Supercharge Summer Gains With Imagine Math

Grades PreK-2: Introduction to the program

Imagine Math is an adaptive learning solution that delivers rigorous, age-appropriate supplemental math instruction for PreK through grade 8 and beyond. Supported with resources for both online and offline learning, all Imagine Math students will experience learning gains whether in school, at home, or through blended implementation models.

Imagine math that...

- Offers dedicated Summer Pathways which review key skills from the current grade to prepare students for the upcoming school year, all aligned to your state standards.
- Integrates academic discourse and EL support while intentionally scaffolding all students up to success with core skills.
- Drives student engagement through unique summertime motivational elements and on-demand, real-time access to rigorous instruction by certified Live Teachers.

Grades 3-4: Introduction to Fractions

Live, certified math teachers

Language & Literacy

Supercharge Summer Learning Gains With Imagine Language & Literacy

Imagine Language & Literacy is an adaptive learning solution that accelerates literacy and language proficiency for students in grades PreK-6. Supported with resources for both online and offline learning, students experience learning gains in school, at home, and through blended implementation models with Imagine Language & Literacy.

Imagine Language & Literacy allows you to...

- **Enable independent learning:** Even the youngest of learners can navigate their personal learning path on their own and enjoy targeted skill-building activities in a game-like environment with a built-in motivation program.
- **Empower intervention:** The Action Areas Tool groups students with similar needs together and recommends targeted resources for intervention and reteaching opportunities, in-person and online.
- **Celebrate success:** Imagine Learning's summer motivational contest is open to all students to reward commitment to literacy and language gains all summer long.

Students using Imagine Language & Literacy experienced 1.8x greater reading growth than their peers.*

*In a 2017-2018 study, fourth-grade students in a Texas school district using Imagine Language & Literacy scored 1.8 times higher on the STAAR Reading Assessment than their peers who did not use the program.

1.8x
greater reading growth

Recommended Usage:
15-30 minutes per subject each day
