What is TutorMe?

TutorMe partners with schools to provide **on-demand online tutoring** to students across all grade levels, when and where they need it the most. We connect students with high-quality, **one-on-one tutoring** tailored to their unique learning style.

Who can access TutorMe?

- Any student in grades 6-12
- Anytime
- Via Clever
- All subjects

Objective

In this training you will learn how to use TutorMe to support and supplement student learning.

Overview and features

What is TutorMe?

The screenshot displays the TutorMe 'Lesson Space: Whiteboard' interface. The top navigation bar includes options like Whiteboard, Calculator, Text Editor, Code Editor, Google Docs, and File Sharing. The main whiteboard area contains a math problem: '2) On Wednesday, April worked at a bookstore for $6\frac{3}{4}$ hours. She worked $2\frac{1}{4}$ hours less on Tuesday. Write an **expression** to find the number of hours she worked on Tuesday.' Below the problem, a text box contains the example: 'Expression- Example- $1\frac{5}{12} + 1\frac{6}{12}$ OR $1\frac{5}{12} - 1\frac{5}{12}$ '. The right sidebar features a video feed of a tutor, a chat window with a student's message about needing help with math, and a timestamp of 'MAY 9TH, 3:05PM'. The bottom status bar shows a timer at 9:32 and various control icons.

The TutorMe RAISE Approach

Translates learning science into clear best practices tutors can apply.

Questioning & Feedback

Rapport-building

- Greet the student warmly by name
- Encourage the student to share what they need help with
- Meet the student in their preferred mode of communication
- State a goal for the session

Assess prior knowledge

- Give the student an opportunity to attempt the problem
- Use self-assessment or performance-based questions
- Push through "I don't know" answers, refocusing on what they do know

Individualize instruction

- Ask questions that help the student articulate his/her thought process
- Provide hints and supports where needed, or breakdown problems
- Demonstrate alternative ways of solving if the student is struggling

Summarize learning

- Ask the student to recap the steps you took to solve the problem
- Have the student solve an analogous problem to demonstrate mastery
- Ask a metacognition question to assess student confidence

Encouragement

- Give process praise for seeking help via TutorMe
- Revisit the goal you set and share feedback on the student's progress
- Recommend when the student should return to tutoring next

Tutors

TutorMe's community of tutors

The TutorMe platform

Tutors

The student will be able to view the tutors and can view tutor profiles to learn more about the tutor.

The screenshot displays the TutorMe interface for finding tutors. The top navigation bar includes the TutorMe logo, a 'Browse tutors' link, and user options like Help, a notification bell, a chat icon, and a profile for 'Will H.'. The main header shows the breadcrumb 'Browse tutors / Physical Sciences / Basic Chemistry' and the title 'Basic Chemistry tutors'. On the left, a 'Filter by:' sidebar allows filtering by curriculum area (Basic Chemistry is selected), tutoring language (Hmong, Spanish, Vietnamese), availability (Online now is selected), and familiarity (Tutors I've worked with before is selected). The main area lists three tutors: Sean M., Skylar T., and Gerald L., each with a profile picture, a 'View profile' button, and details about their background and subject areas. A fourth tutor, Ravendra H., is partially visible at the bottom. A 'Recent tutors' dropdown is in the bottom right corner.

Message Sean

About Sean

Grew up... in South Boston in a working-class family. Despite his humble beginnings Sean proved himself to be academically gifted, and was eventually accepted to Harvard University where he studied psychology.

Challenge... helping Will Hunting overcome his bevy of psychological issues. Will is undeniably brilliant and capable of accomplishing great things. However, Will seems to resent the pressure that accompanies these expectations, preferring to push people and opportunities away so he can continue to live his stagnant life. If Sean can make a real connection with Will, he'll be doing a service to Will, himself, and the world at large – providing it with a rare, bonafide genius.

Personality... funny, jovial, honest, and intelligent. Sean might not be able to instantly solve a mathematical theorem like Will, but he possesses a quiet wisdom that comes from a lifetime of trying to understand people and their problems. His greatest gift as a psychologist and person is his ability to pass on his romantic worldview to the people around him.

Teaching experience

Profession... a professor of psychology and part-time counselor at Bunker Hill Community College. Sean is a talented teacher and counselor but has to deal with the fact that many of his former classmates think he's wasting his potential. Still, Sean has never been one to bow to others' opinions, and finds meaning in his relatively unglamorous work. While Sean has worked with many troublesome clients over the years, he may have found his most difficult client ever in the brilliant and combative Will Hunting.

