

Fairfield College Preparatory School

Course Catalog and Course Selection Information

2024 – 2025 Academic Year

Table of Contents

Graduation Requirements and Course of Studies	3
Course Selection Timetable	4
English Department	5
Innovation Department	10
Math Department	14
School and College Counseling Department	19
Science Department	21
Social Studies Department	27
Theology Department	34
Visual and Performing Arts Department	36
World Language Department	41

Graduation Requirements and Course of Studies

Students at Fairfield Prep must fulfill the following graduation requirements:

4 years of English
4 years of Mathematics
4 years of Theology
3 years of Science

3 years of Social Studies
3 years of World Language
1 year of Visual and Performing Arts
½ year of Innovation

The Course of Studies for students in the **Class of 2027** for the 2024 – 2025 academic year should include:

- English (English II or Honors English II)
- Mathematics (Geometry or higher depending on current course)
- Theology II
- Science (Biology, Honors Biology, Physics, Honors Physics, or AP Physics I depending on current enrollment)
- Social Studies (Western Civilization, Honors Western Civilization or AP European History)
- World Language

The Course of Studies for students in the **Class of 2026** for the 2024 – 2025 academic year should include:

- English (American Literature – American Studies, American Literature or AP English Literature & Composition)
- Mathematics (Algebra II or higher depending on current course)
- Theology III
- Science (Physics, Honors Physics, or AP Physics I, Chemistry or Honors Chemistry depending on current enrollment)
- Social Studies (United States History – American Studies, United States History or AP United States History)
- World Language

The Course of Studies for students in the **Class of 2025** for the 2024 – 2025 academic year should include:

- English (English IV elective or AP English Language & Composition. Creative Writing is an elective that cannot be taken to fulfill the four-year English requirement)
- Mathematics (Pre-Calculus or higher depending on current course)
- Theology (Select one of three Social Ethics courses)
- Science OR Elective (Students must take Chemistry if they have not already done so.)
- Social Studies OR Elective (Students who did not take Global Studies in their freshman year must enroll in a Social Studies course.)
- World Language OR Elective (Students must complete three years and through the third level in one World Language to fulfill the graduation requirement.)

Course Selection Timetable

Class of 2025, 2026 and 2027

Tuesday, January 23 rd	Course Selection Assemblies
Thursday, February 1 st and Friday, February 2 nd Tuesday, February 13 th and Wednesday, February 14 th	Counseling Sessions
Thursday, February 8 th	Parent Information Session (Zoom)
Tuesday, January 23 rd – Friday, March 8 th	Course Request Access Period
Monday, March 11 th – Friday, March 22 nd	Department Chair Approval Period
Wednesday, March 27 th	Course Approvals Published
Wednesday, March 27 th – Wednesday, April 10 th	Course Appeal and Add / Drop Period
Wednesday, April 24 th	Final Course Approvals Posted

AP English Literature & Composition and AP English Language & Composition Exams

All rising juniors and seniors interested in enrolling in AP English Literature & Composition or AP English Language & Composition must take an essay exam during the week of February 5th – 11th. Please see Mr. Denby for more details and testing locations.

English Department

Mr. Paul Denby (Department Chair)

Mrs. Megan Callahan

Mrs. Elaine Clark P'15

Mr. Brian Hoover

Mrs. Megan Hoover

Mrs. Jessica Lombardi

Mrs. Torrey MacGregor

Mr. Vincent O'Hara '01

Ms. Jayne Penn

Mr. Matthew Sather '93

Mr. William Shea '73, P '08, '11

ENGLISH DEPARTMENT COURSE OFFERINGS			
9 th Grade	10 th Grade	11 th Grade	12 th Grade
English I	Honors English II	AP Literature & Composition	AP Language & Composition
	English II	English III: American Literature – American Studies	Honors English IV: International Short Fiction
		English III: American Literature**	English IV: African American Literature / Grad at Grad in Popular Media
			English IV: American Drama & Film
			English IV: British Writers
			English IV: Literature of Political Thought
			Creative Writing
Enrichment Courses Offered Online Through AVLI (10 th , 11 th and 12 th Grade)			
Catholic Authors*	Multimedia Authorship*	Comic Book Fiction*	

* Course is offered online through the Arrupe Virtual Learning Institute. Additional fees apply.

ENGLISH I: THE STUDY OF THE TRADITIONAL HERO AND FOUNDATIONS OF COMPOSITION

Understanding and appreciating literary genre and technique are objectives of the freshman literature curriculum. Students read and write about a wide variety of novels, short stories, plays, and poems throughout the year. Frequent creative and expository responses are required and student skills in correct usage, punctuation, and grammatical concepts are refined during this year. Vocabulary skills, analogies, and word building skills are integrated throughout the program. In addition, the use of the web as it relates to producing papers with MLA format is examined. Students will be assigned on-line research projects to examine the quality and reliability of web sources.

HONORS ENGLISH II: THE STUDY OF THE MODERN HERO IN MORAL CONFLICT AND INTERMEDIATE COMPOSITION

Requirements: *Approval of English Department Chairperson*

Honors English II aims at refining a broad range of skills in students. In addition to continuing the study of grammatical principles covering sentence structure, variety, and paragraph unity begun in freshman year, students further develop vocabulary skills from PSAT-SAT lists and words gleaned from the literature studies. A focus on writing includes experiences in expository, fiction, and poetry, as well as free-response writing. Students are required to respond, edit, rewrite, and refine their work. Students must also keep a writing notebook and a portfolio of finished work for review. Students will be asked to read challenging texts and maintain a greater level of individual responsibility. Students are also required to use technology for research and investigation culminating in a research term paper. The sophomore literature component includes analysis of selections from the classic Greek tragedies to 20th century contemporary novelists and poets. Its focus is on the development of skills that will enable the student to read and think critically.

ENGLISH II: THE STUDY OF THE MODERN HERO IN MORAL CONFLICT AND INTERMEDIATE COMPOSITION

English II aims at refining a broad range of skills in students. In addition to continuing the study of grammatical principles covering sentence structure, variety, and paragraph unity begun in freshman year, students further develop vocabulary skills from PSAT-SAT lists and words gleaned from the literature studies. A focus on writing includes experiences in expository, fiction, and poetry, as well as free-response writing. Students are required to respond, edit, rewrite, and refine their work. Students must also keep a writing notebook and a portfolio of finished work for review. Students are also required to use technology for research and investigation culminating in a research term paper. During the year, students will read classic literature spanning from Shakespearian drama to modern contemporary novels, plays, and poems. As students read and discuss the novels, the focus will be on the continued development of critical reading and thinking skills as well as the ongoing instruction in literary analysis. Along with this, students will contrast the view of the traditional hero, studied in English I, with that of the more modern hero who faces moral dilemmas and must choose which path they will take. Students explore both the positive and negative outcomes of those decisions.

AP ENGLISH LITERATURE AND COMPOSITION

Requirements: *Approval of English Department Chairperson.*

This college-level course is organized chronologically around the theme of the American identity, highlighting major American authors from the eighteenth through twentieth centuries. It trains students to become skilled readers of prose and poetry written in a variety of periods and rhetorical contexts, and sophisticated writers of expository, analytical, and argumentative essays. All students are required to take the AP Literature Exam in May.

ENGLISH III: SURVEY OF AMERICAN LITERATURE AND COLLEGE COMPOSITION

Prep's third year course is a study of the distinctive character of American literature. Students read and analyze selections from colonial America to the present and become familiar with the ideas, themes and characters who define the American Literary tradition. Portfolio assessment continues this year with expository, fiction, and poetry, often modeled on the literature. While vocabulary and SAT work continue this level, extensive instruction in literary criticism begins.

ENGLISH III: AMERICAN LITERATURE – AMERICAN STUDIES

Requirements: *Approval of English and Social Studies Department Chairperson*

American Studies is an interdisciplinary program consisting of paired American History and American Literature classes. In this course, students examine the nation's history and culture through literature, primary and secondary historical documents, art, music, and politics. Starting with the pre-Columbian era and ending in the 20th century, students work chronologically and thematically through American fiction and non-fiction texts to understand the evolution of the United States as a nation, as well as the evolution of the American character and literary tradition. The course prepares students to read and write about a wide range of texts over the span of several centuries -- texts like Puritan sermons and poetry, captivity narratives, the Declaration of Independence, the essays of Thoreau and Emerson, *Adventures of Huckleberry Finn*, *The Great Gatsby*, famous speeches, and 20th century plays. In addition to their work for each class, students complete at least one interdisciplinary project each quarter that synthesizes the ideas of literary and historical texts, important historical events, and the music and/or art of a given era.

The course places great emphasis on the development of critical thinking skills, especially the ability for students to recognize and grapple with enduring values, conflicts, and tensions in American life, and to develop their own essential questions about them. Student-generated essential questions serve as the starting point for their formal and informal writing, including their quarterly interdisciplinary projects. Another central component of the course is its commitment to guiding students through the writing process, which includes the creation of questions and topics, drafting, conferencing and revision.

AP ENGLISH LANGUAGE AND COMPOSITION

Requirements: *Approval of English Department Chairperson*

This course is a college-level seminar that introduces students to the literary history of the English language and provides students with a variety of critical modes with which to analyze literature. Strong emphasis is placed on the student's ability to do close reading and to communicate their ideas in writing. The first semester focuses on the epic and the picaresque novel. The second semester focuses on shorter poetry, drama, and the modern novel. Students will read authors ranging from Sophocles to Shakespeare and modern writers as well.

HONORS ENGLISH IV: INTERNATIONAL SHORT FICTION

Requirements: *Approval of English Department Chairperson*

This course examines works of short fiction from around the world written between the nineteenth and twenty-first centuries. The degree to which and the specific manners in which these works contribute to a characteristically modern sense of human existence and the function of narrative art forms the basis for reading selections. Through textual analysis, students compare and contrast various versions of the modern experience as produced by authors such as Shakespeare, Melville, Tolstoy, Dostoevsky, Achebe, Chekhov, Kafka, Hemingway, Borges, Mansfield, Conrad, Flaubert, Woolf, Dillard, Ellison, Wallace, & Atwood.

ENGLISH IV: AFRICAN AMERICAN LITERATURE / GRAD AT GRAD IN POPULAR MEDIA

In the first semester, the lens of African American literature and art will be used to more deeply examine the evolution of American art and culture. This course will focus on how Black voices fit into, and help define, the full American experience. The primary readings in the course will surround 20th century literature during, and after, the Civil Rights Era. The course will focus on analysis of poetry, prose, music, film, and visual art. Further, students will be instructed in analytical and expository essay strategies to prepare seniors for writing success in college. In the second semester, using film, music, television and popular writing, students will reflect on the “Graduate at Graduation” in everyday life. Students will be challenged to examine how our culture supports and rejects “graduate at graduation” values. Evaluations will be short essays and cumulative multi-media project.

