

The Facts

In a majority of these acts, youth and adults are witnesses to threats, warning signs, or signals, especially on social media, but do not report or intervene to help the at-risk youth. In fact:

- Approximately, 1 million U.S. students reported being harassed, threatened or subject to other forms of cyberbullying^[2]
- 80% of school shooters told someone of their violent plans. 59% told more than one person^[3]
- 70% of people who complete suicide tell someone of their plans or give some other warning sign^[4]
- A national study found that 37% of threats of violence, bullying, etc. were sent electronically and 28% used social media^[5]

The Reasons

There are many reasons why youth and adults do not say something when they see a warning sign or signal. They do not:

- Understand or know how to recognize warning signs and signals of at-risk behavior
- Believe a threat to be true because “they would never say it publicly if they meant it”
- Want to be labeled, stigmatized, possibly physically threatened as a “snitch”
- Know who to tell or “believe that nothing will be done to help anyhow”
- Think they need to because someone else will say something
