How to Measure

INSIDE MOUNT (IM) INSTALLATION

TO FIND WIDTH
To find width: Measure exact distance between inside surfaces of window frame at the top, middle, and bottom, and use the narrowest width. **DO NOT MAKE ANY WIDTH DEDUCTIONS.**

TO FIND HEIGHT
To find height: Measure exact distance from inside surface at top of window to sill. If you prefer shade not to touch sill, deduct ¼". If there is no sill, measure height to point where shade is to reach.

STANDARD FACTORY DEDUCTIONS FROM ORDERED WIDTH	
INSIDE MOUNT	
Standard Corded	3⁄8"
Cordless	3⁄8"
Continuous Cordloop	3⁄8"

OUTSIDE MOUNT (OM) INSTALLATION

TO FIND WIDTH
To find width: Measure exact distance between the outermost points where the shade is to be placed. This measurement should overlap each side of window frame by at least 1½". Factory makes no deduction from your shade width dimensions.

TO FIND HEIGHT
Measure exact distance from where top of shade will be located to top of sill. If there is no sill or if shade is to overlap window frame, measure to point shade is to reach.

STANDARD FACTORY DEDUCTIONS FROM ORDERED WIDTH	
OUTSIDE MOUNT	
Standard Corded	0"
Cordless	0"
Continuous Cordloop	0"

How to Measure
Multiple Shades on One Headrail

NOTE: The left shade width plus the innerspace, plus the right shade width must equal the overall shade width.

NOTE: There will be a standard 1⁄4" inner-space between the fabric on the left and right shades to allow for shades to operate independently.

INSIDE MOUNT (IM)
INSTALLATION

TOTAL SHADE WIDTH
Measure the width of the window at the top, middle and bottom. Order the narrowest measurement.

LEFT SHADE WIDTH
Measure the width that you want the left shade to cover. Order this shade first when placing your order.

RIGHT SHADE WIDTH
Measure the width that you want the right shade to cover.

HEIGHT
Measure the window from the top to the bottom for the desired height.

OUTSIDE MOUNT (OM)
INSTALLATION

TOTAL SHADE WIDTH
Measure the desired overall shade width. Add 3". For maximum privacy, add an additional 3" to the total width.

LEFT SHADE WIDTH
Measure the width that you want the left shade to cover. Order this shade first when placing your order.

RIGHT SHADE WIDTH
Measure the width that you want the right shade to cover.

HEIGHT
Measure the desired height. Add at least 3". For maximum privacy add an additional 3" to the total height.

Critical Dimensions

CORDLESS and CONTINUOUS CORDLOOP HEADRAIL

Position brackets in window frame to allow for the desired mount. Install brackets approximately 2" from each end of the headrail.

NOTE: If installing a cordless shade, avoid motors when installing.

CORDED HEADRAIL

Position brackets in window frame to allow for the desired mount. Install brackets approximately 2" from each end of the headrail.

MINIMUM MOUNTING SURFACE			
	HEADRAIL DIMENSIONS (DEPTH X HEIGHT)	HEADRAIL PROTRUDES	FLUSH MOUNT HEADRAIL
		Clearances necessary for either side, back or top mount	
Corded Double Cell	2½" x ⅞"	⅝"	2½"
Corded Single Cell	1⅞" x ⅞"	⅝"	2¼"
Cordless and Continuous Cordloop	1⅞" x 1⅜"	½"	2½"

Use the above chart to verify that you have adequate window depth for mounting.

NOTE: If flush mount is desired, the headrail will not extend past the window frame into the room. Consider headrail size and brackets when installing flush mount.

BOTTOM RAIL DIMENSIONS		
Bottomrail Type	Cell Size	Dimensions
Standard Corded		
Small Bottomrail	All	1 1/2" d x 7/16" h
Large Bottomrail	All	1 3/4" d x 5/8" h
Cordless & Continuous Cordloop		
Large Bottomrail	All	1 3/4" d x 5/8" h

NOTE: Different bottom rails used on corded product to account for weights for better balancing.

