All students entering grades 9 through 12 will enter course requests for elective courses online using the Infinite Campus Portal.

All core courses (math, science, social studies, and language arts/English) will be recommended and scheduled for students by teachers and/or administrative staff based on grade level requirements and a student's academic achievement. These recommended courses can be revised and/or changed:

- after the initial draft of a student's schedule is received via the mail in July or August
- only through an appointment with the student's assigned guidance counselor

General Information

AIR FORCE JUNIOR ROTC

AFJROTC is open to all students. The program consists of up to four years of classroom instruction in Aerospace Science, leadership education, physical wellness, and drill and ceremony. Students are required to wear the uniform on a designated day of each week and conform to grooming and ROTC standards. Uniforms are supplied by the Air Force with no cost to the students.

ALTERNATE COURSE SELECTIONS

Each student can identify alternate elective courses in the event that scheduling conflicts make the original elective choices impossible to schedule. Students can select these alternate courses when registering through Infinite Campus.

ARTICULATION AGREEMENT

An articulation agreement is a contract between McDowell High School and a post-secondary institution that assures that the curricula of the two institutions are coordinated. This helps eliminate situations in which students are inadequately prepared for the courses they will experience in the post-secondary institution.

Although agreements vary, the articulation usually insures that a student, who has successfully completed the required sequence of courses, one or more of the following: 1) admission, 2) advanced standing, and 3) credit waived. For specifics, see your counselor.

CLASS RANK PERCENTILE

The course multiplier value for each course is multiplied by the final grade point value. The total of these products is then divided by the total credits attempted. The value obtained is a total weighted point value from which class rank is calculated. An unweighted point average (GPA) is calculated based on a four (4) point scale. Weighted and unweighted GPA and weighted <u>class rank percentile</u> shall be entered on student records and on all transcripts where they will be available for the review by authorized persons.

COMMENCEMENT HONORS FOR SENIORS

The Latin Laude model will be used to recognize students' academic excellence at the conclusion of their high school career. A student's final cumulative GPA (weighted) will be used to determine the level of honor on the student's high school transcript and diploma and for academic recognition at commencement exercises. The three levels of academic honors are: Summa Cum Laude: "With Highest Distinction" - cumulative GPA average of 4.2 and above; Magna Cum Laude: "With Great Distinction" - cumulative GPA average of 3.850 to 4.199; and Cum Laude: "With Distinction" - cumulative GPA average of 3.410 to 3.849.

COMMUNITY SERVICE

This option is designed to provide students an opportunity to give something back to the community through voluntary service while at the same time registering this good work in their permanent record and transcript. The experience will help students acquire skills useful throughout life and learn about the significance of rendering aid to our community. Students who complete 60 hours of community service will receive 1/4 credit. Community service may begin at the completion of 8th grade. <u>The credit does not count toward the graduation requirements</u>.

COURSE (SCHEDULE) CHANGES

Course schedule changes must have counselor or administrator approval. <u>Course schedule changes are available prior to the beginning of the school year. It is strongly recommended students make changes at this time. Student requests to change teachers will not be considered. No changes will be considered after the first week of the course. During the year a student may be withdrawn from a course for disciplinary reasons or at administrator discretion with a grade of WF.</u>

COURSE LEVELS

Academic - Academic courses provide a challenging curriculum that prepares all students for college, career, or other post-high school training. Real life and hands-on experiences are emphasized, in addition to standard academic skills.

Academic courses have a course multiplier value = 1.0.

Honors - Honors courses are upper-level college preparatory courses. The content of these courses is more demanding than academic courses.

Honors courses have a course multiplier value = 1.10.

Advanced Placement® (AP®) - Advanced Placement® courses are introductory college-level courses teaching curricula specified by the Advanced Placement® Program of the College Board. It is an excellent opportunity for the ablest sophomores, juniors and seniors to pursue college-level studies and receive advanced placement®, credit, or both, in college, by achieving a specified score on an AP® Exam given in May. The fee for each Advanced Placement® exam is set by the College Board each year. The fee is typically under \$100.00.

Students develop content mastery and critical thinking skills expected of college students through rigorous AP® courses. Students who enroll in AP® courses do so because they are motivated to challenge themselves beyond an honors level course. A key component of the AP® program is the AP® Exam. Students who participate in an AP® course will be required to take the AP® Exam for that course. Any student who is not committed to taking the AP® Exam should enroll in the honors level of the course. A deposit/payment may be required at the beginning of the academic year to ensure AP® Exam participation.

Advanced Placement® courses have a course multiplier value = 1.20.

