

InstructionSeizure Safe Schools

Each school building will have a “seizure action plan” if the following criteria are met: (1) at least one student in that building has been identified as having a seizure disorder; and (2) that student’s parent or guardian and health care provider have worked with the school to develop a seizure action plan.

Every building with a seizure action plan will have at least one employee who has met the training requirements necessary to administer or assist with the self-administration of a seizure rescue medication or medication prescribed to treat seizure disorder symptoms.

In accordance with state law, except in the case of an emergency, prior to the administration of a seizure rescue medication or medication prescribed to treat seizure disorder symptoms by a school employee, a student's parent or guardian must:

1. Provide the school with a written authorization to administer the medication at school;
2. Provide a written statement from the student's health care practitioner containing the following information:
 - a. The student's name;
 - b. The name and purpose of the medication;
 - c. The prescribed dosage;
 - d. The route of administration;
 - e. The frequency that the medication may be administered; and
 - f. The circumstances under which the medication may be administered.
3. Provide the medication to the school in its unopened, sealed package with the intact label affixed by the dispensing pharmacy; and
4. Collaborate with school employees to create a seizure action plan.

If permitted by the student's seizure action plan, a student shall be allowed to possess the supplies, equipment, and medication necessary to treat a seizure disorder in accordance with such seizure action plan.

Any authorization provided by a parent or guardian shall be effective only for the school year in which it is provided and shall be renewed each following school year.