ENGLISH IV: AMERICAN DRAMA AND FILM

Plays were never meant to be read by someone sitting alone in a chair; they were meant to be watched. American playwrights like Arthur Miller, August Wilson, and Tennessee Williams show us a great deal about human nature and the American experience. This class will be a great chance to put together an interest in history, literature, art, and film as it will look at how directors bring these iconic works to life. Along with traditional essay writing, assessments will include film making, design projects and criticisms.

ENGLISH IV: BRITISH WRITERS

Beginning with the ancient epic *Beowulf* and ending with Huxley’s *A Brave New World*, the British Writers course explores major literary movements and the creation and development of modern literature as we know it. The course concentrates on a core of literary classics and non-fiction models to explore great themes in literature and how that literature exposes the struggles of a modern people. Over the course of the year, students will be exposed to foundational pieces of literature, but also the contemporary with a focus on the monster stories of Jekyll and Hyde and Frankenstein. Classwork will include the traditional literary analysis and writing assignments, but also oral presentations and debates. Students will also have an opportunity to view and analyze clips of various film adaptations looking for differences between the author and the screenwriters’ vision.

ENGLISH IV: LITERATURE OF POLITICAL THOUGHT

Through the reading of the Hebrew Bible, Shakespeare, Machiavelli, Greek philosophers, and Lincoln’s speeches, this class will explore what it takes to maintain political dominance. Students will consider what we must do to govern well. Even more important, students will consider what they must know to do so. In other words, what knowledge must be acquired and what societal concerns must be addressed to govern well? Moreover, does great political leadership in democratic times differ in any important way from that seen in the great nations of the past? In addition to introducing students to such political themes, this course also seeks to demonstrate that through the careful reading of diverse genres selected among the great works of the Western canon – a political treatise, a play, a dialogue, a political speech, an historical novel, and portions of the Hebrew Bible – students will come to understand that such foundational texts matter, that seriously thinking through the ideas found in them and considering how they relate to us, aid us in our understanding of the human condition and, therefore, also ourselves.

CREATIVE WRITING

This course will guide students toward the development of a creative voice. Formal course work will center on writing short stories, but students can expect to delve into poetry, screenplays, drama, film, and creative non-fiction. Students will also gain valuable informal experience editing, in the publishing process, in portfolio development and peer constructive criticism.

CATHOLIC AUTHORS (AVLI)

The Roman Catholic Church is richly blessed with many wonderful authors who write passionately and compellingly about our faith. How many do you know? Augustine, Aquinas, Belloc, Chesterton, Dante, Day, Endo, Finnis, Greene, L'engle, Merton, O'Connor, Percy, Tolkien, and so many more. This course explores several diverse Catholic authors and their works and ideas, hones students' critical reading and interpretative skills, and brings students together from Catholic schools around North America to explore our Catholic faith through our rich literary heritage. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week that students are expected to attend. Meeting times to be determined at the beginning of the term. This course is a second semester course that is offered online through the Arrupe Virtual Learning Institute.

MULTIMEDIA AUTHORSHIP (AVLI)

This course aims primarily to develop communication skills through student expression ideas using multimedia technology. Students will study models of multimedia composition used by professional and student writers and then create their own multimedia content, pushing students to a mastery of the concepts and technical skills the composition requires. To fully participate in the class, students must have a computer (Mac or Windows) on which they can install new programs. They will also need access to a digital camera. The semester will culminate with each student producing an original, substantive multimedia project on a topic of the student's choice. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week that is optional for students to attend. Meeting times to be determined at the beginning of the term. This course is a first semester course that is offered online through the Arrupe Virtual Learning Institute.

COMIC BOOK FICTION (AVLI)

Literature is paradoxical by nature: it attempts to hold a critical mirror up to the very society that produced it and of which it is part, and so it requires skill to uncover what authors want to say, what they do say, and, critically, what they don't say. Comic books are no different. Despite being marginalized by traditional literary circles, comic books feature the same literary techniques and devices as canonized literature and therefore offer an accessible entryway into literary analysis. In this course, you will learn and/or sharpen reading, writing, and analytical skills while reading some of the most lauded comic book titles. Join me, the X-Men, Spiderman, and Batman among others on an epic literary journey. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week that students are expected to attend. Meeting times to be determined at the beginning of the term. This course is a second semester course that is offered online through the Arrupe Virtual Learning Institute.

Innovation Department

Mrs. Rinat Levy-Cohen (Department Chair)

Mrs. Cassandra Kinsky-Lebeda

INNOVATION DEPARTMENT COURSE OFFERINGS			
9 th Grade	10 th Grade	11 th Grade	12 th Grade
Introduction to Innovation	Computer Programming	Introduction to Engineering and Digital Fabrication	Introduction to Engineering and Digital Fabrication
		Computer Programming	Computer Programming
		Introduction to Bioengineering	Introduction to Bioengineering
		Introduction to Film and Video Production	Introduction to Film and Video Production
		Game Design	Game Design
		Esports and Gaming Concepts	Esports and Gaming Concepts
Enrichment Courses Offered Online Through AVLI (10 th , 11 th and 12 th Grade)			
AP Computer Science A*	C++ Programming*	Computer Game Development*	Computer Science Principles*
JavaScript Programming*	Understanding Artificial Intelligence: The Science and the Morality*		

* Course is offered online through the Arrupe Virtual Learning Institute. Additional fees apply.

INTRODUCTION TO INNOVATION

Introduction to Innovation is a required course in the first or second semester for all Freshmen students. Students will be introduced to aspects of innovation in the McLeod Innovation Center. In this course students will explore the art of 3D printing and laser cutting, shaping ideas into reality. Through film and video production learners will explore storytelling, script writing, and video editing. Additionally, students will engage in physical programming by designing a simple machine guided by our Jesuit values of innovation with greater purpose. This course also introduces block coding, laying the foundation for responsible technology use.

COMPUTER PROGRAMMING

Computer Programming is an elective course for upperclassmen that will incorporate the Python language. This project-based course will include, but will not be limited to, object-oriented program design, loops and decision making, functions, and algorithms.

INTRODUCTION TO ENGINEERING & DIGITAL FABRICATION

This dynamic course immerses students in the engineering design process, emphasizing research and analysis, teamwork, communication methods, and technical documentation through project and problem-based learning. In this course, students will not only learn the technical intricacies of preparing files for 3D printing and laser cutting but will also delve into the realm of designing interactive devices using Arduino, gaining a profound understanding of technology's potential. Rooted in Jesuit values, this course goes beyond technical proficiency, instilling in students a sense of responsibility and purpose in their engineering pursuits—a reflection of our commitment to nurturing men for and with others. Join us in this educational journey where engineering excellence meets Jesuit ideals, preparing students for a future where innovation and service coalesce.

INTRODUCTION TO FILM AND VIDEO PRODUCTION

Special Note: *Dual Credit Course with Fairfield University*

This course introduces and familiarizes students with the theoretical background and technical skills needed to produce film, video, and new media content. Structured around classroom discussions, screenings, and hands-on equipment workshops, this course encourages students to experiment with the moving image and find their unique creative voice, all within a supportive environment. Students will learn the proper use of a professional camera and sound and lighting equipment to complete a series of audio and video exercises, culminating in the production of group short films. Students will also apply the lessons learned to produce film and video for various departments at Fairfield Prep.

INTRODUCTION TO BIOENGINEERING

Special Note: *Dual Credit Course with Fairfield University*

This course is a second semester enrichment course that will give students the opportunity to explore the fundamentals of bioengineering. Students will be taught the fundamentals of bioengineering by a team of Fairfield University professors and will explore a curriculum that will blend theoretical knowledge and hands-on experiential learning.

GAME DESIGN

Game Design is an elective course (first semester) that course introduces students to three core areas in game development: games literacy, non-digital game design, and digital game design. Throughout the semester, learners will play and design games using board game parts and computer software. Students will work individually and in teams to create tabletop and video games. Learners will develop vital life skills such as effective collaboration, project management, teamwork, communication techniques, and decision-making. Students enrolled in this course during the first semester will enroll in eSports & Gaming Concepts in the second semester.

ESPORTS & GAMING CONCEPTS

Esports and Gaming Concepts is an elective course (second semester) where students will explore esports history, game genres, esports technology, hands-on troubleshooting, and college and career readiness with a technology focus. The course allows students to practice good gamer health and engage in digital citizenship, social-emotional learning, teamwork, journaling, and reflection. There will be time for purposeful play during class. Students enrolled in this course during the second semester will enroll in Game Development in the first semester.

AP COMPUTER SCIENCE A (AVLI)

Prerequisites: Students should have successfully completed one course in a programming language such as C, C++, Visual Basic .Net, or Java and have a computer with administrator rights Access. Moreover, students should know how to edit, compile, and run a program.

Special Note: Dual Credit Course with Creighton University

This course is an Advanced Placement level introduction to object-oriented programming in Java. Students will focus on a problem-solving approach designed to focus attention on programming algorithms and data structures. Students will be fluent in the syntax and logic structures of the Java programming language as well as familiar with the Java API. Students will attempt difficult programming challenges, reflect on these exercises, and share their discoveries with their peers. In the spring, students will be eligible to take the AP Computer Science A Exam offered by the College Board at their school. This course requires weekly engagement but is primarily asynchronous which allows students to work independently and around their school schedule. One-on-one synchronous teacher support is offered as needed, by appointment. This course is a yearlong course that is offered online through the Arrupe Virtual Learning Institute.

C++ PROGRAMMING (AVLI)

This course will introduce students to computer programming using the C++ programming language. C++ is a programming language used in many applications, across many different industries. Through this course, students will learn the basic syntax necessary to write a computer program and how to attack a problem using the proper planning techniques. Students will learn about control structures, loops, procedures, arrays and much more. Another important aspect of this course is learning how to collaborate with other students. Each student will be put in a group of 3 and will work together to meet the objectives of the module. Collaborating with other students is essential to success of students in this course, as well as a much-needed life skill. There is a synchronous meeting that will take place during one evening or weekend slot per week that students are expected to attend. Meeting times to be determined at the beginning of the term. This course is a second semester course that is offered online through the Arrupe Virtual Learning Institute.

COMPUTER GAME DEVELOPMENT (AVLI)

In this course, students will explore the variety of technologies and art forms that go into game design and development. Video games are the biggest entertainment industry in the world. They are also multimedia experiences that incorporate storytelling, music, art, and technology. This course examines the impact that games have on our society and exposes students to a wide variety of video games and genres, while teaching students to create their own video games and think critically about the games that they play. Students will learn to use a basic game engine to bring their video game ideas to life. Some previous experience in computer science is helpful but not required. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week that is optional for students to attend. Meeting times to be determined at the beginning of the term. This course is a second semester course that is offered online through the Arrupe Virtual Learning Institute.

