

## Accessing Qmlativ on a Mobile Device

You may use a mobile device to access Qmlativ in two ways, either through your device's web browser or by downloading the mobile app. The following documentation provides information on both options.

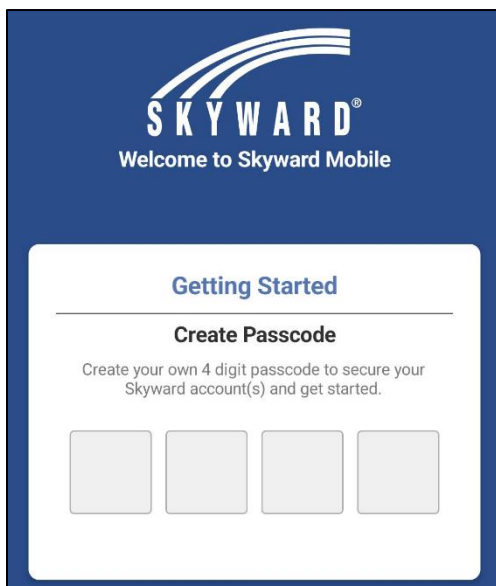

### Setting Up and Using the Mobile App

You may use the Skyward Mobile Access app to login to a condensed version of Qmlativ. The app is available for free download on Android and iOS devices. Once you have installed the application on your device, you can launch it to begin the setup process.

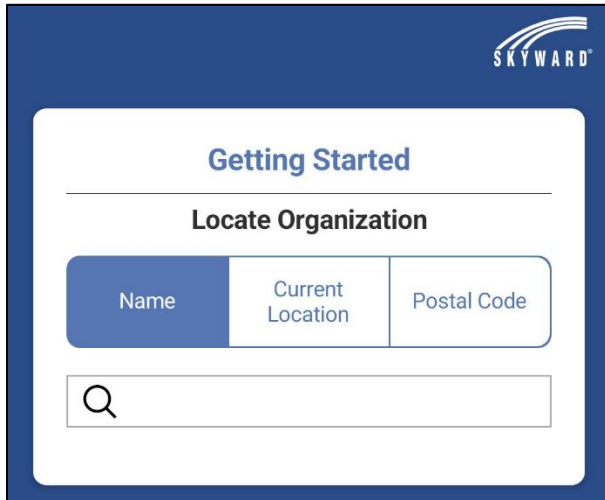

1. Navigate to your application store to install the Skyward Mobile Access app for Android or iOS.

2. Launch the Skyward Mobile Access App. You will be prompted to create a 4-digit code. Once setup is completed, this code will be used each time to access the app.

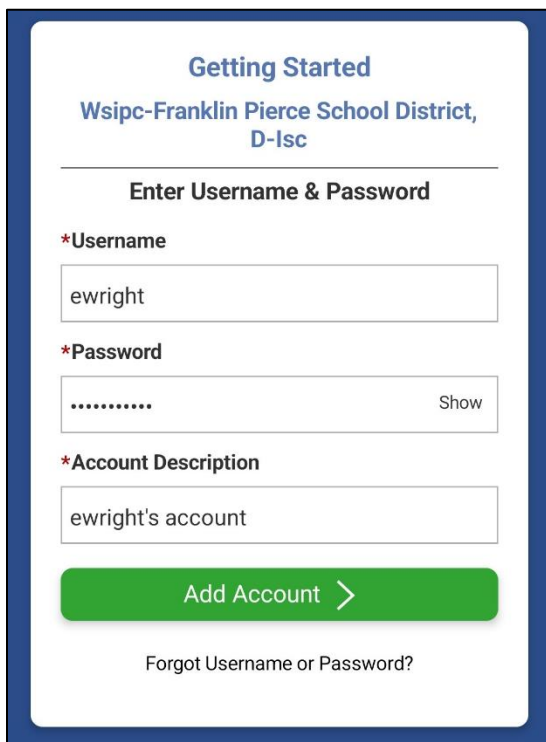

- Next, you'll want to search to locate Franklin Pierce School District. You can search using name, current location, or postal code. The Current Location option will not show Franklin Pierce School District if you are outside of a 50-mile radius while setting up the app.

If you search using district name, you can enter text to limit the results you see.

