

TITLE: Non-Objective Drawing

Recommended for Grades K-2 but can be adapted for older grades

From: <https://video.link/w/ASrud>

Short Description:

Students use a variety of shapes (geometric) and lines to create a non-objective drawing.

What is Non-Objective Art?

Non-Objective art is a type of abstract art where the artist doesn't draw or paint things from real life but uses a focus on lines, shapes and colors.

Artists known for their Non-Objective Art:

- Wassily Kandinsky
- Moris Louis
- Piet Mondrian
- Robert Delaunay
- Sonja Delaunay-Terk

Some Examples of Non-Objective Art:

Circular Forms by Robert Delaunay

On White II, by Wassily Kandinsky

Cible by Sonia Delaunay-Terk

Non-Objective Project

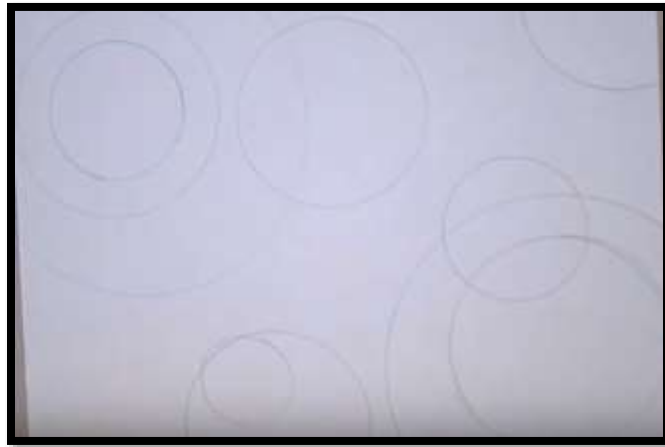

Supplies You'll Need:

- Paper (any size)
- Pencil
- Black crayon or colored pencil or marker or paint
- Crayons
- Objects around the house – pick a geometric shape

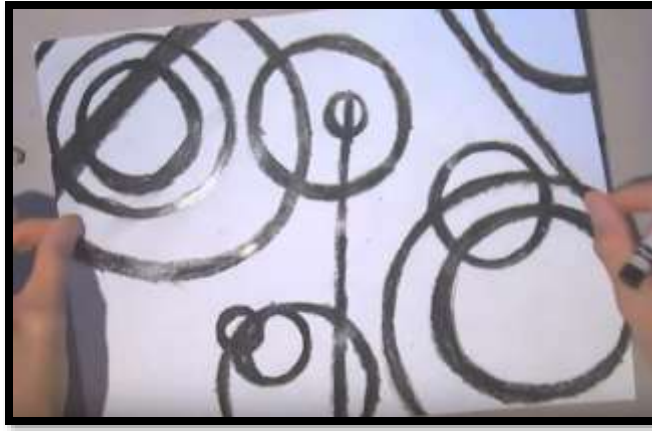

Directions:

This enrichment has several steps but each one is learning and practicing art. **You can view the YouTube video on the directions – there, you can pause or repeat as many times as needed.**

- 1) Start finding circle (or any shaped) objects around your home. Make sure they are various sizes.
- 2) Starting with the larger circles start tracing them around your paper. They can go off the page.
- 3) Continue tracing the objects scattered around the paper. You can overlap shapes, too.

- 4) Once you have a pretty full composition, you can find straight objects like a ruler or the edge of a box or book and make a few straight lines. Make sure the lines touch either a circle or the edge of the paper.
- 5) Trace ALL pencils lines with black marker, crayon, colored pencil or paint.
- 6) Go back over all lines until they are **BOLD**.

- 7) Now, pick a space on your paper and fill it in slowly with one type of line. Repeat until you have about 3-5 spaces filled with lines. (Wavy, zig zag, straight, curved – or make up one on your own!)

- 8) Color in the remaining shapes carefully. For this you can use a color scheme. A color scheme is a group of colors that have something in common. Examples are: a) primary colors b) secondary colors c) neutral colors d) warm colors e) cool colors. You can scan and share your final picture with your art teacher!