COMPUTER SCIENCE PRINCIPLES (AVLI)

This course will introduce students to a wide array of important computer science topics. Students will learn the ideas and practices of computational thinking as well as how computers are impacting the world around us. Topics that will be covered include basic computer vocabulary, bits and bytes, programming, abstraction, internet and networking. Another important aspect of this course is learning how to collaborate with other students. Each student will be put in a group of 3 and will work together to meet the objectives of the module. Collaborating with other students is essential to success of students in this course, as well as a much needed life skill. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place during one evening or weekend slot per week that students are expected to attend. Meeting times to be determined at the beginning of the term. This course is a first semester course that is offered online through the Arrupe Virtual Learning Institute.

JAVASCRIPT PROGRAMMING (AVLI)

This course will introduce students to computer programming using the JavaScript programming language. JavaScript is an object-oriented programming language like Java, Swift, C#, or Python. It is the language behind the internet and is a crucial language for any aspiring programmer to learn. In this course, students will learn basic programming concepts including variables, control-flow, loops, functions, and data structures. Through a variety of projects, students will practice these skills and learn how to write high quality code. Previous computer science experience is not required for this course. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week that is optional for students to attend. Meeting times to be determined at the beginning of the term. This course is a first semester course that is offered online through the Arrupe Virtual Learning Institute.

UNDERSTANDING ARTIFICIAL INTELLIGENCE: THE SCIENCE AND THE MORALITY (AVLI)

In this course, students will explore the emerging fields of machine learning and artificial intelligence. Artificial intelligence systems are all around us, from predictive text in our emails to customer service chatbots, to the curation of the media that we consume. Understanding how AI works will help students understand its promise and its limitations. Students will learn how AI systems 'think', how to train an AI, and through hands on labs explore the various applications of AI in our world today. Students will also spend time discussing the morality of AI systems and take a critical look at the way that these systems are shaping our world. Previous Computer Science experience is helpful but not required. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week that students are expected to attend. Meeting times to be determined at the beginning of the term. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week that is optional for students to attend. Meeting times to be determined at the beginning of the term. This course is a first semester course that is offered online through the Arrupe Virtual Learning Institute.

ALGEBRA I LEVEL 2

Students learn how to solve problems using variables, work with exponents, factor polynomials and simplify rational and irrational expressions. Students solve linear equations and inequalities as well as radical and quadratic equations. Students learn to graph various types of functions and how to solve word problems using algebra.

HONORS GEOMETRY

Requirements: Approval of Mathematics Department Chairperson

Students study spatial relationships in two and three dimensions and inductive and deductive reasoning. They study theorems involving parallel lines, congruent triangles, similar triangles, and circles. Students learn right triangle trigonometry and area and volume formulas. The Honors level course will challenge students with an accelerated pace, in depth study of important concepts, and application to real world situations.

GEOMETRY LEVEL 2

Students study spatial relationships in two and three dimensions and inductive and deductive reasoning. They study theorems involving parallel lines, congruent triangles, similar triangles, and circles. Students learn right triangle trigonometry and area and volume formulas.

GEOMETRY LEVEL 3

Students study spatial relationships in two and three dimensions and inductive and deductive reasoning. They study theorems involving parallel lines, congruent triangles, similar triangles, and circles. Students learn right triangle trigonometry and area and volume formulas. The Level 3 course provides students with the opportunity to spend more time studying fundamental concepts to ensure success in future math courses.

HONORS ALGEBRA II

Requirements: Approval of Mathematics Department Chairperson

Students develop the skills to work in the real and complex number systems. Students study rational and irrational numbers and problem solving with them. Students review linear functions and begin a study of quadratic, exponential and logarithmic functions. Students also study conic sections as well as permutations and combinations. The Honors level course will challenge students with an accelerated pace, in depth study of important concepts, and application to real world situations.

ALGEBRA II LEVEL 2

Students develop the skills to work in the real and complex number systems. Students study rational and irrational numbers and problem solving with them. Students review linear functions and begin a study of quadratic, exponential and logarithmic functions. Students also study conic sections as well as permutations and combinations.

ALGEBRA II LEVEL 3

Students develop the skills to work in the real and complex number systems. Students study rational and irrational numbers and problem solving with them. Students review linear functions and begin a study of quadratic, exponential and logarithmic functions. Students also study conic sections (time permitting). The Level 3 course provides students with the opportunity to spend more time studying fundamental concepts to ensure success in future math courses.

HONORS PRE-CALCULUS WITH INTRODUCTORY CALCULUS

Prerequisites: Algebra II Honors

Requirements: Approval of Mathematics Department Chairperson

Students will cover all topics covered in the Pre-Calculus curriculum, including polynomial, rational, exponential, and logarithmic functions, and an extensive study of trigonometry. In addition, students will study limits, rates of change, and derivative rules. Students who successfully complete this course can enroll in AP Calculus AB or BC in their senior year. Students will be expected to complete independent assignments throughout the year.

HONORS PRE-CALCULUS

Requirements: *Approval of Mathematics Department Chairperson*

Pre-Calculus is designed to prepare students for a course in Calculus. One third of the course is spent studying trigonometry. In addition, students continue their study of polynomial, rational, exponential, and logarithmic functions. Students also study polar graphs and introductory topics in calculus. The Honors level course will challenge students with an accelerated pace, in depth study of important concepts, and application to real world situations.

PRE-CALCULUS

Pre-Calculus is designed to prepare students for a course in Calculus. One third of the course is spent studying trigonometry. In addition, students continue their study of polynomial, rational, exponential, and logarithmic functions. Students also study polar graphs and introductory topics in calculus.

INTRODUCTORY PRE-CALCULUS WITH TRIGONOMETRY

This course includes the study of many topics found in Pre-Calculus and addresses topics commonly found in required college courses for non-math majors. The pace will allow for review of key algebra and geometry concepts that are needed for success in this course and beyond. Topics will include linear, polynomial, exponential and logarithmic functions as well as major areas of trigonometry including the Unit Circle, Law of Sines, Law of Cosines, and basic identities. Applications to these topics will also be included.

AP CALCULUS AB

Prerequisites: *Honors Pre-Calculus with Introductory Calculus or Honors Pre-Calculus*

Requirements: *Approval of Mathematics Department Chairperson*

AP Calculus AB covers all topics outlined in the syllabus written by the College Board. Students study limits, rate of change, derivatives and their applications, and integrals and their applications. These topics are investigated numerically, algebraically, and graphically. Students will be prepared to take the AP Calculus AB exam in May.

CALCULUS

Calculus is open to students who have completed Pre-Calculus. This course begins with a brief review of trigonometric functions, natural logarithms, and exponential functions. This course includes a study of limits, rates of change, derivatives and an introduction to integrals and selected applications. All topics will be investigated numerically, algebraically, and graphically.

AP CALCULUS BC

Prerequisites: *AP Calculus AB or Honors Pre-Calculus with Introductory Calculus*

Requirements: *Approval of Mathematics Department Chairperson*

AP Calculus BC covers all topics outlined in the syllabus written by the College Board. Students will study all topics from AP Calculus AB. Additionally, students will study parametric, polar and vector functions; Euler's method; applications of integrals; antiderivatives by substitution and parts; improper integrals; Polynomial approximations and series. These topics are investigated numerically, algebraically, and graphically. Students will be prepared to take the AP Calculus BC exam in May.

MULTIVARIABLE CALCULUS (AVLI)

Prerequisites: AP Calculus BC

Requirements: Approval of Mathematics Department Chairperson

Special Note: Dual Credit Course with Creighton University

Focusing on the study of fundamental theorems and applications of multivariable calculus, this course extends the calculus of one-dimension studied in AP Calculus BC to Euclidean spaces of arbitrary dimension. The course will begin with vectors and then move on to the theory of partial derivatives and vector fields. Multiple Riemann integrals and their applications will be covered in term 2, as well as important theorems of vector calculus including the theorems of Green, Gauss, and Stokes. A nontrivial amount of real analysis and point-set topology will be studied to facilitate the development of certain multivariable calculus concepts. This increased sophistication will allow students to see more clearly how multivariable calculus is a beautiful generalization of single-variable calculus. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week that is optional for students to attend. One-on-one support is also available by appointment. This course is a yearlong course that is offered online through the Arrupe Virtual Learning Institute.

LINEAR ALGEBRA (AVLI)

Prerequisites: AP Calculus BC

Requirements: Approval of Mathematics Department Chairperson

This course will cover the essentials of linear algebra. Topics covered will include matrix arithmetic, systems of equations, the determinant function, vectors in R^2 and R^3 , general vector spaces, eigenvalues, and vectors, and linear transformations. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week that students are expected to attend. Meeting times to be determined at the beginning of the term. This course is a yearlong course that is offered online through the Arrupe Virtual Learning Institute.

AP STATISTICS

Prerequisites: Completion of or concurrent enrollment in Calculus or AP Calculus AB

Requirements: Approval of Mathematics Department Chairperson

AP Statistics covers all topics outlined in the syllabus written by the College Board. Students will study the major concepts and tools relating to collecting, analyzing, and drawing conclusions from data. Students will be exposed to themes including exploring data, sampling, and experimentation, anticipating patterns and statistical inference. The use of a TI-83/84 calculator is integral for this course. Students will be prepared to take the AP Statistics exam in May.

STATISTICS

In this elective course, students will study the major concepts and tools relating to collecting, analyzing, and drawing conclusions from data. Students will be exposed to themes including exploring data, sampling, and experimentation, anticipating patterns and statistical inference. The use of a TI-83/84 calculator is integral for this course.

INTRODUCTION TO FINANCIAL LITERACY

How does money work? The goal of this course is to provide the tools and resources to help students make wise financial decisions throughout their entire life. Topics include budgeting, interest rates, banking, credit cards, saving & investing, and college & career choice. Current events and real-world case studies will be utilized to bring these financial concepts to life. Students will develop the critical thinking skills and behaviors necessary to build a solid foundation for a lifetime of financial well-being. Finance is a language like any other: the more fluently you speak it, the further (and more comfortably) you travel. This course is a second semester enrichment course.

ACCOUNTING I (AVLI)

Accounting is an essential aspect of every business organization. In this course, students will learn accounting for a service business organized as a Sole Proprietorship. Students will analyze financial statements and learn the accounting cycle by working through application problems and applying accounting concepts to real-world situations. This course is primarily asynchronous and allows students to work at their own pace for weekly assignments. There is a synchronous meeting that will take place one evening per week that students are expected to attend. Meeting times to be determined at the beginning of the term. This course is a first semester course that is offered online through the Arrupe Virtual Learning Institute.

STATISTICS & PROBABILITY FOUNDATIONS (AVLI)

The purpose of this course is to learn the foundational concepts and tools of descriptive and inferential statistical reasoning in a fun way. This is an introductory, non-AP course, that covers most of the concepts in an introductory statistics course by working with data from all over across many fields of study. In our data-saturated world, people must be able to ask thoughtful questions, properly analyze data, and, most importantly, use critical thinking skills to draw appropriate conclusions and recognize inappropriate conclusions made by others. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week which students are expected to attend. Meeting times to be determined at the beginning of the term. This course is a second semester course that is offered online through the Arrupe Virtual Learning Institute.