How do students get on-demand tutoring help?

Accessing TutorMe

Students click on the TutorMe logo in their Learning Management System (LMS), or through the login page on tutorme.com

Students can connect with a tutor by clicking 'Request a Live Tutor' & selecting a subject area.

The screenshot displays the TutorMe website interface. At the top, a dark blue navigation bar contains the TutorMe logo, a 'Browse tutors' link, and icons for help, notifications, and a user profile. Below the navigation bar, the main content area is divided into several sections. The first section, titled 'What can a tutor help you with today?', features a green 'Request a live tutor' button and a white 'Submit your writing assignment' button. Below these buttons, a small text line reads 'Tutoring provided to you through Holdrum Middle School'. To the right of the buttons is a large circular image of a student wearing a headset and writing on a notepad. The second section, titled 'How to request a live tutor', is set against a dark green background and contains three numbered steps: 1. Request (Choose a subject and tell us what you need help with), 2. Learn (Once matched with a tutor, you'll enter the Lesson Space), and 3. Retain (After the tutoring session is completed, you can find it in your past sessions). The third section, titled 'Browse tutors in the subjects you need most', displays a grid of subject-specific tutor cards. Each card includes an icon, a title, and a list of subjects included. The subjects listed are: Math (Basic Math, Geometry, Algebra, Statistics, Trigonometry, Calculus, and more), English Language Arts (English, Literature, Writing, ESL, ACT/SAT Writing), Science (Physics, Physical Science, Natural Sciences, Earth Science, Chemistry, Biology, and more), Social Studies (US History, World History, African History, Art History, US Government & Civics, and more), Spanish (Composition and grammar, vocabulary, and comprehension), and Computer Science (Computer Science, Programming in C, C++, Java, Python). A green 'Browse all tutors' button is located at the bottom of the grid. The footer of the page includes a 'Recent tutors' link.

Tutoring provided to you through Holdrum Middle School

How to request a live tutor

- 1. Request**
Choose a subject and tell us what you need help with. Our matching system will find you a tutor within a few minutes. Besides this instant connection, you can also browse through our list of tutors.
- 2. Learn**
Once matched with a tutor, you'll enter the Lesson Space where you'll get live, 1-on-1 help from your tutor. You can use the virtual whiteboard, audio and/or video, text chat, screen sharing, and many other tools to work together.
- 3. Retain**
After the tutoring session is completed, you can find it in your past sessions. All sessions are stored there, so you can easily refer back to what you've learned, practice more, or study for a test.

We found you an expert in Calculus!

Abigail S.
Expert Tutor in many subjects! (I also speak Spanish)

 **About Abigail**

Hi, my name is Abigail. I live in Los Angeles, and have been a private tutor for over ten years. I graduated from Stanford in 2008.

 **Teaching Experience**

During my time in school, I was a peer tutor. I logged over 500 hours of tutoring, working with students in the Student Success Center, while also working with my private clients. I am bilingual and can help students with any of my qualified subjects in Spanish and English.

 **Education**

Stanford University
Business, Bachelor's Degree
2004 - 2008

|---|---|
| <p>3</p> <p>Identification of the global issues.</p> <p>The world population should be concerned about global warming. But, what are the causes? We will need to understand what climate change is in this case. We don't need scientists to realize decades ago that the weather is no longer the same overpopulation, greenhouse gas, pollution by humans and industry of the water, our foods, and the atmosphere have become polluted. We explain more the idea we cited overpopulation has a dilemma from the author who says "International business can adapt the risk because of every time" (Sower, 2020, 37) he means. For example, urbanization of the cities for construction is related to the destruction of the environment to build houses. Also, each household might have one or two cars that use gas, which exposes the ecosystem to excess carbon. Different groups are affected by the issue; for example, international businesses such as restaurants, hotels, airlines, and retail sales. There are multiple causes of the problem of global warming.</p> <p>The most common is the industries that release gas causing air pollution. First, it is</p> | <p>TutorMe Tutor Only indent once.</p> <p>TutorMe Tutor This is a good place to use a semicolon.</p> <p>TutorMe Tutor Try to keep things in past/past perfect tense for APA; said, had said</p> <p>TutorMe Tutor Don't forget a space after the comma.</p> <p>TutorMe Tutor Review fragment.</p> |