NUMBER OF INSTALLATION BRACKETS		
WIDTH	CORDED	CORDLESS
Up to 38"	2	2
38" to 68"	3	3
68" to 82"	4	3
82" to 106"	5	4
106" to 130"	6	4
130" and above	7	-

Special Brackets

Hold-down Brackets

Hold-down brackets are available for securing the bottomrail in position. These brackets can stop a shade from bouncing and loosely swinging if the shade is hung on a door.

NOTE: For outside mount only.

NOTE: Available for order through Customer Service.

Extension Brackets

Extension brackets are available for outside mount shades. When the shade must operate around an obstruction, these brackets project the shade away from the wall, allowing easy operation. The brackets come in two sizes, providing flexible projection lengths.

STANDARD & CORDLESS SHADES

SIZE	PROJECTION
1	⅞" (1 spacer)
2	1" to 3" (adjustable)

NOTE: Additional configurations shown in installation instructions.

Side Mount Brackets

Ideal for windows below transoms and arches. Alternative mounting method when no frame is available above the window for mounting. Use only if shade dimensions fall within the following:

CORDED	Minimum shade width	6"
	Maximum shade width	48"
	Minimum shade height	6"
	Maximum shade height	72"
CORDLESS	Minimum shade width	10"
	Maximum shade width	48"
	Minimum shade height	6"
	Maximum shade height	72"

Color Variation

Color lot variations may occur due to the process of color application and cellularization. For the best color match, order all shades for a room at the same time. Pattern availability and color lot match between orders cannot be assured. Any variation in color is in accordance with industry standards.

Cleaning Guide

All Kirsch® Honeycomb Shades are made for a lifetime of carefree use and are made of 100% polyester for durability. Your shade illustrates another facet of quality with its easy care advantage.

Dusting

To maintain a like new appearance Honeycomb Shades can be cleaned with a feather duster or a brush-type vacuum cleaner attachment; stroke lightly with over the shade to clean.

Spot cleaning/stain removal

At home

Using warm water and a mild soap if needed (mild soap includes products such as Woolite® or Scotchgard® Upholstery cleaner) spot clean the shade by going back and forth gently in the direction parallel to the pleats in the fabric. Test cleaner on a small section of fabric in a inconspicuous spot. Once stain is removed pat with a clean, dry towel to remove excess water and let dry.

Make sure shade is fully open to air dry. Be careful not to crush or wrinkle the fabric. Avoid contact with window cleaning products.

Call local on-site blind/shade cleaner

Most on-site blind and shade cleaners use a cleaning method called injection/extraction cleaning. This type of cleaning injects a cleaning solution into the fabric and extracts the dirty solution at the same time. It is a very effective way to clean your Honeycomb Shades. The service is typically performed at home so you do not need to remove your window treatments.

Understanding the science

Not only does Kirsch have beautiful colors and exclusive woven fabrics, it also has the most energy efficient shading solutions on the market. Two things to consider when looking at how to increase energy efficiency are R-Value and Solar Heat Gain Coefficient. It is the combination of the two that helps you calculate the amount of savings on your heating and cooling costs.

R-Value

R-Value refers to the shade's ability to block out temperature differences, such as cold air outside in the winter. A higher R-Value indicates a better insulating shade.

Solar Heat Gain Coefficient (SHGC)

Solar Heat Gain is a measure of how much solar energy passes into your home. In northern climates, a higher SHGC is preferred because it allows the sun to heat the room. While in more southern climates, a lower SHGC is better because it blocks the sun.

Ultraviolet Protection Factor (UPF Rating)

The Ultraviolet Protection Factor (UPF) shows how well a fabric protects from solar UV rays. Our Honeycomb fabrics have UPF ratings to help you gauge the best solution for protecting your furnishings, floor coverings and artwork from fading. UPF ratings range from 15 to 50.