School and College Counseling Department

Mr. John Hanrahan P'98 (Department Chair)

Mrs. Lynne Chesbro P'25

Mr. H. Dean Davis P'25, '26

Mr. Peter Francini '00

Mrs. Lina Gallinelli

Mr. Richard Hutchinson '87, P'22

Mrs. Amy Stern

Mrs. Laura Silence

SCHOOL AND COLLEGE COUNSELING DEPARTMENT COURSE OFFERINGS			
9th Grade	10th Grade	11th Grade	12th Grade
Freshman Counseling Seminar	Sophomore Counseling Seminar	Junior Counseling Seminar	Senior Counseling Seminar

Fairfield Prep's School and College Counseling program is designed to support students in establishing and maintaining academic success and personal wellness as students progress from year to year. Group Counseling seminars are held at all levels once each cycle where topics particular to each year are introduced and discussed.

FRESHMAN COUNSELING SEMINAR

Introduction to the School and College Counseling Department including a review of counseling procedures, roles of counselors and sources of support. Essential Academic Success topics: transitioning successfully to Fairfield Prep, academic success skills, sources of academic support, time management, transcript review, goal setting, preparing for mid-term & final exams, course selection and an introduction to Naviance. Positive Personal Growth topics: stress management and balance, peer interactions, establishing and maintaining healthy relationships, substance use and addiction, end of year reflection and evaluation. Freshmen are assigned a School Counselor to assist with their transition to Prep as well as their academic and personal growth.

SOPHOMORE COUNSELING SEMINAR

School and College Counselors present an overview of year ahead emphasizing academic and personal challenges specific to sophomore year: preparation for digital PSAT, PSAT score report review, Pre ACT exercise, first quarter self-evaluation, semester exam preparation, personality inventory, career/ major exploration, preliminary college search resume building through Naviance. Sophomores also discuss course selection for junior year, establishing and maintaining healthy relationships, substance use and addiction, and final exam preparation. Sophomores will have both a School Counselor and a College Counselor as they move toward determining talents and interests and identifying colleges to fulfill them.

JUNIOR COUNSELING SEMINAR

Junior year focus shifts to College Advising beginning with an overview of the challenges of junior year and ending with digital PSAT preparation, review of PSAT, developing SAT/ACT strategy, review of factors essential in college admissions, exploring college majors and careers, college search through Naviance, preparation for the college application process, the campus visit, the admissions interview, college essay(s), senior course selection, and developing a college list, finalizing an activities resume and review of junior/senior summer activities to prepare for college application procedures of the Fall. Juniors have both a School Counselor and a College Counselor; School Counselors will continue to support their positive personal growth through individual conferences which focus on goal setting, growth seeking and life management.

SENIOR COUNSELING SEMINAR

Seniors meet in counseling seminars to begin the year and then proceed into the application processes through individual meetings with their college counselor. Senior Counseling Seminars are fully focused on college application procedures. Individual meetings between senior and College Counselor focus on: finalizing college lists, determining application strategy regarding Early Action, Early Decision, rolling and regular admissions options, review of college application essay(s), securing teacher evaluations and counselor recommendations and review of application filing procedures. As the year progresses, seniors continue to engage individual conversations with their College Counselor as college admissions decisions are revealed and final college choices are decided. The focus of conversations turns then to the personal, academic, and social challenges of college. Seniors meet also with their School Counselor through the year on matters of positive personal growth. The year concludes with a transition to college program.

Introduction to Biochemistry*	Introduction to Veterinary Careers*	Medical Terminology & Career Exploration*	

* Course is offered online through the Arrupe Virtual Learning Institute. Additional fees apply.

BIOLOGY

Biology is the "study of life." This course will introduce students to major topics that a biologist studies and the major theories used and applied in their work. Students will be introduced to molecular and cellular biology where students will understand and appreciate common biological topics in the study of the smallest units within biology: molecules and cells. Other topics will be illustrated through the following themes that will recur throughout the course: scientific method, classification of organisms, evolution; structure and function of cells; reproduction and inheritance. The laboratory component of the course includes investigations intended to provide hands-on experiences and reinforce the concepts discussed in class. These include, but are not limited to, computer integrated microscopy, biochemical testing, molecular modeling, and some dissection.

HONORS BIOLOGY

Requirements: Approval of Science Department Chairperson

Honors Biology will explore the same topics included in Biology at a faster pace and in more depth and detail. Independent work will be required of the students.

PHYSICS

This course is designed to provide students with the basic concepts and principles of Physics. This conceptual Physics course is designed to take the focus off the Math skills and emphasize the Physics topics. Students will understand the role of physics in explaining natural phenomena and in seeking solutions to scientific and technological problems that citizens of the 21st century will face. Topics include fundamentals of motion, forces, energy, momentum, sound, light, electricity, and magnetism. Students will investigate these topics through a variety of classroom activities which include: pre-written and open-ended laboratory experiments; small group discussions; lectures and note taking; viewing videos; learning and applying problem-solving techniques; and relating physics principles to daily experience. Quarterly STEM projects will be assigned to all students.

HONORS PHYSICS

Requirements: *Approval of Science Department Chairperson*

Honors Physics will explore the same topics included in Physics at a faster pace and in more mathematical depth and detail. Students will understand the role of Physics in explaining natural phenomena and in seeking solutions to scientific and technological problems that citizens of the 21st century will face. Independent work will be required of the students.

CHEMISTRY

Like physicists, chemists study the fundamental properties of matter and explore the interactions between matter and energy. Chemistry is a science, but it is also used in human communication and interaction, cooking, medicine, engineering, and a host of other disciplines. This course is designed to help students understand basic chemical principles and master problem-solving skills. Students will develop an understanding of how those concepts and skills are relevant to other courses and their daily lives. Chemical topics covered in the course include basic science concepts, measurements, atomic theory, bonding, stoichiometry, states of matter, energy changes, solutions, acids & bases, and nuclear chemistry.

HONORS CHEMISTRY

Requirements: *Approval of Science Department Chairperson*

This advanced sequence course will provide students with a more detailed and intricate knowledge of chemistry and will prepare students for the SAT II subject test in Chemistry and entry into the advanced placement program. Major topics of study include: gas laws, atomic and molecular structure, chemical reactions, the periodic table, the separation of substances, nuclear chemistry, organic chemistry, electrochemistry energy in chemical change, and solutions.

AP BIOLOGY

Prerequisites: *Biology, Physics and Chemistry*

Requirements: *Approval of Science Department Chairperson*

The AP Biology course is equivalent to a two-semester college introductory Biology course. AP Biology is designed to enable students to develop advanced inquiry and reasoning skills, such as designing a plan for collecting data, analyzing data, applying mathematical routines, and connecting concepts in and across domains. The result will be readiness for the study of advanced topics in subsequent college courses — a goal of every AP course. Content, inquiry, and reasoning are equally important in AP Biology; therefore, each learning objective combines content with inquiry and reasoning skills described in the science practices.

AP CHEMISTRY

Prerequisites: *Biology, Physics and Chemistry*

Requirements: *Approval of Science Department Chairperson*

AP Chemistry is an introductory college-level chemistry course. Students cultivate their understanding of chemistry through inquiry-based lab investigations as they explore the four Big Ideas: scale, proportion, and quantity; structure and properties of substances; transformations; and energy. The AP Chemistry framework is organized into nine units of study: Atomic Structure, Molecular and Ionic Compound Structure, Intermolecular Forces, Chemical Reactions, Kinetics, Thermodynamics + Applications, Equilibrium, Acids and Bases.

AP PHYSICS I

Requirements: *Approval of Science Department Chairperson*

AP Physics I is an algebra-based, introductory college-level Physics course. Students cultivate their understanding of physics through inquiry-based investigations as they explore these topics: kinematics; dynamics; circular motion and gravitation; energy; momentum; simple harmonic motion; torque and rotational motion; electric charge and electric force; DC circuits; and mechanical waves and sound.

AP PHYSICS II

Prerequisites: *AP Physics I or high grade in Honors Physics*

Requirements: *Approval of Science Department Chairperson*

AP Physics II is an algebra-based, introductory college-level physics course. Students cultivate their understanding of physics through inquiry-based investigations as they explore these topics: fluids; thermodynamics; electrical force, field, and potential; electric circuits; magnetism and electromagnetic induction; geometric and physical optics; and quantum, atomic, and nuclear physics.

ENVIRONMENTAL SCIENCE

Prerequisites: *Biology, Physics and Chemistry*

Environmental Science is an interdisciplinary academic field that integrates physical, biological and information sciences (including ecology, biology, physics, chemistry, plant science, zoology, mineralogy, oceanography, limnology, soil science, geology, and physical geography (geodesy), and atmospheric science) to the study of the environment, and the solution of environmental problems. Environmental Science is a laboratory-based science course often out in the field, designed to provide students with the content and skills needed to understand the interrelationships found in the natural world. Students will develop skills to identify and analyze environmental problems and to propose and examine solutions. Due to the interdisciplinary nature of Environmental Science, this course will draw on many different disciplines of science including Biology, Chemistry, and Earth Sciences. Topics included in this course are: Earth Systems and Resources, Biotic Systems, Population Dynamics, Land and Water Use, Energy Resources, Pollution, and Global Change. This course will involve many labs, on-site field studies, and off-site field trips.

ECOLOGY / FIELD BIOLOGY

Prerequisites: *Biology, Physics and Chemistry*

Ecology/Field Biology is a first semester elective course. It consists of the study of the interrelationships between organisms and their environment and includes regular outdoor field experiences. Students will study organisms in their natural setting, learn about field research methods, analyze data to better understand relationships between the community of organisms and their environs. Field trips will be a part of every eight-day cycle and use locations on our campus or within a 15-minute drive of the campus. Students will do several projects to learn about course topics and demonstrate their understanding.

INTRODUCTION TO FORENSICS

Prerequisites: *Biology, Physics and Chemistry*

This course is a second semester elective course. Forensic Science introduces students to the science of crime scene investigation. They will apply their prior knowledge of biology, chemistry, physics, and mathematics to the scientific approach of the investigation of crime scenes. Students will learn terminology and investigate procedures related to crime scene analysis and the scientific procedures used on the evidence gathered. Using scientific methods, students will collect and analyze evidence through case studies and simulated crime scenes such as fingerprint analysis, trace evidence, and blood splatter analysis. Laboratory activities will give students the opportunity to demonstrate the forensic science techniques presented in lecture.

