Folding Letters for Window Envelopes

When folding letters or reports to fit into envelopes, fold the letter into horizontal thirds. Adjustments to the size of the folds will need to be made, depending on the paper being used (school stationery, Campus header, etc.).

1. Place the letter to be folded in portrait orientation, where the longest side of the paper is on the left and the shortest side is on the top.
2. Determine where the paper is divided into thirds. Use a ruler for more precise folding. On an 8.5" x 11" piece of paper, the folds occur around the 3-inch mark and the 7-inch mark.
3. Fold the bottom third of the paper up towards the top of the letter, making a crease. This fold is at about the 7 1/8" mark, or use the body of the letter as a guide (the second line of the body).
4. Fold the top third of the paper back towards the other side of the letter, making a second crease at about the 3 1/4" mark. This third of the paper is slightly less than a third. The letter should now be laying with the address facing up. If the letter is laying length-wise, so the short edge is facing you,

the sides would be in a Z shape.
