Dear Great Valley Families,

We are pleased to share that the Great Valley School District has adopted ClassLink, a single sign-on platform that will allow teachers and students to access all online resources related to teaching and learning in one place. ClassLink also securely stores passwords to online instructional tools and resources, saving students time in the classroom and at home.

All students will be trained in how to access ClassLink from their district-issued iPads. Another benefit of the ClassLink platform is that it allows students to access all instructional materials from personal computers or mobile devices. Please follow the directions below for accessing ClassLink on a personal device:

DESKTOP

1. Go to https://launchpad.classlink.com/greatvalley from the Chrome browser.
2. Students will enter their username and password or click the QR button to use the Quick Card (available for K-2 students only).
3. A message will prompt you to install a ClassLink Chrome browser extension after accessing your first application.

MOBILE

1. ClassLink has already been installed on students' district-issued iPads. If you would like to access ClassLink on any of your personal mobile devices, download the app from the Apple Store or Google Play.
2. Search for Great Valley School District (first time only).
3. Students will enter their username and password or click the QR button to use the Quick Card (available for K-2 students only).

ClassLink is a safe and secure way to ensure your child has access to everything needed for continued learning. ClassLink software never collects or shares any personal student information. Read more about our commitment to privacy here.

If you have questions, visit ClassLink's FAQ for home users, or reach out to instructional-technology@gvsd.org.