AP ENVIRONMENTAL SCIENCE (AVLI)

The goal of the AP Environmental Science course is to provide students with the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world, to identify and analyze environmental problems both natural and human-made, to evaluate the relative risks associated with these problems, and to examine alternative solutions for resolving and/or preventing them. Students will be expected to view daily videos on the AP Classroom website and answer topic questions to check their comprehension. Unit Progress Checks and Unit Tests will be accessed on the AP Classroom site at the conclusion of each topic. A variety of virtual lab activities will also be completed for each unit. Following through with this protocol, students should be well prepared for the AP Environmental Exam offered by the College Board at their school in the Spring. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week for students to attend. Meeting times to be determined at the beginning of the term. This course is a yearlong course that is offered online through the Arrupe Virtual Learning Institute.

ASTRONOMY: AN INTRODUCTION (AVLI)

Most of us are familiar with spectacular images from space missions and telescopes, and we've heard terms like "galaxies" and "black holes" tossed about in popular films. What we can sometimes forget is how those abstract terms and images are connected to the sky we can see overhead every night (at least when it's not cloudy!) This course aims to make those connections. It introduces the solar system, stars, the interstellar medium, the galaxy, and the universe. But it also teaches us how to look at the sky itself, to become familiar with the Moon, planets, and stars we can see for ourselves; where they are and how they move from hour to hour, season to season. It is also designed to force students to think like scientists – separating fact from theory, studying relationships between objects in search of patterns, and more. This course requires weekly engagement, including required weekly naked-eye observations of the sky; but is primarily asynchronous, which allows students to work around their school schedule. One-on-one synchronous teacher support is offered on demand, by appointment. This course is a second semester course that is offered online through the Arrupe Virtual Learning Institute.

ENGINEERING PRINCIPLES (AVLI)

This course takes students on a "doing" tour of the discipline of engineering and several of its sub-disciplines including mechanical engineering, electrical engineering, and computer engineering. Students will learn the engineering design process and computer aided design and apply it to "hands-on" projects. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. This course also explores the engineering approach for problem solving. One-on-one synchronous teacher support is offered as needed, by appointment. This course is a first semester course that is offered online through the Arrupe Virtual Learning Institute.

INTRODUCTION TO ANATOMY AND PHYSIOLOGY (AVLI)

Introduction to Anatomy & Physiology provides an overview of the basic systems in the human body. This course will focus on the structure and function of these bodily systems and discuss how they work both independently and collectively with each other. An underlying theme of this course will be that the structure of various components of each system result in unique and specific functions. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week that students are expected to attend. Meeting times to be determined at the beginning of the term. This course is a second semester course that is offered online through the Arrupe Virtual Learning Institute.

INTRODUCTION TO BIOCHEMISTRY (AVLI)

This course provides an overview of the main aspects of biochemistry, especially as related to human biology. Topics will include a thorough study into the four major biochemical families including proteins, carbohydrates, lipids, and nucleic acids. Select biochemical functions will be discussed in the context of chemical structures and of specific chemical principles for each of the families of molecules (for example: enzymes and enzyme regulation, carbohydrate needs in the body, lipid functions, and nucleic acid structures). Finally, the course provides an overview of metabolism and metabolic pathways which are fundamental to understanding molecular biology. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week that students are expected to attend. Meeting times to be determined at the beginning of the term. This course is a first semester course that is offered online through the Arrupe Virtual Learning Institute.

INTRODUCTION TO VETERINARY CAREERS (AVLI)

In Introduction to Veterinary Careers, students will investigate the vast field of veterinary medicine, from entering the field to living and growing within it. They will explore educational and licensing requirements, the varied jobs within the profession, and the reality of everyday life as a veterinarian (or veterinary support staff). The class will emphasize personal discovery of an individual's options for education and careers as well as considering his or her own strengths, weaknesses, and interests as they relate to veterinary careers. Finally, students will consider social and ethical challenges they may encounter to help them discern if veterinary medicine is right for them. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week that is optional for students to attend. Meeting times to be determined at the beginning of the term. This course is a second semester course that is offered online through the Arrupe Virtual Learning Institute.

MEDICAL TERMINOLOGY & CAREER EXPLORATION (AVLI)

Medical terminology is a specialized language used by health care practitioners and, just like a foreign language, it has its own vocabulary and ways of stringing together words. This course combines an introduction to fundamentals of medical terminology and terms associated with the various bodily systems with the opportunity for students to learn more about professions throughout the medical field. This course is a second semester course that is offered online through the Arrupe Virtual Learning Institute.

AP Comparative Government & Politics*	AP Macroeconomics*	AP Microeconomics*	AP World History*
Genocide and the Holocaust*	Introduction to Sociology*	Law & Society*	Model UN and International Relations*

* Course is offered online through the Arrupe Virtual Learning Institute. Additional fees apply.

GLOBAL STUDIES

Students will gain a general understanding of the histories and cultures of the world and how these histories relate to and affect our own world. Students will study the civilizations of Africa, Asia, Europe, South America, and the Middle East. The course will focus on the cultural, social, religious, and political developments in each of these areas. The course will address how these developments created the world in which we live today.

WESTERN CIVILIZATION

In this course, students will explore the heritage of Western Civilization through an examination of the cultural and political contributions of the Ancient World, the Middle Ages and the Renaissance and Modern Era in Europe and the Americas. Emphasis will be placed on methods of historical inquiry and objectivity to reach a true understanding and appreciation of the many contributions of these past eras to our present.

HONORS WESTERN CIVILIZATION

Requirements: *Approval of Social Studies Department Chairperson*

In this course, students will explore the heritage of Western Civilization through an examination of the cultural and political contributions of the Ancient World, the Middle Ages and the Renaissance and Modern Era in Europe and the Americas. Emphasis will be placed on methods of historical inquiry and objectivity to reach a true understanding and appreciation of the many contributions of these past eras to our present. The Honors aspect of the course will be attended to by regular projects relating to original or primary documents as well as serious secondary source journal articles by specialists. Students will learn how to work with and interpret those primary and secondary sources to draw conclusions in a manner consistent with a college level approach to the subject matter.

UNITED STATES HISTORY

This course is a survey of the political, economic, and social development of the United States from the pre-Columbian Era through the 20th Century. Students will work chronologically, engaging in the numerous themes which weave through United States history. Students will read a wide variety of excerpted primary and secondary source materials during the school year. The course emphasizes both critical thinking and historical thinking skills as they answer the essential questions of United States history. Methods of evaluation include quizzes, exams, essays as well as class discussions, in-class debates, and summer reading assignments.

UNITED STATES HISTORY – AMERICAN STUDIES

American Studies is an interdisciplinary program consisting of paired American History and American Literature classes. In this course, students examine the nation's history and culture through literature, primary and secondary historical documents, art, music, and politics. Starting with the pre-Columbian era and ending in the 20th century, students work chronologically and thematically through American fiction and non-fiction texts to understand the evolution of the United States as a nation, as well as the evolution of the American character and literary tradition. The course prepares students to read and write about a wide range of texts over the span of several centuries -- texts like Puritan sermons and poetry, captivity narratives, the Declaration of Independence, the essays of Thoreau and Emerson, Adventures of Huckleberry Finn, The Great Gatsby, famous speeches, and 20th century plays. In addition to their work for each class, students complete at least one interdisciplinary project each quarter that synthesizes the ideas of literary and historical texts, important historical events, and the music and/or art of a given era. The course places great emphasis on the development of critical thinking skills, especially the ability for students to recognize and grapple with enduring values, conflicts, and tensions in American life, and to develop their own essential questions about them. Student-generated essential questions serve as the starting point for their formal and informal writing, including their quarterly interdisciplinary projects. Another central component of the course is its commitment to guiding students through the writing process, which includes the creation of questions and topics, drafting, conferencing and revision.

AP UNITED STATES HISTORY

Requirements: *Approval of Social Studies Department Chairperson*

AP United States History is a college level course and is designed for students with a serious interest in Social Studies. The course syllabus will be in accordance with College Board guidelines for AP American History and will prepare the student for the AP exam at the end of the year.

AP EUROPEAN HISTORY

Requirements: *Approval of Social Studies Department Chairperson*

AP European History is a survey of European History from “The Late Middle Ages to the Dawn of the 21st Century.” This course will explore not only the political aspects of Europe’s history, but also the important intellectual, cultural, and economic developments over the last 700 years. Special attention will be devoted to the important conflicts, borrowing of culture and economic interaction between Europe and Asia from the Renaissance to the present. Through lectures, student projects, primary documents, class discussion and exposure to artistic works, students will be provided with the background necessary to understand the important social, cultural, and intellectual movements during this period.

AP UNITED STATES GOVERNMENT AND POLITICS

Requirements: *Approval of Social Studies Department Chairperson*

This AP course is designed to give students a critical perspective on government and politics in the United States. To accomplish this end, the course studies the development of our system of constitutional government, political beliefs and behaviors in the United States, the organization of the National government, civil rights, and civil liberties.

AP PSYCHOLOGY

Requirements: *Approval of Social Studies Department Chairperson*

AP Psychology is an introductory college-level psychology course. Students cultivate their understanding of the systematic and scientific study of human behavior and mental processes through inquiry-based investigations as they explore concepts like the biological bases of behavior, sensation and perception, learning and cognition, motivation, developmental psychology, testing and individual differences, treatment of abnormal behavior, and social psychology.

PRINCIPLES OF BUSINESS AND ENTREPRENEURSHIP

This course will provide authentic and meaningful experiences for students to learn the process of how to bring their original business ideas to fruition. During this course, students will review principles of business (accounting and marketing; learn how to identify an opportunity, evaluate an idea and assess the market, appreciate the risks and rewards of entrepreneurship, develop experiments to validate your idea and refine your business strategy, discover the key financial decisions any entrepreneur must make in the early stages of a new venture, understand the process of raising capital and how to speak to investors, and learn from successful entrepreneurs and leading venture capitalists, as well as peers. Students will be encouraged to generate their own, original business ideas to develop in this class. Authentic experiences will include real-time presentations to experienced investors drawn from the ranks of successful Prep alumni, and open, shark-tank like competitions such as the Start-up program sponsored by Fairfield University, where students can compete for funding grants ranging into the tens of thousands of dollars.

ECONOMICS

This course introduces students to the concepts of microeconomics, macroeconomics, and personal finance. Through this course, students will better understand how economic principles shape the decisions and interactions of individuals and countries. The personal finance portion of the course will focus on the everyday decisions individuals make in regards to managing their income and expenses. To illustrate this, students will be introduced to budgeting, borrowing, the value of credit, banking and investing.

INTRODUCTION TO AMERICAN GOVERNMENT

Introduction to American Government is a first semester course for students who will then continue to Contemporary Issues in American History. The course introduces the students to the essential ideas in American Government starting with the Founding Principles, especially those found in the Declaration of Independence and the United States Constitution. Students will learn the roles and responsibilities of the three branches of the Federal Government, the balance between the States and Federal Government, the ways in which the branches and levels of government interact with each other and the American people. Students will also engage in a study of the linkage institutions (media, elections, campaigns & political parties) coming away with an understanding of what these institutions hope to achieve and how they serve as connections between the American people and their government.