	UPF RATING	UV BLOCKAGE
Good	15 to 25	93-96%
Very Good	25 to 35	96-98%
Excellent	35 to 50	98-99%

COLLECTION	SHGC ²	R-VALUE ²	UPF RATING ³
Sheer with Energy Liner	0.36	3.68	20
Satinage Light Filtering	0.36	3.03	50
Linen Light Filtering	0.34	3.13	50
Classique Light Filtering	0.31	3.23	35
Mosaic Light Filtering	0.27	3.40	50
Mosaic with Energy Liner	0.26	4.00	50
Mosaic Double Cell	0.26	3.91	50
Zileana with Energy Liner	0.26	3.79	50
Zileana Light Filtering	0.25	3.73	50

Linen Room Darkening	0.19	3.45	50
Mosaic 3/4" Cell Light Filtering	0.17	4.05	50
Mosaic 3/4" Cell Room Darkening	0.17	4.05	50

Beauty that inspires. Fabrics that insulate.

When choosing products for your home, both R-Value and Solar Heat Gain should be considered since both factors are used to calculate how a shade can reduce your heating and cooling costs. Our seasonally friendly exclusive Energy Liner works to address both. The added layer helps block air and provides additional insulation.

In warmer months, Energy Liner:

- Eliminates air flow through the shade
- Blocks interior cooled air from escaping your home

In colder months, Energy Liner:

- Eliminates air flow through the shade
- Provides additional insulation
- Allows warmth and filtered light from the sun

Climate Map

No matter where you live, Kirsch® has an Honeycomb Shade solution that will help keep your home comfortable while reducing energy costs. Use the below climate map and information grid for suggestions appropriate for your region and climate zone.

This map is meant to be a guide. If you are unsure as to what is right for you, consult the product solutions section below or visit Kirsch.com.

CLIMATE	PRODUCTS	ANNUAL SAVINGS	PRODUCT SOLUTIONS
Northern Climate	• Sheer • Zileana with Energy Liner	up to 5% ¹	If you are concerned about heating cost because you live in a cool, but sunny area, choose Sheer or Light Filtering with Energy Liner. Both will let the warmth of the sun help heat your home, while the Energy Liner works as a barrier to keep internal air from escaping through windows.
North and South Central Climate	• Day/Night Sheer paired with Mosaic Opaque • Mosaic with Energy Liner	up to 12% ¹	If you live in a temperate climate where you need help reducing heating and cooling cost, a Transformation shade is the perfect solution. Day/ Night combines two fabrics to maximize your energy efficiency. The Light Filtering fabric helps capture sunlight while blocking cold air to help heat your home. On hot, sunny days, the Opaque fabric controls light and blocks out the heat, keeping your home cooler.
Southern Climate	• Zileana or Mosaic Room Darkening • Mosaic Double Cell	up to 26% ¹	If you are concerned about cooling costs because you live in a warm, sunny area, choose a Opaque product. This fabric helps block the sun from heating your room.

Sources:

¹ Estimated savings on heating and cooling costs were calculated using ten largest statistical metro areas by climate region using RESFEN 6.0, software contracted by the United States: United States Department of Energy. The houses modeled were 2000 sq. ft. with 300 sq. ft. of double pane clear windows. Windows are evenly distributed and shades assumed to be down at all times.

² R-Values and SHGC are tested using a modified ASTM1199-00 and modified ISO15099:2003 respectively using double pane clear windows.

³ UPF ratings calculated using AATCC 183.