General Information

Advanced Placement® Courses

| <u>Course</u> | <u>Credit</u> |
|--|---|
| Biology Calculus AB—Semester Calculus AB—Yearlong Calculus BC Chemistry Comparative Government & Politics Computer Science A Computer Science Principles English Language and Composition 11 English Literature and Composition 12 English Literature and Composition 12 Human Geography Human Geography Macroeconomics Physics 1 Physics C-Mechanics | 2.0 1.0 1.0 1.0 1.0 1.0 1.0 1.0 1 |

| | |

*See AP® Course Map on Page 15

COURSE MULTIPLIER VALUES

Course multiplier values are used to calculate a total weighted percentage for the purpose of class ranking. The multiplier values are as follows: Advanced Placement® Courses = 1.20, Honors Courses = 1.10, and Academic Courses = 1.0.

COURSE PREREQUISITES

Some courses have prerequisites that must have been satisfactorily completed prior to enrollment. Those courses and their prerequisites are listed in the Course Description section on Infinite Campus.

COURSE REQUEST SUMMARY

Every student will be asked to print a completed Course Request Summary sheet once all required, requested and alternate courses sections have been entered. <u>Required Course Section:</u> core course teachers will select a student's next core course utilizing their knowledge of the student's achievement, ability as shown in class, and course prerequisites for a student. The administration will enter any grade level required courses. <u>Requested Course Section</u>: Students will enter their elective choices. <u>Alternate Course Section</u>: Students will enter their alternate course choices. It is suggested students should choose no less than 3 alternate courses. Alternate courses are defined as courses a student is willing to consider if any requested courses (electives) are not available. Once required, requested, and alternate courses sections are input, a completed Course Request Summary sheet should be printed and signed by a parent/guardian. <u>This signed form</u> will then be turned into the appropriate Guidance Office at a date to be determined. Each student will then be scheduled to meet with a guidance counselor to review the course selection summary and prepare a final course selection list that will be given to the student. These forms will be completed in conjunction with a "Career Learning Plan" that will identify a Career Pathway as the basis of course selection. Please note the Course Request Summary is not your student's final schedule, but rather the listing of courses most desired in next year's schedule for your student.

DUAL ENROLLMENT PROGRAMS

This grouping of programs provides eligible students with the opportunity to enroll in college courses that are offered off- campus of McDowell High School. Students begin academic studies through a local university and earn college credits, while still completing a high school diploma. Credits earned may count toward high school elective credits or credit requirements for graduation. These college credits are offered to the high school student at a greatly reduced cost. General eligibility for the dual enrollment programs requires that seniors have an unweighted GPA of at least 3.25 and juniors have an unweighted GPA of at least 3.5.

Regional Choice Initiative (RCI):

Local colleges and universities (currently Gannon University, Mercyhurst University and Edinboro University of Pennsylvania) offer college courses that are mostly used to fulfill general education requirements and are taught by preferred university faculty. The site for the RCI program is the former skills center next to the Erie County Technical School. Currently, the district provides transportation to the RCI location. Classes offered may include such options as Introduction to Philosophy, Sociology, College Algebra, Environmental Science, Introduction to Psychology, College Writing Skills, and Foundations of Western Heritage. New courses and opportunities are expanded each year. Students register for this program in the spring of the previous year, scheduling courses for both semesters.

On-Campus College Program:

Each of the local universities offers high school students the opportunity to enroll in and attend courses on the college campus. These courses may meet during the school day or in the evenings, as well as the summer. Transportation and cost of the college course are the responsibility of the student. The following schools participate in the program:

- Edinboro University of Pennsylvania Main Campus
- Gannon University
- Mercyhurst University
- Penn State Erie, The Behrend College: EXCEL Program

For each of these opportunities, students will need to complete an application and submit course fees after meeting with the guidance counselor at McDowell High School. Final acceptance into the program rests with the college to which the student has applied. See your guidance counselor in the guidance office for more information.

ELECTIVE COURSES

Elective courses may not be offered if enrollment does not justify the offering.

FAILED REQUIRED COURSES

Failed required courses should be made up in Summer School.

General Information

GRADUATION REQUIREMENTS

Graduation is based on the successful completion of required coursework.

To earn a diploma, students need to complete the required credits and Keystone/standardized state tests and/or competencies.

| COURSE/PROJECT REQUIREMENTS | CREDITS |
|-----------------------------|---------|
| Mathematics | 4.0 |
| English | 4.0 |
| Social Studies | 4.0 |
| Science | 3.5 |
| Physical Education | 2.0 |
| Health | 1.0 |
| Electives | 9.5 |
| Total Credits | 28.0 |

INDEPENDENT STUDY

Independent study is a program that is available for students who wish to pursue an in-depth study of a particular topic. Both teacher and studentdesigned programs are available and scheduled by half credit only. Students may earn a maximum of one credit per year for independent study. The course will be pass/fail and will not be included in class rank but will count as an elective credit for graduation. A PowerPoint presentation must be produced to explain your independent study project. The Independent Study Program is only available to students who formally apply and are approved. Contact the Guidance Office for further information.

