For the Leased Lit Fiber Point to Point circuits. Question applies to All A&Z in RFP. The Quantity shows for each pair of locations shows speed 10G and quantity (2), however please clarify the request:

- a. Are you simply asking for 2 identical 10G PTP circuits with the same A & Z locations. (Effectively 20Gbps of bandwidth between the 2 sites) Which would take a common physical route from Loc A to Serving AT&T Central(s) office and then common physical route to Loc Z.

Answer: Yes. We are asking for 2 identical 10G PTP circuits with the same A & Z locations (effectively 20Gbps of bandwidth between the 2 sites) which would take a common physical route from Loc A to Serving AT&T Central(s) office and then common physical route to Loc Z.

- b. Are you asking for 2 disparate (Diverse Physical entrance, diverse local loop route, diverse serving AT&T central office) 10G Circuits with the same A&Z locations.

Answer: No, we are NOT asking for 2 disparate (Diverse Physical entrance, diverse local loop route, diverse serving AT&T central office) 10G Circuits with the same A&Z locations.

- c. Perhaps something else entirely?

Answer: No. As stated in the response to Question 1a, we are asking for 2 identical 10G PTP circuits with the same A & Z locations (effectively 20Gbps of bandwidth between the 2 sites) which would take a common physical route from Loc A to Serving AT&T Central(s) office and then common physical route to Loc Z.