Automation

BENEFITS OF AUTOMATION

- Raise and lower the shade at a touch from virtually anywhere in the home
- Operate shades from a hand-held remote or wall-mounted switch
- Raise and lower automatically using a timer or solar sensor
- Easy access for large or hard-to-reach windows
- Operate multiple shades simultaneously or individually
- Absence of dangling cords means enhanced safety for children and pets
- No cords to detract from window's appearance
- Offers enhanced security with optional automatic switches

Kirsch® Honeycomb Shades offer Somfy radio frequency technology with a single or multiple channel remote option. Radio frequency technology means you do not have to have a clear line of sight in order to operate the shades, unlike infrared technology, which requires a separate satellite eye. In addition, there are no limitations as to how many shades can be assigned to a single channel, and shades can be operated from up to 65 feet away. All Kirsch radio frequency controls are compatible with each other and Kirsch Automated shades. Kirsch offers radio frequency on our Roller Shades and Roman Shades in addition to Honeycomb Shades. Any combination of the below controls can be used together on a grouping of shades.

Add to the price of the shade:	
Battery Powered Radio Frequency Motor	See surcharge beneath each price group (A - I)
Single Channel Remote Control	\$229*
Five Channel Remote Control	\$551**
Single Channel Wall Switch	\$1,288
Five Channel Wall Switch	\$1,425
Automatic Timer	\$1,504

* Remote Control price must be added to base price of shade along with this surcharge

** Add Remote Control price once to the base price of the first shade

Minimums and Maximums	
Min. width	24"
Max. width	144"
Min. Height	6"
Max. Height	144"

NOTE: If width is greater than 108", maximum height is 90".

NOTE: Not available with Cordless, Cordless Top Down/Bottom Up, corded Top Down/Bottom Up or Day/Night.

NOTE: Not available with multiple shades on one headrail.

Ways To Control Your Shades

Individual Control

A single channel remote controls one individual window covering. A five channel remote can control up to five window coverings independently.

Group Control

A single channel remote controls one group of automated window coverings. A five channel remote controls up to five groups of automated window coverings.

Honeycomb Shades

Batteries

Automated shades are powered by a lithium battery pack, and require an additional $\frac{3}{4}$ " mounting depth and a minimum width of 26" for inside mount applications. For outside mount applications, or inside mount applications not meeting the above dimension requirements, the battery may also be mounted externally. A reloadable battery tube allows you to purchase and replace batteries as needed to save time and money. Lithium batteries are available at most retail outlets. The average battery life is between 1-2 years. Battery life does depend on frequency of use and the size and weight of the shade.

Single 12V reloadable battery tube uses 8 AA lithium batteries

Control Options

Manual controls are available in hand-held remote versions or as wall switches. Enjoy the ultimate convenience of Kirsch® Automation by customizing and coordinating your wall switch and remote control options.

Remote Control

Hand-held remote controls provide easy access on a coffee table or night stand and easily move with you from room to room. Kirsch remotes are designed with a hanger pin that allows for easy storage and are available as a single channel and five channel.

One Channel Remote

Use it to control a single shade or a grouping of shades performing the same function up to 65 feet away. Available in white. Uses CR2430 battery (included) with a 4 year battery life.

Five Channel Remote

Control multiple shades independently, in a group setting, or multiple groups of shades from up to 65 feet away. Each channel on the remote will allow shades to function separately from shades programmed to other remote channels. A total of 5 shades can be programmed to individual channels. Available in white. Uses a CR2430 battery (included) with a 4 year battery life.

Favorite (Preferred) MY Position

Program a favorite position that is accessed frequently.

Honeycomb Shades

Control Options

Wall Switches

Enjoy the ease of Automated shades with the convenience of a wall switch. Available in one or five channel, wall switches offer the same function as a remote and attach easily to the wall and run on a long-lasting battery.

One Channel Wall Switch

Provides the same function as a single channel remote with the convenience of a wall switch. Wall switch available in white and is powered by a CR2430 battery (included) so there is no hard wiring required. Battery life is 10 years.

Five Channel Wall Switch

Provides the same function as a five channel remote with the convenience of a wall switch. Multiple channels can be selected to operate simultaneously. The wall switch is available in white and is powered by a CR2430 battery (included) so there is no hard wiring required. Battery life is 10 years.