KEYSTONE EXAMS

The Keystone Exams are end-of-course assessments designed to assess proficiency in selected core subject areas (e.g., Literature, Algebra 1, Biology). A student's schedule determines when s/he participates in the Keystone Exams. There will be two assessment windows during the academic school year. Beginning with the class of 2022, students must demonstrate proficiency on the Literature, Algebra 1, and Biology Keystone Exams to graduate. Please contact your students guidance counselor for more specific information regarding Keystone Exams and graduation requirements.

NCAA

The NCAA, or National Collegiate Athletic Association, is the athletics governing body for more than 1,280 colleges, universities, conferences, and organizations. They develop the rules and guidelines for athletics eligibility and athletics competition for each of the three NCAA divisions. One of the differences among the three divisions (Division I, Division II, Division III) is that colleges and universities in Division I and II may offer athletic scholarships, while Division III colleges and universities may not. The NCAA Eligibility Center will certify the academic and amateur credentials of all college-bound student-athletics who wish to compete in NCAA Division I or II athletics in college. The NCAA determines eligibility through a review of NCAA, The or National Collegiate Athletic The NCAA determines eligibility through a review of the student's high school courses and test scores (ACT or SAT). The high school courses must be core courses. A core course is defined and approved by the NCAA and must be an academic course in one of these areas: English, mathematics (Algebra I or higher), natural/physical science, social science, or foreign language. It must also be considered a four-year college preparatory course, and be at or above the regular academic level. NCAA Division I and II require 16 core courses. As a student-athlete, this means that one must carefully plan the sequence of courses that are taken in high school in order to meet eligibility requirements.

More information can be found by accessing the Eligibility Center's resource page on their website:

http://www.eligibilitycenter.org.

*Please see pages 59-62 for detailed NCAA information.

PROMOTION

To be promoted from ninth grade to tenth grade, a student is required to have a minimum of 5 credits. Students must earn 12 credits to be promoted from grade 10 to grade 11. To be promoted from eleventh grade to twelfth grade, a student must have a minimum of 20 credits.

SCHOOL SERVICE

This program is for students who assist office personnel or act as library aides. A pass/fail grade is given to the student and will be noted on the transcript, but no credit is earned.

SPECIAL EDUCATION SERVICES

There is a continuum of services available to students with disabilities, based on a student's IEP, including adapted and modified curriculum, aide support, collaborative instruction and self-contained services. Please contact the Guidance Office at the school if you or your parents have questions about scheduling.

STEM CERTIFICATE (Science, Technology, Engineering, and Math)

The MTSD Science, Technology, Engineering, and Math (STEM) Certificate recognizes students who have demonstrated their success as critical thinkers and problem-solvers and are prepared to reach their fullest potential in a STEM field. Through their coursework and extra-curricular activities, STEMcertificated students have dedicated themselves to preparing for the challenges of a dynamic world. Interested students should see their guidance counselor.

WELLNESS/PHYSICAL EDUCATION

All students are required to take a wellness/physical education course each year. All 9th graders are required to take Aquatics. Grades 10-12 <u>must</u> select one wellness/physical education requirement.

McDowell STEM Certificate Program

The MTSD Science, Technology, Engineering, and Math (STEM) certificate recognizes students who have demonstrated their success as a critical thinker and problem solver and are prepared to reach their fullest potential in a STEM-related field. Through their coursework and extracurricular activities, STEM-certificated students have dedicated themselves to preparing for the challenges of a dynamic world. Students completing these tasks will receive STEM certification in conjunction with their diploma from McDowell upon graduation.

Requirements = Coursework A or B plus STEM Category 1 and Category 2

Coursework A

CAREER & TECHNICAL SCHOOL STUDIES:

ECTS students involved in any of the identified labs earning a B or better. I will be completing one of the programs at ECTS. (Any ECTS students completing these programs automatically qualify.)

One program earning a B or better

- ____Graphic Media Design and Print
- ____Health Assistant
- ____Metal Fabrication
- ____Precision Machining

Coursework B

DIVERSE HIGH SCHOOL STEM COURSES:

McDowell students, not attending ECTS, must earn a B- or better in at least 4 separate areas within this category to qualify for STEM.