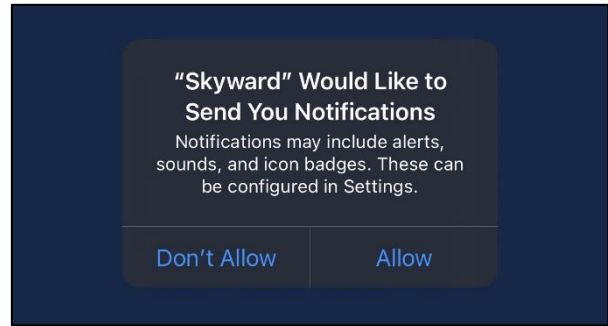

- In the search bar, enter Franklin Pierce School District. Depending on your device, you may need to tap Enter to load your search results. Select your district's name, which appears as Wsipc-Franklin Pierce School District, D-IsC Tacoma, WA.
- The final step to setting up the Mobile Access app for use is to Enter Username & Password. Your mobile account credentials match the username and password you use to sign in on the desktop version. The Account Description field will auto populate with your username as shown below but can be edited to easily identify your account. While not applicable to most district users, this can be helpful if you have set up multiple accounts for different portals. Finally, click Add Account.

## Enabling Notifications

Once you've completed your account setup, you'll be prompted by your mobile device to allow notifications.

The screenshot below is an iOS example, but exact message may vary depending on your device. Selecting Don't Allow or Allow notifications is user preference.