Timers

One channel Timer switches are available in two models and can be set to open and close all shades on a single channel automatically. Both models feature manual controls to operate independent of the timer or sensor. They attach easily to the wall using the included bracket,

Timer Switch

Provides ultimate control for your Automated shades. The timer can be set to automatically operate shades at a set time each day or at different times every day of the week. A security mode is also available to randomly operate shades, simulating an occupied home while you are away. Available in white. Uses 2 AAA batteries (included).

Placing Your Automated Shade Order

If ordering a single one channel remote, all shades will be programmed to that control and no further channel assignment information is necessary.

If placing an order for multi-channel controls and/or multiple controls to be used with more than one shade, you will need to provide a channel assignment worksheet for each grouping (room) of Automated shades ordered. Without this worksheet, the factory will not be able to program the shades to the customer-designated channels on the controls. See your Automated Blinds and Shades ordering guide for a channel assignment worksheet. Please find worksheet online at www.kirsch.com

Channel assignment and upper and lower limits for shades will be programmed at the factory, and if multiple channels and multiple shades are ordered, the remotes and the corresponding shades will be clearly identified. An intermediate setting (e.g. the shade stopping halfway up/down) can be programmed after installation.

Steps for Ordering Automated Shades

Step 1: Determine which type(s) of control(s) you would like (such as remote, wall switch, or time switch).

Step 2: If ordering multiple controls, specify which one will be the master control. The master control is the primary control used for initial programming and also used to add/remove additional controls.

Step 3: Fax the Channel Assignment worksheet along with the shades order to Kirsch® customer service at 1-800-367- 3092 or email to motorized@kirsch.com. If emailing the form, please include "Channel Assignment Worksheet" in the subject line of the email to ensure quick identification and processing of your order.

Product Summary

Honeycomb Shades

Options

STANDARD BOTTOM UP

Easily raises from the bottom up.
Add cordless for a clean look with no
dangling cords - safe for kids and pets.

NOTE: Skylight pole can be purchased
separately to raise and lower Cordless
shades that are hard to reach.

NOTE: On Cordless, if height is greater than
84", minimum width is 14".

MINIMUMS AND MAXIMUMS		
	CORDED	CORDLESS
Min. width	6"	10"
Max. width	120"	120"
Min. height	6"	6"
Max. height	144"	96"

STANDARD QUANTITY OF CORDS		
	WIDTH	NUMBER OF CORDS
CORDED SINGLE CELL	6" to 60"	2
	60 $\frac{1}{8}$ " to 96"	3
	96 $\frac{1}{8}$ " to 132"	4
	132 $\frac{1}{8}$ " to 120"	5
CORDED DOUBLE CELL	6" to 44"	2
	44 $\frac{1}{8}$ " to 80"	3
	80 $\frac{1}{8}$ " to 116"	4
	116 $\frac{1}{8}$ " to 120"	5

TOP DOWN/BOTTOM UP

Improved Light Control and Privacy.
Raise from the bottom and lower from
the top to control incoming light. Create
the perfect view while maintaining
privacy.

NOTE: On corded, no reverse controls offered.
Left controls lift from bottom; right
controls lower from top.

NOTE: Skylight pole can be purchased
separately to raise and lower Cordless
shades that are hard to reach.

MINIMUMS AND MAXIMUMS		
	CORDED	CORDLESS
Min. width	12"	16"
Max. width	72"	96"
Min. height	6"	6"
Max. height	96"	84"

Day/Night

Two fabrics work together for the
ultimate versatility in light control and
privacy.

NOTE: On corded, left cord raises the entire
shade;
right cord operates the two fabrics.

NOTE: Same fabric on top and bottom not
available.

NOTE: Fabrics must be the same cell size.

MINIMUMS AND MAXIMUMS		
	CORDED	CORDLESS
Min. width	12"	16"
Max. width	72"	96"
Min. height	6"	6"
Max. height	96"	84"

Options

CONTINUOUS CORDLOOP

Perfect for Larger Shades.