Advanced Business/Computer Science One or more earning a B or better

- ____AP® Computer Science A
- _____AP® Computer Science Principles
- ____Computer Applications: Manipulate It
- ____Computer Science 1
- ____Computer Science 2
- ____Entrepreneurship
- ____Game Development & Programming
- ____Web Design 1
- ____Web Design 2-Mobile App Dev

Advanced Creativity and Innovation One or more earning a B or better

- ____Advanced Video Production
- ____Animation
- ____Comm.: Broadcast Journalism
- ____Digital Photography
- ____Digital Technology in Art
- ____Graphics

Advanced English

One or more earning a B or better

- ____Advanced Exploring Writing
- -----Honors or AP® English 11 -----Honors or AP® English 12

<u>Advanced Math</u>

One or more earning a B or better

- ___AP® Calculus AB
- ____AP® Calculus BC
- ____AP® Statistics
- ____Honors Algebra 2
- ____Honors Calculus
- ____Honors PreCalc/Trig
- ____Honors Probability & Statistics

Advanced Science

One or more earning a B or better

- ____Aero Science 2
- ____AP® Biology
- ____AP® Chemistry
- ____AP® Environmental Science
- ____AP® Physics 1
- ____AP® Physics C—Mechanic
- ____CSI Forensic Science
- ____Honors Anatomy & Physiology
- ____Honors Chemistry
- ____Mechanical Science
- ____Honors Organic Chemistry
- ____Honors Physics

Advanced Technology One or more earning a B or better

____Advanced Computer Design & Mfg.

- ____Architectural Design
- ____CNC Manufacturing
- ____Energy and Power Technology
- ____Graphics Technology 2
- ____Introduction to Applied Engineering
- ____Metal Technology 2
- ____Robotics 2
- ____Wood Technology 3
- ____Wood Technology 4

<u>Global Awareness/Citizenship</u> One or more earning a B or better

- ____AP® Comparative Govt. & Politics
- ____AP® Human Geography
- ____AP® Psychology
- ____AP® U.S. Government & Politics
- ____Hon. French 3, German 3, or Spanish 3
- ____Hon. French 4, German 4, or Spanish 4

10

- ____Honors Spanish 5
- ____International Business and Ethics
 - ___Justice Education

STEM Category 1 & Category 2 -Students must be able to check both categories to qualify <u>and</u> complete the required verification forms. Category 2 requires at least two approved STEM activities that are indicated on the STEM Approved Activities page.

Category 1: STEM-related and

- preapproved work experiences
- ____AP® Research

____Independent Study related to STEM fields

- ____Internship
- ____McDowell Manufacturing
- _____Part-time employment in a STEMrelated job
- ____STEM Camp or After School Program ____Two pre-approved STEM Field Trip
- Options

____Volunteer Work

<u>Category 2</u>: STEM-related and approved extracurricular activity during high school. Students must be involved in at least 2 approved activities prior to graduation. <u>This</u> can be either 2 consecutive years of the same activity or 1 year in 2 different activities. See STEM Approved Activities page for more details.

United States Academic Decathlon

Note: Students must meet

with Guidance before the

2nd semester of their

Senior year to verify all

requirements completed.

- ____Biology Club
- ____Computer Science Club
- ____Cyber Patriot (ROTC)
- ____FIRST Robotics ____Garden Club

___Math Club

___Sports Medicine

__Youth in Med

___PJAS

TEAMS

__Other:__

STEM—APPROVED ACTIVITIES

SCIENCE—TECHNOLOGY—ENGINEERING—MATH

Students who wish to earn a STEM certificate must meet several requirements as listed below (coursework—scheduling time, job shadowing, internship, or summer camp, and two or more STEM activities prior to graduation). Current activities which are STEM approved are listed on this page.

BIOLOGY CLUB

Mr. Gilroy-McD gilroy@mtsd.org

The Computer Science Club provides an environment for students interested in the field of computer science to further explore their knowledge with peers at McDowell. Annual projects completed by the Computer Science Club are designed to better the community and grow members' knowledge of computer science.

COMPUTER SCIENCE CLUB

Mr. Palmer-McD palmer@mtsd.org

The Computer Science Club provides an environment for students interested in the field of computer science to further explore their knowledge with peers at McDowell. Annual projects completed by the Computer Science Club are designed to better the community and grow members' knowledge of computer science.

CYBER PATRIOT (ROTC)

Chief Holmes-MIHS holmes@mtsd.org

Air Force Association's (AFA) Cyber Patriot is the nation's premier youth cyber education program, featuring the National Youth Cyber Defense Competition. The competition is open to all high schools and middle schools in the nation, as well as all JROTC units, Civil Air Patrol or cadet squadrons, and Naval Sea Cadets Corps units. Students learn the importance of cybersecurity and skills that can be valuable in cyber careers. Registration of teams occurs in early October and online rounds occur through the winter months. The National Finals Competition occurs in Washington D.C. in March. If teams do not qualify for the national level, then they compete at state and regional recognition rounds.

