

The Neighboring Academy was invited to tour a local business in Highspire on November 8, 2023. Lucknow Highspire Terminals, LLC gave the Academy a tour and the opportunity to learn about a local company. The students learned that a large percentage of heating oil and other fuels are distributed to local distribution companies throughout Pennsylvania via eleven terminals, including the facility in Highspire.

The LHT staff walked the students through the terminal yard and facility, explaining how the terminal supports the local fuel industry. We also learned of numerous job opportunities that are available locally, and many only require a High School Diploma. Steelton-Highspire High School and the Neighboring Academy will continue to develop our relationship with LHT.