The Continuous Cordloop option helps easily raise larger shades evenly while keeping them at exactly the height you want without having to lock or unlock the cord. Simply pull the cord until the shade is at the desired height and the shade stays in place while maintaining the same cord length.

NOTE: If width is less than 30", maximum height is 96".

NOTE: For 2 on 1 headrail, controls will be located on the left side of the left shade, and the right side of the right shade.

NOTE: Not available with Cordless, Top Down/Bottom Up, Day/Night, Angle Top/Bottom or Skylights.

MINIMUMS AND MAXIMUMS	
CONTINUOUS CORDLOOP	
Min. width	18"
Max. width	120"
Min. height	18"
Max. height	144"

CORDLOOP LENGTHS	
SHADE LENGTH	CORDLOOP LENGTH
18" to 48"	2'
48½" to 60"	3'
60½" to 72"	4'
72½" to 96"	6'
96½" to 119½"	8'
120" and above	10'

MULTIPLE SHADES ON ONE HEADRAIL

Multiple Shades Across Rail

Ideal for multiple windows in one frame, providing the clean

NOTE: For standard shades, controls will be located on the left side of the left shade and the right side of the right shade.

NOTE: Not available with Corded Top Down/Bottom Up or Corded Day/Night.

NOTE: For Standard Cordless with multiple shades on one headrail, if height is greater than 84", minimum width is behind 28".

MINIMUMS AND MAXIMUMS		
	CORDED	CORDLESS
Min. width	12"	20"
Max. width	144"	120"
Min. height	6"	6"
Max. height	144"	96"

CONTINUOUS CORDLOOP	
Min. width	36"
Max. width	144"
Min. height	18"
Max. height	144"

CORDLESS TOP DOWN / BOTTOM UP, DAY/NIGHT	
Min. width	32"
Max. width	96"
Min. height	6"
Max. height	84"

COLOR COORDINATED HEADRAIL

STANDARD HEADRAIL

Standard on your Honeycomb Shades, color coordinated components conveniently match with the fabric color to simplify decorating your home.

Cordless headrail shown

SKYLIGHT

You must specify if you want a skylight pole to operate the skylight shade. This is an independent item and must be ordered separately.

Skylight shown

Specialty Shapes

ARCH

Make a template (unless height is exactly $\frac{1}{2}$ width) and indicate the:

- Width and Height at the center of the shade
- Mounting Style: Inside or Outside

MINIMUMS AND MAXIMUMS

Min. width	12"
Max. width	84"
Min. height	$\frac{1}{4}$ of width or 6", whichever is larger
Max. height	$\frac{1}{2}$ of width or 42", whichever is smaller

NOTE: Stationary (non-functioning).

HALF ARCH

Make a template and indicate the:

- Width and Height
- Mounting Style: Inside or Outside

MINIMUMS AND MAXIMUMS

Min. width	6"
Max. width	42"
Min. height	$\frac{1}{4}$ of width or 6", whichever is larger
Max. height	Same as width or 42", whichever is smaller

NOTE: Stationary (non-functioning).

CIRCLE

Make a template and indicate the:

- Width and Height on the outermost parts of the shade
- Mounting Style: Inside only

MINIMUMS AND MAXIMUMS

Min. diameter	12"
Max. diameter	42"

NOTE: Stationary (non-functioning).

OCTAGON

Provide a template with a diagram.

MINIMUMS AND MAXIMUMS

Min. width	15"
Max. width	48"
Min. height	15"
Max. height	48"

NOTE: Shade will raise and lower, but does not have a functioning cordlock. A cord cleat will be sent with order.

SKYLIGHT

Available with an inside mount only:
Measure this shade as you would an inside mount shade.

NOTE: This is a corded product.

MINIMUMS AND MAXIMUMS

Min. width	12"
Max. width	96"
Min. height	6"
Max. height	96"
Max. angle	30°

NOTE: Skylight Pole must be ordered separately.

