SUMMER 2024

**PEDAGOGIES IN AUTHENTIC DESIGN FOR DEEPER LEARNING EXPERIENCES
(PADDLE): AI-POWERED DEEPER LEARNING
JULY 15 - 18, 8:00 AM - 12:00 PM **ONLINE****

Kupu Hou Academy at Mid-Pacific is pleased to offer a virtual version of our annual summer teacher professional development program. This course will encourage pedagogical innovation, equipping teachers with the skills needed to integrate the use of generative Artificial Intelligence (AI) into their courses through a student-centered approach. This course will provide an emphasis on Project Based Learning (PBL), Deeper Learning Practices (DLP) and Universal Design for Learning (UDL). A cohort model will be used to better meet the identified level and individual needs of each participant.

The course will emphasize connections between effective instructional design and specific learning outcomes, while also demonstrating the Elements of Quality Professional Development. Participants will design lessons and student projects that empower students to use leading-edge AI, while applying the guiding principles of DLP and UDL. Our work together will include students designing and receiving feedback on their own work so that it will be ready to implement in their classrooms.

The end product will be an engaging AI-charged project or inquiry-based process ready to be implemented in the coming school year. *Participants must receive prior approval from their principal or supervising administrator to use this course for reclassification.*

Cost: \$600

Registration is limited to 50 participants.