CONTEMPORARY ISSUES IN AMERICAN HISTORY

Contemporary Issues in American History is a second semester course for students who complete Introduction to American Government in the first semester. Using a case study approach students will learn about key events in American History from 1945-Present. Students will study issues from key movements (Civil Rights Movement), Diplomacy and Conflict (Cold War, Vietnam, Wars in Iraq & Afghanistan), Elections, and Domestic Policy concerns (Immigration, Healthcare). The students will learn to apply disciplinary reasoning to assess the cause and consequences of these events and interpret the information to develop evidence-based arguments.

MODERN MIDDLE EAST

This first semester course is a study of the Middle East and North Africa from the late 19th Century to the present. The region is defined to include the entire Arab world from Morocco in the west to Iraq in the east as well as Iran, Turkey, and Israel. The topics of the course will focus on regional conflicts, the Arab-Israeli conflict, and the Palestinian question. Special attention will be placed on U.S. involvement in the Arab-Israeli conflict, dependence on foreign oil, the Iran-Iraq War, The Persian Gulf War, and the War on Terror. The goal of the course is for students to come away with an understanding of the political, cultural, social, and economic forces that have shaped the Middle East in the modern world.

US HISTORY SINCE 1945

This second semester course examines the recent events and trends which have shaped the world in which we live. The course will focus on the Cold War, the Civil Rights Movement, the rise of the consumer society, the Vietnam War, and the Reagan Presidency. We will use a variety of sources including textbooks, contemporary readings, music, and films. The goal of the course is for students to acquire a basic understanding of the forces which inform American society and politics today.

AP COMPARATIVE GOVERNMENT & POLITICS (AVLI)

Special Note: *Dual Credit Course with Creighton University*

The AP course in Comparative Government and Politics introduces students to fundamental concepts used by political scientists to study the processes and outcomes of politics in a variety of country settings. The course aims to illustrate the rich diversity of political life, to show available institutional alternatives, to explain differences in processes and policy outcomes, and to communicate to students the importance of global political and economic changes. Comparison assists both in identifying problems and in analyzing policymaking. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. One-on-one synchronous teacher drop-in support time is offered each week for students, as well as on demand, by appointment. This course is a yearlong course that is offered online through the Arrupe Virtual Learning Institute.

AP MACROECONOMICS (AVLI)

Special Note: *Dual Credit Course with Creighton University*

This course integrates selected themes from the Neoscholastic School of economics with the content of the Advanced Placement economics syllabus in macroeconomics. The course prepares students to do well on the AP Macroeconomics exam as well as offers a way to view our redeemed creation through the prism of social science. The economic way is based on insights from Aristotle, St. Augustine, St. Aquinas, the Jesuit, and Franciscan theologians at the University of Salamanca in Spain during the sixteenth and seventeenth centuries, and on the Popes' social encyclicals. We develop our understanding of basic economic concepts and analytic tools by anchoring them to our faith's moral traditions and foundations. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week that is optional for students to attend. Meeting times to be determined at the beginning of the term. This course is a second semester course that is offered online through the Arrupe Virtual Learning Institute.

AP MICROECONOMICS (AVLI)

Special Note: *Dual Credit Course with Creighton University*

How should faithful Catholics think about economics? This course integrates selected themes from the Neoscholastic School of economics with the content of the Advanced Placement economics syllabus in microeconomics. The course prepares students to do well on the AP Microeconomics exam as well as offers a way to view our redeemed creation through the prism of social science. The economic way of thinking does not begin with Adam Smith. It is based on insights from Aristotle, St. Augustine, St. Aquinas, the Jesuit and Franciscan theologians at the University of Salamanca in Spain during the sixteenth and seventeenth centuries, and on the Popes' social encyclicals. We develop our understanding of basic economic concepts and analytic tools by anchoring them to our faith's moral traditions and foundations. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week that is optional for students to attend. Meeting times to be determined at the beginning of the term. This course is a first semester course that is offered online through the Arrupe Virtual Learning Institute.

AP WORLD HISTORY (AVLI)

Special Note: Dual Credit Course with Creighton University

AP World History is structured around the investigation of key course themes and concepts in six different chronological periods, from approximately 1200 C.E. to the present. These themes, examined across cultures and time periods, include: Interaction between humans and the environment; Development and interaction of cultures; State-building, expansion and conflict; Creation, expansion and interaction of economic systems; Development and transformation of social structures. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening every three weeks that students are expected to attend, as well as a weekly office hour that is optional for students to attend. Meeting times to be determined at the beginning of the term. This course is a yearlong course that is offered online through the Arrupe Virtual Learning Institute.

GENOCIDE AND THE HOLOCAUST (AVLI)

This course looks at both the academic and social constructions of genocide. We will view the Holocaust as the paradigmatic example of, but not only, genocide in modern history. Students will study the causes and processes of genocide as well as other contemporary crimes against humanity. Students and parents should be advised that this course utilizes intense and disturbing materials. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week that is optional for students to attend. Meeting times to be determined at the beginning of the term. This course is a second semester course that is offered online through the Arrupe Virtual Learning Institute.

INTRODUCTION TO SOCIOLOGY (AVLI)

Sociology touches on the essential concepts of sociology with an emphasis on contemporary American social themes. The main units of study are cultural analysis, family dynamics, gender studies, racial and ethnic inequality, socioeconomic stratification, and crime and deviance. The course requires students to perform scholarly research, prepare and perform numerous presentations, engage in class dialogues, and process information through various writing exercises. The sociology classroom demands academic determination and a desire to engage in-class discussion. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week that is optional for students to attend. Meeting times to be determined at the beginning of the term. This course is a first semester course that is offered online through the Arrupe Virtual Learning Institute.

LAW & SOCIETY (AVLI)

Law & Society features the study of the political nature of state and federal level courts, while paying particular attention to contemporary issues related to the judiciary. The course will provide a foundation for legal study through surveying 1) the historical development of the courts, 2) controversial issues surrounding the essence of court authority, 3) state and federal court structures and operations, and 4) case study areas related to civil rights and liberties. Students will have the unique opportunity to become acquainted with fundamental aspects of the American legal system and be afforded educational exposure to issues applicable as both citizens and students in the historical field of law. Class methods will include discussion, lecture, case-summary writing, historical research, and other related techniques. Note: this course is not designed to be the basis of professional legal training. It is a general survey course designed to provide students with historical and contemporary practical learning material. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. One-on-one synchronous teacher drop-in support time is offered each week for students, as well as on demand, by appointment. This course is a first semester course that is offered online through the Arrupe Virtual Learning Institute.

MODEL UN AND INTERNATIONAL RELATIONS (AVLI)

Model United Nations is an educational simulation and academic competition in which students learn about diplomacy, international relations, and the United Nations. International Relations is an academic course designed to examine the behavior of nations and states both individually and collectively. When you combine the two—that is, using the Model UN platform to examine the state of International Relations today, you have an interesting, intriguing, and fun way to enhance both your perception of global issues and your position as a citizen of your country and the global community. This is not a course that will drown itself in theory. Rather, it is designed to offer opportunities for students to study modern global issues, and the positions and interactions of nations and states, through research, simulations, discussion, and written assignments. Students are assigned a country at the beginning of the semester and represent that country during simulations, constructing position papers, resolutions, and amendments. Several seminars encourage students to participate in online discussion to resolve, or perhaps merely to understand better, an issue. Since committee work is such a vital part of the course, significant online interaction via email, video conferencing, or texting is a must for success. Simulations are based on the United Nations format. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week that students are expected to attend. Meeting times to be determined at the beginning of the term. This course is a second semester long course that is offered online through the Arrupe Virtual Learning Institute.

THEOLOGY DEPARTMENT COURSE OFFERINGS			
9 th Grade	10 th Grade	11 th Grade	12 th Grade
Theology I: Jesuits, Religions and Covenants	Theology II: The Living Word: Old and New Testaments	Theology III: The Church: Sacraments, Mission & History	Theology IV: Social Ethics and Global & Environmental Justice
			Theology IV: Social Ethics and Economy & Society
			Theology IV: Social Ethics and Justice, Resistance & Peace

THEOLOGY I: JESUITS, RELIGIONS AND COVENANTS

This course begins with a study of the history of the Society of Jesus and Ignatian Spirituality. Students will learn that they are now part of a global network of Jesuit educational institutions. The course also examines what it means to be spiritual and religious in the past and present through a study of the major world religions. Finally, an exploration of the Pentateuch serves as a scriptural foundation for future study.

THEOLOGY II: THE LIVING WORD: OLD AND NEW TESTAMENTS

This course continues the story of the People of God as students explore the post-Exodus Old Testament. Students will learn about the major judges, prophets, and kings of Israel, invasions and exiles, the Temple of Jerusalem, and the promise of the coming Messiah. The second half of the course will begin with an introduction to the New Testament via an exploration of the Gospels. Students will come to see God's "breaking into human history" through the Incarnation and the Holy Spirit's presence amongst the early Christian communities as the fulfillment of the covenants of the Old Testament.

THEOLOGY III: THE CHURCH: SACRAMENTS, MISSION AND HISTORY

Beginning with an investigation of the Acts of the Apostles and the Apostolic Letters, this course completes the progression of Scripture study which began during the freshman course. The junior course continues past the Book of Revelation with an exploration of the Sacraments of the Catholic Church as instituted by Jesus Christ throughout Church history. Throughout the second semester, students will explore the history of The Church and major Ecumenical Councils. The major role of the Holy Spirit as maintainer of Tradition and catalyst for the changes which have built up the People of God throughout the centuries serves as the overall theme for the course.

THEOLOGY IV: SOCIAL ETHICS AND GLOBAL & ENVIRONMENTAL JUSTICE

The first semester of this course will focus on social ethics. The examination of contemporary problems in society is grounded in a study of Christian ethical principles in comparison to other philosophical and religious ethical traditions. The second semester of this course will investigate controversial topics concerning the wellbeing of the population and the environment with a focus on global awareness and understanding. Throughout the year, the academic components are accompanied by hands-on experience in ongoing community-service projects, which are integrated into the course through regularly scheduled small-group discussions centered upon the lessons, challenges and rewards associated with service to others.

THEOLOGY IV: SOCIAL ETHICS AND ECONOMY & SOCIETY

The first semester of this course will focus on social ethics. The examination of contemporary problems in society is grounded in a study of Christian ethical principles in comparison to other philosophical and religious ethical traditions. The second semester of this course will explore moral and ethical issues in connection with the economy, law, business, and public policy. Throughout the year, the academic components are accompanied by hands-on experience in ongoing community-service projects, which are integrated into the course through regularly scheduled small-group discussions centered upon the lessons, challenges and rewards associated with service to others.

THEOLOGY IV: SOCIAL ETHICS AND JUSTICE, RESISTANCE & PEACE

The first semester of this course will focus on social ethics. The examination of contemporary problems in society is grounded in a study of Christian ethical principles in comparison to other philosophical and religious ethical traditions. The second semester will focus on Justice, Resistance and Peace interpreting the lens of ethical theory by attempting to understand the experience of those who are marginalized throughout society. By creating greater understanding and awareness of our human community we will help to mold global citizens who may better interact with a broader community.