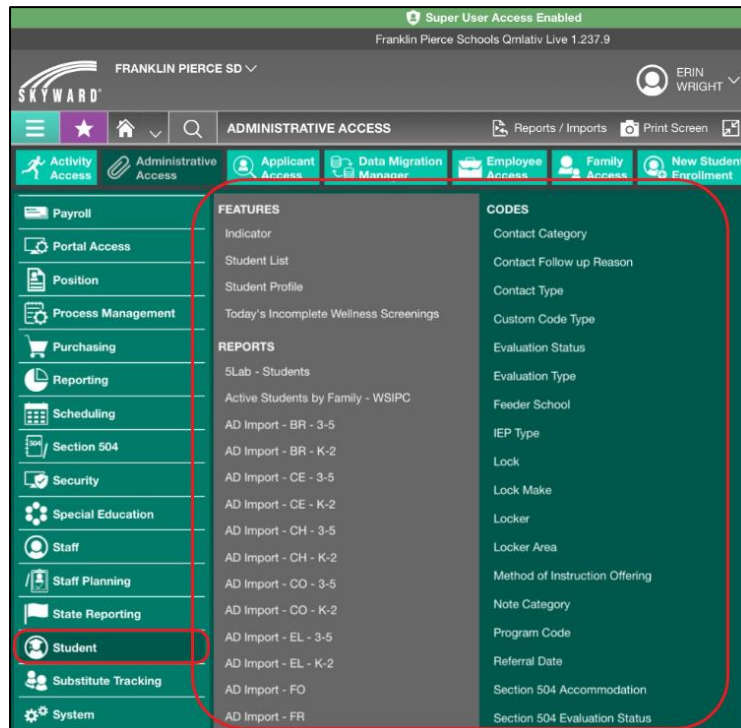

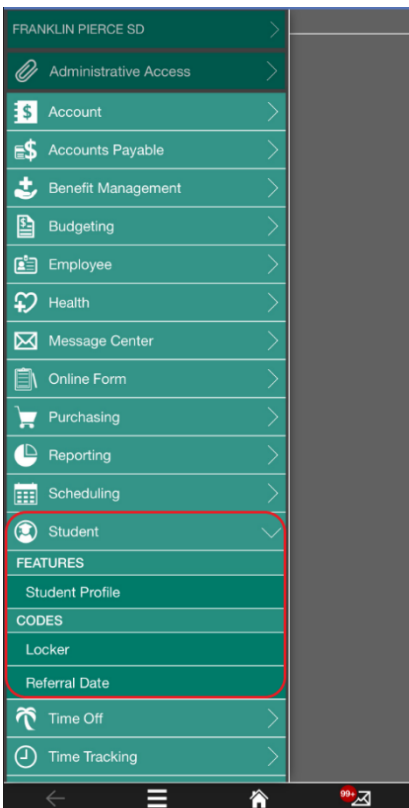

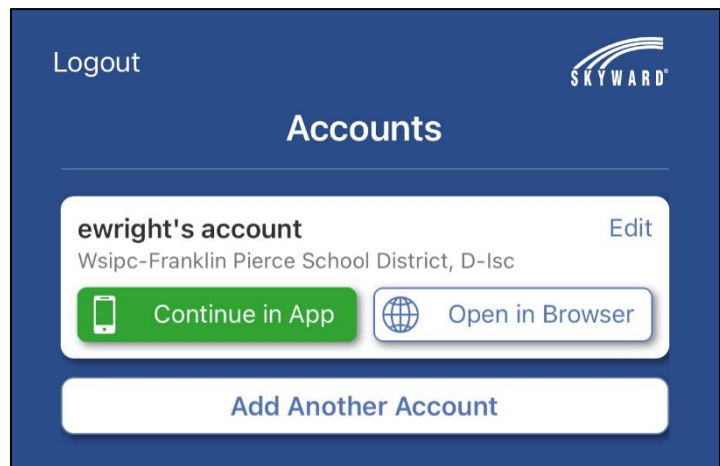

## Using the App or Browser

After making a notification choice, you can choose to continue in App to access the condensed, mobile-enhanced Qmlativ experience. You may select Open in Browser for a full Qmlativ experience as if using the desktop version.

If using your web browser, you'll want to use your browser's zoom settings as the font will initially appear quite small. Your menu and feature options are driven by your regular Qmlativ security.

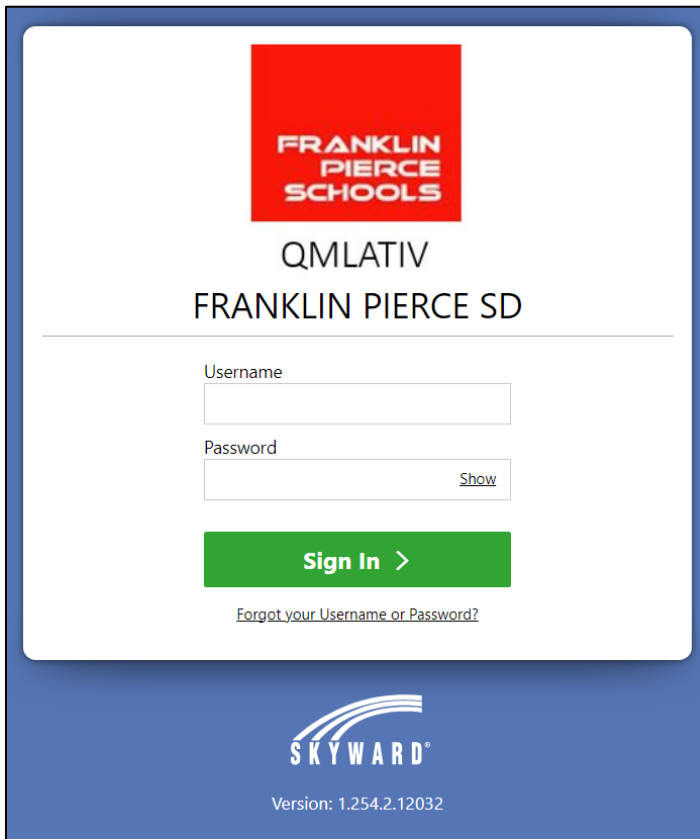

You may not have access to the options shown in the images below which provide an example of App vs. Browser view using the Student module.

## Using Mobile Device Web Browser

The full Qmlativ experience can be accessed using your mobile device's web browser.

1. Navigate to the Qmlativ login page. You can access this using the Qmlativ app in DORA or by going to <https://www.q.wa-k12.net/frankISTS>.

FRANKLIN

SKYWARD®  
Version: 1.254.2.12032

2. Enter in your Username and Password. Your credentials match the username and password you use to sign in on the desktop version. Click Sign In.
3. You are now logged in on your mobile device and can access all of your menu options within Qmlativ!

### Need Assistance?

For technical assistance with Qmlativ or installing the application on district devices, please contact the IT Help Desk or submit an IT Work Order by emailing [itworkorder@fpschools.org](mailto:itworkorder@fpschools.org) or using the IT Work Order app in the Staff Technology Resources folder in DORA.
