IABS Updates

- What is Integrated Academic and Behavior Systems (IABS)?
    - IABS is formally known as MTSS (Multi-tiered Systems of Supports). It is overall, **School Improvement** to meet the needs of all students to the best of our ability. This framework infuses both academic and behavior supports (PBIS).
    - IABS is equitable practices which provides a crafted pathway for each child, from the **highest achieving** students to our children who need the **most supports**.
    - It is a continuous look at **core instructional practices** that eventually affects the outcomes of each child.
    - IABS has been implemented into all schools. The goal is to now maintain the IABS framework under Educational Equity.
    - Each school is asked to create **1 team** to function as the school's IABS problem-solving team (manage data, meet with each grade level of teachers to discuss their students, make certain Intervention Plan packet is complete, etc.)
