

# HOME IMPROVEMENT COURSES

## Do-It-Yourself HVAC

Do you heat your home in the winter? How about cool it in the summer? Everybody has the need for a heating system in their home. Most people, in this day-and-age have a cooling system.

Come and learn the basics of your system – how it works, how efficient it is, how you can save on your home energy bills, what are the government regulations and standards, learn how best for you to maintain your system.

Whether you want to do your own maintenance or just want to talk intelligently with your service technician, this class is for you.

Spring classes emphasize cooling systems, fall classes emphasize heating systems.
