

# Electrical Equipment – Power Strip

If you are using power strips in most cases, the following are some basic safety guidelines:

## **Power Strip use:**

- \*\* Only use power strips that are UL listed
- \*\* Only use power strips with circuit breakers to prevent the possibility of fire
- \*\* Restrict their use for just low voltage electronics, such as computers, small clocks and lights
- \*\* Plug power strips into permanently installed receptacles not extension cords
