How many classmates read fewer than 11 books? _____

How many more classmates read 14 books than 8 books? _____

How many fewer classmates read 16 books than 10 books? _____

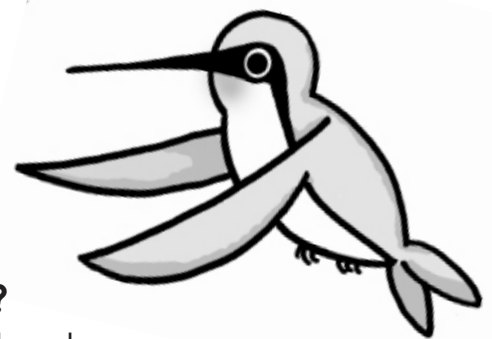

How many classmates did Walter ask total? _____

Story Comprehension

The Ruby-throated Hummingbird is a beautiful and interesting bird. It is the smallest bird in Minnesota and its body is fewer than 4 inches long. This bird eats nectar from flowers and sometimes small bugs. It is also the only Minnesota bird that can fly backwards. Ruby-throated Hummingbird wings make a humming sound because they flap over 50 times every second! It is fun to look at Rub-throated Hummingbirds because they are iridescent, which means the feathers are shiny and look like different colors from different angles.

What is this article about?

- flying backwards
- different kinds of birds
- Ruby-throated Hummingbirds

What is something you did NOT learn from this article?

- Ruby-throated Hummingbirds are less than four inches long.
- Ruby-throated Hummingbirds can fly to Mexico.
- Ruby-throated Hummingbirds can fly backwards.

What part of the Ruby-throated Hummingbird makes a humming sound?

- feet
- wings
- beak

Compound Words

A compound word is made when two words are joined to form a new word. Use words from the word bank and write 5 compound words. Use each word once.

Word Bank

- pan
- camp
- door
- book
- day
- ground
- birth
- cake
- out