FIRST ROBOTICS (For Inspiration and Recognition of Science and Technology)

Mr. Bucholtz-McD bucholtz@mtsd.org

This is a varsity sport for the mind, FIRST Robotics Competition combines the excitement of sport with the rigors of science and technology. Under strict rules, limited resources, and time limits, teams of 25 students or more are challenged to raise funds, design a team "brand", hone teamwork skills, and build and program robots to perform prescribed tasks against a field of competitors. It's as close to "realworld engineering" as a student can get. Volunteer professional mentors lend their time and talents to guide each team.

GARDEN CLUB

Mrs. Taylor-MIHS jtaylor@mtsd.org

The Garden Club will continue to develop and maintain the flower garden outside the Little Theatre, focusing on pollinator plants. We will meet to plan and to work in the greenhouse planting seeds and propagating plants during the colder months. There will be opportunities to complete service hours after school and during the summer to maintain the garden. Students may choose to attend tutorial meetings, after-school work sessions, or both.

MCDOWELL MATH CLUB

Ms. Testa—McD testa@mtsd.org

This club is for students that enjoy doing math and want to look at the history of mathematicians, higher-level math problems and how they relate to what we do in math class, math activities for all levels (k-12), and math competitions.

<u>PJAS</u>: Pennsylvania Junior Academy of Science

Mrs. Allaman-MIHS allaman@mtsd.org

Students research a science topic, design an experiment, and analyze the results. They then present their results at a regional competition at Penn State Behrend in March. They may move on to the state competition in May. Students must sign up in September to register on time.

SPORTS MEDICINE

Ms. Kelly Bruce—McD bruce@mtsd.org

Students learn about CPR, First-Aid, catastrophic injury management, concussion management, injury acute injury prevention. care. basic rehabilitation exercises, hydration, field/ court game, and practice set up. Students do travel with some teams to away games. In addition to working with McDowell teams, there are opportunities to visit and shadow various settings including PT/ Sports Medicine Clinics, Orthopedic Surgeon's offices, and even observe Orthopedic Surgeries. Also, coordinate campus visits to colleges and university Sports Medicine and Athletic Training programs. The SAT's come to the Athletic Training Room located below Paul Goll Gymnasium on a daily basis to assist with each day's activities.

<u>TEAMS</u> (Test of Engineering Aptitude, Mathematics, and Science)

Mr. Bucholtz-McD bucholtz@mtsd.org

This is an annual competition for high school students designed to help them discover their potential for engineering. During this one-day competition, students apply math and science knowledge in practical, creative ways to solve real-world engineering challenges.

USAD (United States Academic Decathlon)

Mr. Andrzejczak—McD andrzejczak@mtsd.org

USAD was formerly known as ASL and is premier the country's academic competition. USAD competitions test your knowledge of the information found in economics, art, music, language and literature, math, science, and social science research packets with a common theme. Each Packet is over 150 pages. Each Decathlete spends hours looking over the research, studying, creating personal study guides, playing review games, and finally competing against schools from across the state and country.

YOUTH IN MED

Ms. Moyer-McD moyer@mtsd.org

Youth in Med is a med club intended to provide students with resources that engage them in the medical field. Opportunities included are becoming CPR & First Aid Certified, splinting, and dissections. The club also features guest speakers of diverse medical professions, career exploring, practice medical case studies, and science-based activities/ projects (biology & anatomy).

Focused Study Programs

CENTER FOR THE PERFORMING ARTS

The Millcreek School District Center for the Performing Arts has the most comprehensive course of study in Northwest PA for students interested in music, drama, and dance. Numerous instrumental ensembles include a marching band, jazz band, two concert bands, orchestra, and a wind ensemble for students interested in playing one or more instruments. Choral ensembles include two concert choirs, a mixed chorus, and a vocal ensemble. Performing Arts courses are offered for students who are interested in drama, musical theatre, and technical theatre. In addition, several levels of dance classes are provided in a variety of disciplines. Elective courses in piano and guitar are available for students who wish to learn theory and fundamental music skills while playing an instrument.

Certification

Students who successfully complete the following course selection and performance requirements will receive a Performing Arts Certificate upon graduation. Student must complete the following:

- Minimum of three years involvement with Performance Arts curriculum
- Minimum of six credits in Performance Arts courses
- Performs a minimum of three major productions (performer, technical, or musician)
- Work in a minimum of two community productions (community theatre, church productions, etc.)
- Member of the International Thespian Society
- Recommended by Performance Arts Department

Certificate Plan Grade 9 Grade 10 Grade 12 Grade 11 Performing Arts 1 Performing Arts 3 Performing Arts 2 Ensemble * Ensemble * Ensemble * PE Dance **DPE** Dance PE Dance **3** YEAR Popular Dance Music Theory or Music History (11 or 12) Performing Arts 1 Performing Arts 2 Performing Arts 4 Performing Arts 3 Ensemble * Ensemble * Ensemble * Ensemble * **DPE** Dance PE Dance 4 YEAR **DPE Dance** □ Music Theory or Music History (11 or 12)

Center for Performing Arts Certificate Course Sequence

*Students may select more than one ensemble.