VISUAL ART

Visual Art is an introductory art course that provides for the study of the history and appreciation of art combined with studio exercises. This one credit course presents a core of visual and aesthetic activities essential to understanding the visual arts discipline. Students in this course will study the elements and principles of art and design, composition and various drawing and painting techniques. Assessments will include written critiques, reports, presentations, tests, and quizzes as well as art projects. A midterm and final exam are given in class. Participation in Fairfield Prep's art exhibitions is required.

STUDIO ART I

Requirements: Approval of Visual and Performing Arts Department Chair

Studio Art will provide students with the opportunity to continue developing their skills in the methods and techniques of drawing and painting in a studio environment, and to develop their original and creative expression in visual, plastic, and graphic arts. The class structure will be student oriented including a process of "contract" assignments. The first semester will be devoted to the preparation of a portfolio; an emphasis will be given to particular drawing and painting skill, paralleling the investigation of the "Masters." Students will experiment with a variety of painting styles and techniques in their own work. In the second semester, students will explore the basics of graphic design and the computer software that is currently used in the field to produce ads, posters, business, brochures, cards, and letterhead. Assessments will include formal critiques, PowerPoint presentations, quarterly reports, and quizzes. Grades are based on timely completion of all assignments and are judged on an individual basis with consideration given to the variety of style and artistic ability.

STUDIO ART II

Prerequisites: *Studio Art I*

Requirements: *Approval of Visual and Performing Arts Department Chair*

Studio Art II is an extension of Studio Art I with students working independently on projects of their design. The primary focus is the further development of the student artist in their chosen area(s) of interest. Students envision and create their own projects based on mediums and styles they've been exposed to through Visual Art and Studio Art I.

STUDIO ART III

Prerequisites: *Studio Art II*

Requirements: *Approval of Visual and Performing Arts Department Chair*

The first semester of Studio Art III is focused on developing an art portfolio for the college admissions process. Students develop both digital and traditional art portfolios for presentation. Throughout the second semester, students continue to create and develop new works of art based on their inspirations and interests.

SPEECH AND THEATRE

This course is invaluable to all students as how they present themselves will be an integral part of their academic and professional future. The skills taught in this course will give students an edge in class presentations, group work, and writing. In the first semester, students will focus on presence and performance in front of an audience. Using the link between public speaking and performing as an actor, students will develop confidence and dynamism in front of an audience. Students will develop their skills in front of an audience through work on great speeches from history, delivering special occasion speeches like toasts, and taking on a role in short scenes. In the second semester, students will reinforce these skills through a study of the art of theatrical performance. Students will examine the various elements of the theatre—design, playwriting, and directing—experimenting with each and exploring how they work together. Through participation in workshops, students put their knowledge into action, designing sets, creating costumes, and writing short plays. With this background, students will analyze dramatic texts, and create a final scene study project.

INTRODUCTION TO MUSIC TECHNOLOGY

This freshman-level course (formerly General Music) wholeheartedly embraces the notion anyone can create interesting, meaningful music regardless of prior knowledge. Students enrolled in this course will explore music history and theory while diving into the latest technology and techniques used to create contemporary music. Learn to compose, produce, and mix your own tracks using industry-standard software and equipment. In addition to their creative exploration, students will be responsible for both mid-year and final exams to assess their mastery of these innovative musical concepts. They will also participate in nonperformance aspects of the concerts and are responsible for both mid-year and final exams.

FRESHMAN CHOIR

This is a non-auditioned freshman level performance chorus. Students will learn, demonstrate, and practice skills associated with singing. Students will develop these skills in a positive, supportive environment while also developing good musicianship skills and behaviors associated with practice and rehearsal technique. This course focuses on the fundamentals of music theory, vocal technique, and expressive artistry through music performance. Students are expected to perform at the Autumn Music Showcase, two annual concerts at the Quick Center and other Music Department events during the school year. Students are encouraged to participate in Western Regional and All-State competitions. This ensemble performs easy-to advanced level difficulty music and is open to students entering 9th grade.

SYMPHONIC BAND

Requirements: *Approval of Visual and Performing Arts Department Chair*

Symphonic Band is an advanced level performance group that includes all brass, woodwind, and percussion instruments (piano *not* included). Students are encouraged to participate in Western Regional and All-State competitions and are expected to perform at the two annual concerts and all Pep Band events during the school year. They are also encouraged to take private lessons. This ensemble performs medium to advanced-level music.

STRING ORCHESTRA

Requirements: *Approval of Visual and Performing Arts Department Chair*

String Orchestra is an advanced level performance group that includes all classical string instruments (violin, viola, cello, upright bass). Students are encouraged to participate in Western Regional and All-State competitions and are expected to perform at the two annual concerts during the school year. They are also encouraged to take private lessons. This ensemble performs medium to advanced level music.

PIANO PERFORMANCE AND COLLABORATIVE ACCOMPANIMENT

Requirements: *Approval of Visual and Performing Arts Department Chair*

Explore the world of piano mastery in this comprehensive class focused on improving piano technique, repertoire, and musicianship. This dynamic program offers a unique blend of group and individual lessons, providing students with a well-rounded musical experience as both a soloist and accompanist. Students will delve into the rich history of piano literature, uncovering the stories and styles behind the compositions, composers, and performers that have shaped the world of music. As a part of this class, students also have the exciting opportunity to collaborate with the String Orchestra and participate in each of the four major Prep Music Concerts. This is a multi-level performance class. All students are required to audition; prior experience is expected and necessary.

WIND ENSEMBLE

Requirements: *Approval of Visual and Performing Arts Department Chair*

Wind Ensemble is a beginner intermediate level performance group that includes all brass, woodwind, and percussion instruments (piano *not* included). In this ensemble, students solidify their understanding of the basic performing rudiments and playing techniques. Students are encouraged to participate in Western Regional and All-State competitions and are expected to perform at the two annual concerts and all Pep Band events during the school year. They are also encouraged to take private lessons. This ensemble performs easy- to medium-level difficulty music.

SELECT CHOIR

Requirements: *Approval of Visual and Performing Arts Department Chair*

This is an advanced level performance chorus. Students are encouraged to participate in Western Regional and All-State competitions and are expected to perform at the two annual concerts and other Music Department events during the school year. They are also encouraged to take private lessons. This ensemble performs easy-to-advanced level difficulty music.

GUITAR ENSEMBLE

Requirements: *Approval of Visual and Performing Arts Department Chair*

This is a multi-level guitar ensemble. Students will learn, demonstrate, and practice skills associated with playing the guitar. Students will develop these skills in a positive, supportive environment while also developing good musicianship skills and behaviors associated with good practice and rehearsal technique. This course focuses on the fundamentals of music theory, history, instrumental technique, and expressive artistry through guitar music performance. This course is open to students with varying levels of experience in grades 9-12.

Acceptance into this ensemble is by audition only.

GUITAR ENSEMBLE II

Prerequisites: *Guitar Ensemble*

Requirements: *Approval of Visual and Performing Arts Department Chair*

Guitar Ensemble II is an extension of Guitar Ensemble. Students will continue to focus on learning, demonstrating, and practicing skills associated with playing the guitar. **Acceptance into this ensemble is by audition only.**

AP ART HISTORY (AVLI)

Special Note: *Dual Credit Course with Creighton University*

The AP Art History course explores topics such as the nature of art, its uses, its meanings, art making, and responses to art. Through investigation of diverse artistic traditions of cultures from prehistory to the present, the course fosters in-depth and holistic understanding of the history of art from a global perspective. Students learn and apply skills of visual, contextual, and comparative analysis to engage with a variety of art forms, constructing understanding of individual works and interconnections of art-making processes and products throughout history. Coursework is rigorous and will prepare students to sit for the AP Art History College Board exam in the spring. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week that students are expected to attend. Meeting times to be determined at the beginning of the term. This course is a yearlong course that is offered online through the Arrupe Virtual Learning Institute.

AP MUSIC THEORY (AVLI)

Special Note: Dual Credit Course with Creighton University

The AP Music Theory course corresponds to two semesters of typical introductory college music theory class. Topics include musicianship, theory, musical materials and procedures, dictation and listening skills, sight-singing, and harmony. The goal is to develop the ability to recognize, understand and describe basic materials and processes of tonal music that are heard or presented in a musical score. Notational skills, speed, and fluency with basic materials are emphasized. Students who complete this course are encouraged and eligible to take the AP Music Theory examination in the Spring. This course requires weekly engagement but is primarily asynchronous, allowing students to work around their school schedule. There is no weekly scheduled class meeting, but one-on-one synchronous teacher support is offered as needed, by appointment. This course is a yearlong course that is offered online through the Arrupe Virtual Learning Institute.

DIGITAL PHOTOGRAPHY (AVLI)

Digital Photography is a semester course designed for beginning photographers. Students will learn the basics of photography and fine-tune their camera skills. The course will also cover composition and the principles of design that work to create an aesthetically pleasing photo. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week that students are expected to attend. Meeting times to be determined at the beginning of the term. This course is a first semester course that is offered online through the Arrupe Virtual Learning Institute.

ADVANCED DIGITAL PHOTOGRAPHY (AVLI)

This course is an extension to the 1st semester Digital Photography course with students deepening their mastery of key camera functionality, composition, and design principles as applied to developing personal expression and creativity. This course requires weekly engagement but is primarily asynchronous which allows students to work around their school schedule. There is a synchronous meeting that will take place one evening per week that students are expected to attend. Meeting times to be determined at the beginning of the term. This course is a second semester course that is offered online through the Arrupe Virtual Learning Institute.

FRENCH I

The key objective in French I is to form a base for acquisition and proficiency, the attainment of which requires a focus on communication with accuracy in a cultural context. The four language skills - speaking, listening, reading, and writing - are developed throughout the course. The class is conducted primarily in French with frequent opportunities for students to communicate in French.

FRENCH II

This course continues to emphasize proficiency acquisition. The course works to improve the student's ability to speak, read, listen, and write in French. Students are expected to communicate in French and can expect that the class is taught in French as well. There is a stronger emphasis on grammar within a cultural context. **FRENCH III** In this course, the students will refine their knowledge of grammar with more developed, longer creative writing assignments. Oral and listening proficiency will continue to be developed. Literature will be introduced, i.e. short stories and contemporary poetry from the Francophone world. Students will develop an understanding and appreciation of the Francophone world through a variety of cultural activities. The class is taught in French and students are expected to communicate in French.

HONORS FRENCH III: ADVANCED FRENCH GRAMMAR AND INTRODUCTION TO FRENCH LITERATURE

Requirements: Approval of World Language Department Chairperson

Honors French III is an advanced language course. Students will develop a deeper understanding of advanced grammar. This course works to enrich a student's vocabulary and increase their ability to comprehend both spoken and written French. Students in the honors section will begin to evaluate writing in response to classical as well as contemporary literature. In addition to the study of advanced grammar and composition, students read literature and write papers in response. In most cases, students in this course are preparing for the AP French Language and Culture course.

