Grant Purpose

The intent of the American Rescue Plan of 2021, ESSER III funding is to safely open and sustain the safe operation of schools and address the impact of the coronavirus pandemic on Students..

To **address learning loss** among LEA students, including low-income students, SWD, English learners, racial & ethnic minorities, students experiencing homelessness, & children in foster care the district plans to administer and use high-quality assessments which will enable us to determine specific learning gaps for individual students in order to prepare individualized learning plans to address those gaps. In addition, we will implement evidence-based activities to meet the comprehensive needs of students. Reading academies will provide teachers with evidence-based activities to meet the comprehensive needs of students in reading where we see the most learning loss. The bilingual interventionist and dyslexia/RTI professional will provide teachers and students evidence-based activities to mitigate learning loss

To **provide mental health services and supports**, including implementation of evidence-based full-service community schools, we will utilize behavior coaches, who will assist the campuses with the implementation of behavioral supports and a campus-wide social and emotional learning program to better meet the needs of students as they adjust to returning to school. In addition, they will work with teachers to help them more easily identify a student with emotional needs at the earliest stages and provide appropriate support.

Funds will also be used to plan and implement activities related to **summer learning**, including providing classroom instruction during summer months and addressing the needs of low-income students, SWD, English learners, migrant students, students experiencing homelessness, & children in foster care. Summer school programs will be planned and designed to meet the individual learning gaps of students.
