging. You play as a character, are given a quest, and you go about it. The whisker, and expands on the world of the game, and I per-sonally found it to have very interesting and entertaining roles, especially Keana Reemer’s character. The environment is also a large plus for me personally. It’s neither realistic nor immersive in its atmosphere, and it really fits together nice-ly, almost as well as I thought you’re really there. That is, however, when the game works as they’re sup-posed to.

While the game may have had many positive aspects, it’s not at all perfect. The game is inherently flawed, and it caus-es a whole lot of problems. The bugs in Cyberpunk are very noticeable, essentially un-avoidable, and practically ev-erywhere. Clipping into build-ings and walls, strange vehicle physics, buggy NPCs and their even worse AI.

Those weren’t even all the things my friend and I experi-enced, as we spent a good half of the play time just acciden-tally no-clipping into buildings on janky cars and staring at the lighting that would occasion-ally stop working, turning the world into a strangely-shaped wonderland. However, it never failed to entertain us when an NPC would scold me for being “worth,” when I did something as simple as sit next to them, and then not a minute lat-er, pull an entire box of non-cases from a non-existent pant pocket. While you can have some good fun with the awk-ward NPCs, buggy physics, and no-clipping cars, they’re much more of a hindrance than a fun aspect.

So, overall my thoughts on the game? It has potential. The game, in its current state, is bad. It’s a buggy mess that feels partly unfinished, but it’s also got some great mechanics and an interesting storyline. Plus, due to COVID-19, much of the development was most likely halted, so that’s under-standable.

The game, being the recent release of the game from stores and player’s consoles stirred up more controversy, and is quite the nuisance — and a bit fun-ny if you ask me — I do feel though the game can come back better than before. If oth-er games could, then I believe that this one could as well.

Now, however, I would give the game a solid 4/10, as the sto-ryline is alright, but I simply recommend to not take your money anywhere near this game until it’s been improved.