HONORS FRENCH IV: FRENCH CULTURE AND CIVILIZATION / HONORS FRENCH V: ADVANCED CULTURE AND FRANCOPHONE LITERATURE

Requirements: Approval of World Language Department Chairperson

This is an elective course for those students who have completed either Honors French III or AP French. It is designed for advanced language students who wish to continue their study of French. The course will work to build proficiency through the exploration of culture, current events, and Francophone literature. Students are expected to be motivated, independent learners as the course will include some project-based learning. Students are expected to communicate in French.

AP FRENCH LANGUAGE AND CULTURE

Requirements: Approval of World Language Department Chairperson

The AP French Language course is an advanced course designed to prepare students for the College Board AP Exam by expanding the student's reading, listening, speaking, and writing proficiency. Students build proficiency in various modes of communication including two-way interactions in writing and speaking, interpretation of audio, audiovisual, and print materials and an oral and written presentation of information and ideas. Proficiency in French language will be developed through the exploration of a variety of interdisciplinary themes relating to French culture. These themes outlined by the College Board will be explored using authentic texts, poems, plays, music, and video and will prepare students for the AP exam while building their ability to speak and comprehend both written and spoken French. The class is conducted entirely in French, and it is expected that students will communicate in French. All juniors enrolled in this course are required to take the AP exam.

LATIN I

This course is an introduction to the language, history, and civilization of Ancient Rome. Students explore the basics of the Latin language and vocabulary and its impact on the English language and vocabulary. Emphasis is placed on reading and writing basic Latin sentences and passages.

LATIN II

In this course, students continue their acquisition of Latin grammar and vocabulary, with special emphasis placed on more complex grammatical structures, such as participles, infinitives, and the subjunctive mood. Students continue to compose in Latin, using the more complex grammatical structures. Students begin to read legends in Latin and adaptations of authentic Latin authors such as Livy.

HONORS LATIN II

Requirements: *Approval of World Language Department Chairperson*

In this course, students complete their acquisition of Latin grammar and vocabulary, with special emphasis placed on complex grammatical structures, such as participles, infinitives, and the subjunctive mood. Students compose to a greater degree in Latin, using the more complex grammatical structures. Students begin to read authentic Latin from authors such as Livy and Pliny the Younger.

LATIN III: PROSE, HEROES AND LEGENDS

This course includes an extensive review of all Latin grammar and syntax, followed by exploration of Roman myths and legends, read in the original Latin language. In addition, students read authentic works from authors such as Ovid and Pliny the Younger.

HONORS LATIN III: LITERATURE OF THE LATE REPUBLIC AND THE AGE OF AUGUSTUS

Requirements: *Approval of World Language Department Chairperson*

Following a brief review of Latin grammar and syntax, students pursue a survey of Latin prose and poetry in the unadapted works of several Roman authors, such as Caesar, Cicero, Ovid, and Vergil. Late in the year, students begin the AP Latin curriculum in preparation for the AP Latin course.

AP LATIN

Requirements: *Approval of World Language Department Chairperson*

The AP Latin course promotes reading of Latin poetry and prose with historical and literary sensitivity by reading Caesar's Gallic War and Vergil's Aeneid. Students are encouraged to develop linguistic skills by engaging in multiple activities: translating poetry and prose from the required-reading list, precisely and literally, reading passages of poetry and prose with comprehension and analyzing literary texts in clear, coherent written arguments supported by textual examples.

SPANISH I

The key objective of Spanish I is to form a base for acquisition and proficiency, the attainment of which requires a focus on communication with accuracy in a cultural context. The four language skills- reading, writing, speaking, and listening- are developed throughout the course. Students are introduced to the fundamentals of the language. The class is conducted primarily in Spanish allowing students to develop their comprehension skills. In addition, there are frequent opportunities for students to communicate in Spanish. A variety of resources are integrated into the curriculum.

HONORS SPANISH I

Requirements: *Approval of World Language Department Chairperson*

This course is designed for students who come to Fairfield Prep with a proven background in learning the Spanish language. The course will be conducted in Spanish whenever possible and taught at an accelerated pace. The class will reintroduce students to the fundamental practices of Spanish, while going into greater depth to fully understand these practices. Each day, students will engage in active communication of the language that mirrors authentic situations. Students will be given daily opportunities to read, write, listen, and speak in Spanish to acquire important vocabulary and grammar. In addition, students will explore different cultural practices throughout the Spanish-speaking world.

SPANISH II

This course continues to emphasize proficiency acquisition. The course continues to work on developing the student's ability to speak, read, listen, and write in Spanish. There is a stronger emphasis on grammar within a cultural context. In addition, an emphasis is placed on developing vocabulary. The class is taught in Spanish to develop comprehension skills. Students are expected to communicate in Spanish implementing their expanding vocabulary and demonstrating their understanding of grammar. A variety of methods are integrated into the curriculum to build upon the skills previously learned, but also to encourage a love of the language.

HONORS SPANISH II

Requirements: *Approval of World Language Department Chairperson*

This course continues to emphasize proficiency acquisition. The course continues to work on developing the student's ability to speak, read, listen, and write in Spanish. There is a stronger emphasis on grammar within a cultural context. In addition, an emphasis is placed on developing vocabulary. The class is taught in Spanish to develop comprehension skills. This course moves at an accelerated pace and provides a more in-depth understanding of the grammar. Students are expected to communicate in Spanish implementing their expanding vocabulary and demonstrating their understanding of grammar. A variety of methods are integrated into the curriculum to build upon the skills previously learned, but also to encourage a love of the language.

SPANISH III

This course will review essential vocabulary and knowledge of grammar to continue developing the four major language skills: reading, writing, listening, and speaking. Students will be introduced to different types of literature within the Hispanic culture that develop skills learned throughout the course. Readings will be used to introduce Spanish speaking countries. A variety of assignments will be given based on the readings further developing the four essential skills. The class is taught in Spanish and students are expected to communicate in the target language. Projects are assigned for each unit and encourage a creative, interactive application of language and may include iMovie's, cartoon creations, and in class skits. Students will learn to work together and collaborate in the target language as the class emphasizes group work and collaboration.

HONORS SPANISH III: ADVANCED GRAMMAR AND INTRODUCTION TO LITERATURE

Requirements: *Approval of World Language Department Chairperson*

Honors Spanish III is an advanced language course. Students will develop a deeper understanding of advanced grammar. This course works to enrich a student's vocabulary and increase their ability to comprehend both written and spoken Spanish. Literature within the Hispanic culture is introduced to continue developing the four major language skills: reading, writing, listening, and speaking. This course will help inspire a love for the Spanish language through a variety of methods. Many techniques will be used frequently to cater to the different learning styles and abilities that exist, including debates, oral presentations, and formal/informal written reports. Students will also begin to develop essential skills required for the AP Spanish Language & Culture course.

HONORS SPANISH IV: MODERN HISPANIC LITERATURE

Requirements: *Approval of World Language Department Chairperson*

This advanced level Spanish course is designed for students who wish to continue their study of Spanish. Students will study advanced Spanish literature, the focus of which will be the comprehension of the writing styles and techniques of a variety of authors. A variety of techniques will be used on a regular basis to cater to the different learning styles and abilities that exist to help understand the literature pieces read in class.

AP SPANISH LANGUAGE AND CULTURE

Requirements: *Approval of World Language Department Chairperson*

The AP Spanish Language and Culture course emphasizes communication (understanding and being understood by others) by applying interpersonal, interpretive, and presentational skills in real-life situations. This includes vocabulary usage, language control, communication strategies, and cultural awareness. The AP Spanish Language and Culture course strives not to overemphasize grammatical accuracy at the expense of communication. To best facilitate the study of language and culture, the course is taught almost exclusively in Spanish. The AP Spanish Language and Culture course engages students in an exploration of culture in both contemporary and historical contexts. The course develops students' awareness and appreciation of cultural products (e.g., tools, books, music, laws, conventions, institutions); practices (patterns of social interactions within a culture); and perspectives (values, attitudes, and assumptions).

AP SPANISH LITERATURE AND CULTURE

Requirements: *Approval of World Language Department Chairperson*

Prerequisites: *AP Spanish Language and Culture*

The AP Spanish Literature and Culture course uses a thematic approach to introduce students to representative texts (short stories, novels, poetry, and essays) from Peninsular Spanish, Latin American, and United States Hispanic literature. Students develop proficiencies across the full range of communication modes (interpersonal, presentational, and interpretive), thereby honing their critical reading and analytical writing skills. Literature is examined within the context of its time and place, as students reflect on the many voices and cultures present in the required readings. The course also includes a strong focus on cultural connections and comparisons, including exploration of various media (e.g., art, film, articles, literary criticism).

AMERICAN SIGN LANGUAGE LEVEL I (AVLI)

Requirements: *Approval of World Language Department Chairperson, Director of Academic Support, and Academic Dean*

In this course, students will learn the manual alphabet, introductory vocabulary, and simple sentences needed to communicate at the introductory level. Additionally, students will explore Deaf culture, including social beliefs, traditions, history, values, and communities influenced by deafness. This course is run through the Arrupe Virtual Learning Institute; however, this course meets daily on campus as part of the academic schedule. Students are expected to also attend a synchronous meeting that will take place one evening per week.

AMERICAN SIGN LANGUAGE LEVEL II (AVLI)

Requirements: *Approval of World Language Department Chairperson, Director of Academic Support, and Academic Dean*

This course introduces the fundamentals of American Sign Language (ASL) used by the Deaf Community, including vocabulary, syntax, fingerspelling, and grammatical non-manual signals. In addition, instruction focuses on communicative competence, developing gestural skills as a foundation for ASL enhancement, and introducing cultural knowledge, thereby increasing understanding of the Deaf Community. This course is run through the Arrupe Virtual Learning Institute; however, this course meets daily on campus as part of the academic schedule. Students are expected to also attend a synchronous meeting that will take place one evening per week.

CONVERSATIONAL SPANISH I

Requirements: *Approval of World Language Department Chairperson, Director of Academic Support, and Academic Dean*

This introductory course will explore various aspects of the Spanish-Speaking world including culture, history, current events, art, music, and sports. A variety of resources will be used to present the material ensuring that it is accessible to all students. In addition, this conversational language course will emphasize the language learning skills, listening, and speaking. Students will be introduced to the vocabulary necessary to communicate and participate in conversations using the target language. Proficiency will be developed in listening and speaking using a variety of techniques and methods developed to account for differences in learning styles. The class will include interactive, project-based learning. Students will collaborate with their peers on a regular basis to practice the language skills presented by the teacher. A variety of assessments including presentations, projects, conversations, creative expression will enable students to demonstrate their progress throughout the course.