FANNED ANGLE

Give the following dimensions:

- Straight Width
- Angle Width
- Right Height
- Left Height
- Mounting Style: Inside or Outside
- Control Side: Right or Left

MINIMUMS AND MAXIMUMS

Min. width	12"
Max. straight width	72"
Max. angle width	84"
Min. height	6"
Max. height	96"
Max. angle	45°

NOTE: Shade will raise until angle begins and lower, but does not have a functioning cordlock. A cord cleat will be sent with order.

Specialty Shapes

HEXAGON

Provide a template with a diagram.

MINIMUMS AND MAXIMUMS	
Min. width	12"
Max. width	48"
Min. height	12"
Max. height	48"

NOTE: Shade will raise and lower, but does not have a functioning cordlock. A cord cleat will be sent with order.

CUTOUT

Honeycomb Shades are ideal for windows with an obstacle, such as an air conditioner. Side cuts are available at the bottom only. Available on Standard Corded Bottom Up and Continuous Cordloop shades.

Measure the following:

- The overall width of the shade
- The right height of the shade
- The left height of the shade
- The width of the obstacle

MINIMUMS AND MAXIMUMS	
Min. width	12"
Max. width	144"
Min. height	6"
Max. height	96"

NOTE: Allow $\frac{1}{4}$ " clearance for the obstacle. The overall width of the obstacle plus the obstacle offset must equal the overall width. Maximum of two cutouts per shade.

How to Make a Template

NOTE: Template will not be returned upon completion of product. Kirsch® holds the template for 6 months and then destroys them.

YOU WILL NEED:

- Clean, white paper
- Non-abrasive tape
- Pencil
- Metal measuring tape
- Mailing tube
- Scissors

STEP 1

Completely cover the window opening or area to be covered with clean white paper and tape into place.

Template must be one solid piece of paper.

DO NOT USE NEWSPAPER, PLASTIC, OR CARDBOARD.

STEP 2

Mark the room side of the template "FACE".

STEP 3

Draw the outline of the window opening in with a pencil.

STEP 4

For inside mount shades, cut out the template along the penciled line.

For outside mount shades, add the desired overlap to the penciled guideline and draw in

a new guideline. Cut the template along this new guideline.

STEP 5

Draw a diagram of the window area on the face of the template, denoting maximum width and height.

STEP 6

Send in the cut portion of the template. For best results, roll, do not fold, the template for shipment and place in mailing tube.

Please send template to:

Kirsch Window Fashions
Attention: Template OE
4110 Premier Drive
Hight Point, NC 27265

Be sure to include your name, store name and purchase order number on the template.

Specialty shapes subject to longer lead times.

Troubleshooting Tips

Corded Honeycomb Shades

PROBLEM	SOLUTIONS
Controls too long	Untie the upper knot from the thinner cord that feeds into the stop ball. Push the stop ball up to the desired location and tie the knot again. Before cutting off excess cording, please lower the shade to ensure that the length of the shade and the controls are satisfactory.
Cordlock inoperable	Contact place of purchase for an authorized repair.
Hangs unevenly	Push stop ball up to expose knot of two cords coming into the top of the stop ball. Adjust cording by pulling on the cord that controls the side of the shade that is hanging lower. Once shade is even, tie both cords in a knot as close to the original knot as possible. Trim any excess. Slide the stop ball back into place.

Cordless Honeycomb Shades

PROBLEM	SOLUTIONS
Creeping or sagging  Friction Clip #HMSP0010	If you notice your shade is creeping up from the bottom or sagging from the top, contact Customer Service to receive friction clips and instructions to install into the spring motor.
Hangs unevenly	In some instances, the cords in your Cordless shade can become entangled. This problem can typically be solved by pulling the shade down completely. This will usually realign the cords. PREVENTION TIP: Always lift your shade from the middle rather than the sides, and do not lift too quickly, as this creates slack in the cords.
Does not operate smoothly	Look inside the headrail at the spring motor and check for friction clips. Remove 1 and/or all of the friction clips and check for improved operation.
Will not lift	Gently pull down on the bottomrail and then lift to reactivate the spring in the motor. TIP: Anytime you leave your shades in the closed position for an extended period of time, the spring will need to be reset in order to function properly.