There are many options available to the students who choose a three or four-year plan. Students interested in pursuing a career in musical theatre should consider courses in dance. If you have already studied dance for several years, we recommend that you audition for the advanced dance electives.

EDUCATION PROFESSION PATHWAY CERTIFICATE PROGRAM

A career pathway program targeting students who are interested in pursuing a degree in education or a career working with children.

The goal of this program is to provide direct instruction related to the early childhood education field. Students will learn through hands-on experiences and internship opportunities in various educational settings to better prepare for future educational and career opportunities.

Students who successfully complete the program will be awarded an Education Profession Pathway Certificate at graduation from Millcreek Township School District, as well as the possibility to earn college credits from partnering Universities.* Required Courses (4.5 Credits)

- Education Profession Level 1 (1.0)
- Education Profession Level 2 (1.0)
- Education Profession Level 3 (1.0)
 - Career Exploration (0.5)

Internship (1.0)

*Certain requirements must be met

ERIE COUNTY TECHNICAL SCHOOL (ECTS)

Erie County Technical School (ECTS) offers a wide variety of career, trade, and technical opportunities leading to career or collegiate study, or directly to employment. Students entering grades 10 through 12 may attend ECTS for a half-day, and take their remaining academics at McDowell. Students may apply to programs of interest by completing an application through the Guidance Office.

To be eligible, all 9th-grade students must pass their academic and elective courses or complete them in summer school. Programs are designed to be completed in 3 years (grades 10, 11, and 12). For each successful year, students will earn four (4) credits toward graduation. Senior students who have attained the appropriate skills level are afforded the opportunity to participate in Co-Op Programs that provide valuable work experience with on the job training and the opportunity to earn money. Students within many programs have the opportunity to earn post-high school credits due to established articulation agreements with several colleges and trade/ technical schools. These schools may offer preferred admission, award credit(s), and/or advanced standing to students who have successfully completed the technical program.

Recommended Course Sequence

| Grade 9 | Grade 10 | Grade 11 | Grade 12 |
|---|---|--|---|
| English | • English | • English | • English |
| World Geography Math | World History Math | U.S. History Math/Science * | U.S. Government/Economics Math/Science * |
| Math Environmental Science | Biology | Health | Math/Science Elective (1 credit) |
| Honors Biology | Chemistry | Physical Education | Physical Education |
| Aquatics | Physical Education * | | |
| Health Electives (2.5 Credits) | Taskaisel Dusausus ANA | Technical Program - PM | Technical Program - PM |
| Electives (2.5 Credits) | Technical Program - AM | | |

*Graduation requirements will be modified for ECTS students.

MCDOWELL MANUFACTURING ACADEMY

The goal of this program is to provide employment opportunities for students graduating high school or students entering a technical training program. Students who successfully complete the program will be awarded a Manufacturing Academy Certificate at graduation along with their OSHA 10 hour Safety Certification Card.

Required Courses (4.0 Credits)

| Personal Finance & Business Calculations (1.0) | Career Exploration (0.5) |
|--|--|
| Foundations of Technology Design and Engineering (1.0) | Internship (0.5) |
| CNC Manufacturing (1.0) | **OSHA Training Certification (Tutorial) |

Elective Courses (1.5 Credits)

| Introduction to Wood & Building Trades (1.0) | Materials Manufacturing: Metal Technology 1 (0.5) |
|--|---|
| Materials Manufacturing: Wood Technology 2 (1.0) | Materials Manufacturing: Metal Technology 2 (0.5) |
| Surviving and Thriving Adulthood (0.5) | Introduction to Robotics (1.0) |
| Digital Technology and Art (0.5) | Internship (Additional 0.5) |
| Introduction to Applied Engineering (1.0) - (Grades 10-12) | Conceptual Physics (1.0) |

ADVANCED PLACEMENT® (AP®) COURSES

Taking AP® is a sign that you are up for the most rigorous classes your high school has to offer. Taking an AP® course builds the skills you will need throughout your college years. By taking an AP® course and scoring successfully on the related AP® Exam, you can save on college expenses.

