

Pattern Eggs

Recommended for Grades K-2

From: <https://www.deepspacesparkle.com/watercolor-easter-eggs/>

Lesson plan published by Patty Palmer, CEO and founder of Deep Space Sparkle.

Summary:

Students review and create patterns using line and shape inside oval shaped eggs. If you prefer to use another shape to fill with patterns, feel free to improvise.

Learning Target:

I can identify and create the art elements line and shape.

I can identify and create patterns in my artwork.

Materials:

You can use any of the following materials depending on what's available at you house:

Pencils, colored pencils, crayons, markers, watercolor paint, scissors, glue

Directions:

1. Create an oval shaped template that your child can use to create egg shapes on their paper. Cut out the template and have students trace as many egg shapes on their paper as they choose.
2. If you are using paint, have your child paint inside of each of the oval shapes and then let dry.