Continuous Cordloop Honeycomb Shades

PROBLEM	SOLUTIONS
Frayed cordloop	Call Customer Service to order a new cord. Remove control end cap by lifting the tab on the top of the headrail that locks the cap into place. The cap should then easily pop off. Remove frayed cordloop by gently lifting the cord and turning the mechanism (TIP: a screwdriver inserted into the center of the mechanism allows for easy rotation). Start new cordloop into the pulley by placing the cord into one of the teeth of the gear. Rotate the cordloop into place. Replace control cap.

Terms and Conditions

Order Processing

Telephone Orders

Verbal orders are accepted as the dealer's responsibility. Each order will be repeated back by the Customer Service Representative. In certain instances, we may require written orders.

Duplicated Orders

All orders are confirmed after entry into our system. Customer Service is not responsible for duplicate orders caused by a written order following a telephone order or duplicate faxes.

Changes and Cancellations

All products are custom-made to your specifications under tight deadlines. Once production has begun on your order, changes and cancellations cannot be made.

Contract Orders

All Contract Orders must be processed through Contract Customer Service at 1-800-826-8021.

Freight

- Shipments outside the continental U.S. are subject to freight charges.
- Chargeable parts and returns for repair are subject to freight charges.

Pricing and Terms

All prices are subject to change without notice. Until credit is approved, terms are Cash With Order. Standard terms are Net 30 days from invoice date.

Claims and Returns

Defective Merchandise

All manufacturing defects must be reported to Customer Service within 30 days of receipt of shades. We may require the return of defective shades prior to repair or replacement.

Incorrect Merchandise

If any part of your shipment was made incorrectly, please advise Customer Service within 30 days. A replacement will be made at no charge if the problem was due to Kirsch® error. If the problem was due to dealer or customer error, the original order and replacement order will be full charge.

Returns for Repair

Prior to return for repair, contact Customer Service. We will request the order number, date, purchase order number, and type of product. Arrangements for return will be made at that time with directions as to how the shades should be returned. The package should be marked for easy identification both inside and outside, and should contain a written confirmation of the verbal repair instructions. Repairs should be packaged carefully. Product that has been mishandled or received in poor condition will be returned to the customer.

Chargebacks for unauthorized repairs or additional installation cannot be honored. All returns for repair are subject to freight charges.

Returns for Credit

Returns can be accepted only if prior authorization has been obtained from Customer Service. Authorization will include instructions as to how the merchandise should be returned. Unauthorized returns will be refused.

Freight Damage FedEx/FedEx Ground:

- If freight damage is visible, refuse the shipment. FedEx will inspect the damage and return to the shipping location. Contact Customer Service for further information.
- If freight damage is concealed, retain all packaging materials and contact Customer Service immediately (must be notified within 14 days).

Freight Damage Common Carrier:

- If freight damage is visible, refuse the shipment. The carrier will return the merchandise to the shipping location for inspection. Contact Customer Service for further information.
- If freight damage is concealed, retain all packaging materials and contact Customer Service immediately (must be notified within 14 days).

At Kirsch, we're committed to making products and relationships that last. That's why we offer a product with a complete warranty and a no-risk exchange policy.

No Risk Exchange Policy

Whether you mis-measured or simply changed your mind, if you don't love your custom Kirsch for any reason, we'll exchange it within 30 days of receipt.

Full 10-year Warranty

Your investment will last. If any part of your custom Kirsch breaks or is damaged due to poor workmanship or defect within 10 years of purchase, we'll repair or replace it free of charge.
