

Cute Owl

Recommended for Grades K-2

From: <https://www.deepspacesparkle.com/cute-owl-draw-paint-along-with-patty/>

Lesson plan published by Patty Palmer, CEO and founder of Deep Space Sparkle.

Summary:

Students will learn steps to draw cute owls and add details and decorations with lines, shapes, colors, and patterns.

Learning Target:

I can identify and create the art elements line, shape, and color.

I can identify and create patterns, rhythm, and movement in my artwork.

Materials:

You can use any of the following materials depending on what's available at you house:

Paper, pencils, colored pencils, crayons, markers, paint

Directions:

1. If you have access to the internet, click on the link above and you can follow along the step by step instruction.
2. Use the drawing guide to see the shapes and features that you can add to your own owl.
3. Begin with two circles for the eyes on the top portion of the paper. Add a triangle for the nose. Create a border around the eyes and connects to the nose. From there, add the head, wings, and body along with the webbed feet.
4. Have fun adding many different lines, shapes, and colors to the owl. Create movement, rhythm, and patterns with the elements.
5. Always have your child sign their artwork and provide an opportunity to review the learning targets by discussing their finished product and/or displaying artwork and having a family "critique" to complement the work.