For more information on Advanced Placement® courses, visit the College Board site:

https://apstudent.collegeboard.org/exploreap

Focused Study Programs

MCDOWELL HONORS COLLEGE OF LEADERSHIP AND SERVICE

Selection for the McDowell Honors College of Leadership and Service is based on an application process and thorough review of each student's academic record. The mission of the Honors College is to provide the most dedicated high-achieving students with a small learning community that provides a structure for superior performance, leadership experiences, and community service opportunities. Honors College students demonstrate a commitment to a pursuit of rigorous and challenging coursework, a commitment to physical and mental health through exercise and a drug-free lifestyle, and a participation in a variety of school-based and community-based activities.

Students accepted into the program will be placed in common homerooms, led by Honors College Advisors. Advisors will serve as mentors to students as they guide them through the students' independent service projects, monitor their accumulation of community service hours, and ensure proper completion of Honors College program requirements. This mentoring relationship assists the students in making decisions about choosing a college and setting goals for professional careers of interest.

For more information about the Honors College program, visit http://www.mtsd.org/district/activities-programs/ honors-college

Honors College Scheduling Requirements:

- 9th/10th must enroll in three honors level courses
- 11th/12th must enroll in four honors level and/or AP® courses
- All students must take at least three AP® courses by graduation
- Must complete three (3) credits of a world language

DISTINCTIVE SCHOLAR PROGRAM

The Distinctive Scholar Program (DSP) is a more selective and rigorous pathway for students of high ability and motivation encompassing current Honors College requirements plus additional requirements including specific courses, service hours, and mentorships. Students who meet the criteria will receive an invitation to apply for the program.

Distinctive Scholar Program Scheduling Requirements:

- Full enrollment in all honors and/or AP® courses
- AP® Seminar & AP® Research courses
- At least four additional AP® courses
- Work towards Capstone Diploma
- Must complete at least three (3) credits of a world language

AP® CAPSTONE

According to College Board, AP® Capstone is a College Board program that equips students with the independent research, collaborative teamwork, and communication skills that are increasingly valued by colleges. It cultivates curious, independent, and collaborative scholars and prepares them to make logical evidence-based decisions.

AP® Capstone is comprised of two AP® courses—AP® Seminar and AP® Research—and is designed to complement and enhance the discipline-specific study in other AP® courses. Students typically take AP® Seminar in grade 10 or 11, followed by AP® Research. Students who earn scores of 3 or higher in AP® Seminar and AP® Research and on four additional AP® Exams of their choosing receive the AP® Capstone Diploma[™]. Students who earn scores of 3 or higher in AP® Seminar and AP® Research, but not on four additional AP® Exams receive the AP® Seminar and Research Certificate[™]. Additional info may be retrieved from http:// advancesinap.collegeboard.org/ap-capstone.

AP® Seminar Overview

AP® Seminar is a foundational course that engages students in cross-curricular conversations where they can explore the complexities of academic and realworld topics and issues by analyzing divergent perspectives. Using an inquiry framework, students practice reading and analyzing articles, research students and foundational, literary, and philosophical texts; listening to and viewing speeches, broadcasts, and personal accounts; and experiencing artistic works and performances. They synthesize information from multiple sources, develop their own perspectives in written essays, and design and deliver oral and visual presentations, both individually and as a team. Ultimately, the course aims to equip students with the power to analyze and evaluate information with accuracy and precision so they can craft and communicate evidence-based arguments.

AP® Research Overview

AP® Research allows students to deeply explore an academic topic, problem, or issue of individual interest. Through this exploration, students design, plan, and conduct a yearlong investigation to address a research question.

In the AP® Research course, students further develop the skills acquired in the AP® Seminar course by learning research methodology, employing ethical research practices, and accessing, analyzing, and synthesizing information. Students reflect on their skill development, document their processes, and curate the artifacts of their scholarly work through a process and reflection portfolio.

Aerospace Science (AFJROTC)

| R14010 | AEROSPACE SCIENCE 1 |
|---------------|--|
| CREDIT: | 1.00 CREDIT |
| PREREQUISITE: | THE ABILITY TO PARTICIPATE IN MARCHING |
| | AND PHYSICAL WELLNESS/PT |
| OTHER INFO: | SEE ADDITIONAL REQUIREMENTS |

This course is open to all students who have the ability to participate in physical wellness, marching maneuvers, and carry a minimum overall 2.0 grade point average. Aerospace Science is divided into categories with Aerospace Science comprising 40% of the curriculum, Leadership Education 40%, and 20% is made up of physical wellness/ PT. The first year is a history course designed to acquaint the students with the historical development of flight and the role of the military in history. The leadership portion develops leadership skills and acquaints students with life skills such as discipline, leadership, citizenship, customs, and courtesies. Further leadership training encompasses communication skills, management studies, and basic marching skills. Students are exposed to numerous field trips and competitive drill meets. Aerospace Science is a pathway of civilian/ military career exploration into the many different occupations that are available. Careers will be discussed and quest speakers will be invited in to speak of career opportunities.

R24010 **CREDIT:** PREREQUISITE:

AEROSPACE SCIENCE 2

1.00 CREDIT THE ABILITY TO PARTICIPATE IN MARCHING AND PHYSICAL WELLNESS/PT AND MUST **HAVE PASSED AS-1**

OTHER INFO: SEE ADDITIONAL REQUIREMENTS This course is open to all students who have successfully completed Aerospace Science 1 and its requirements. Aerospace Science is divided into categories with Aerospace Science comprising 40% of the curriculum, Leadership Education 40%, and 20% is made up of physical wellness/PT. This year is a science course designed to acquaint the students with the Aerospace environment; the human requirements of flight, principles of aircraft flight, and principles of navigation. The leadership portion of the class stresses communication life skills and career opportunities. Written and oral communication requirements compliment academic materials. Cadet Corps activities include holding positions of greater responsibility in the planning and execution of Corps projects.

Aerospace Science is a pathway of civilian/military career exploration into the many different occupations that are available. Careers will be discussed and guest speakers will be invited to speak of career opportunities.

| | CREDIT AWARDED IF REQUESTED) |
| OTHER INFO: | SEE ADDITIONAL REQUIREMENTS |

This course is open to all Junior and Senior students with prior approval from JROTC staff. JROTC prefers successful AS-1 and AS-2 completion; however, staff will evaluate admittance on a case-by-case basis. Aerospace Science is divided into categories with Aerospace Science comprising 40% of the curriculum, Leadership Education 40%, and 20% is made up of physical wellness/PT. The academic subject of this course is Global and Cultural Studies. Leadership classes stress communication and personal development and include actual experience in commanding the Cadet Corps and serving in support command and staff positions. The cadets assist in the planning and supervising of all cadet activities, physical wellness, and drill. Numerous community service opportunities and field trips enhance the classroom experience. One science credit may be awarded to students who successfully complete 3 credits of Aerospace Science. Aerospace Science continues to be a pathway of career exploration into the many different occupations that are available. Careers will be discussed and guest speakers will be invited to speak of career opportunities.

R44010 CREDIT: PREREQUISITE:

AEROSPACE SCIENCE 4 1.00 CREDIT THE ABILITY TO PARTICIPATE IN MARCHING, PHYSICAL WELLNESS/PT, AND TEACHER RECOMMENDATION

OTHER INFO:

SEE ADDITIONAL REQUIREMENTS This course is open to all Junior and Senior students with prior approval from JROTC staff. JROTC prefers successful AS-1 and AS-2 completion; however, staff will evaluate admittance on a case-by-case basis. ADDITIONAL REQUIREMENTS:

CADETS ARE REQUIRED TO PARTICIPATE IN THE HOMECOMING PARADE, MCDOWELL DRILL COMPETITION, DINING-OUT, AND THE ANNUAL SUPERINTENDENT'S REVIEW. CADETS MUST, AT ALL TIMES, MAINTAIN ACCEPTABLE PERSONAL APPEARANCE AND HIGH ACADEMIC STANDARDS. THIS INCLUDES WEARING THE JROTC UNIFORM AND PARTICIPATING IN FOUR COMMUNITY SERVICE EVENTS PER QUARTER. THREE INCIDENCES OF IN-SCHOOL SUSPENSION (ISS) OR OUT-OF-SCHOOL SUSPENSION (OSS) MAY RESULT IN INVOLUNTARY DISMISSAL FROM JROTC. IF DISMISSED FROM OR RECEIVING A FINAL GRADE OF "F STUDENTS CANNOT RE-ENROLL IN ANY JROTC CLASS. FAILURE TO WEAR THE UNIFORM WILL RESULT IN A CONTRACT VIOLATION AND COULD LEAD TO INVOLUNTARY DISMISSAL FROM JROTC. FAILURE IN ANY MIHS/MHS CLASSES PRECLUDES INVOLVEMENT IN ANY OUT-OF SCHOOL FIELD TRIPS. FAILURE TO TURN IN ASSIGNED JROTC PROJECTS WILL RESULT IN A CONTRACT VIOLATION AND COULD LEAD TO INVOLUNTARY DISMISSAL FROM JROTC.

THE GOALS OF THE WELLNESS PROGRAM ARE TO:

- CREATE AN INDIVIDUALIZED TRAINING PROGRAM BASED ON NATIONAL STANDARDS BY AGE AND GENDER.
- 2. IDENTIFY AREAS OF IMPROVEMENTS FOR EACH CADET.
- 3. INCORPORATE A PHYSICAL TRAINING PROGRAM TO REACH GOALS.

B11510 **COMPUTER APPLICATIONS: DIGITAL DESIGN & PUBLICATIONS** (GRADES 9-12) **CREDIT:** 50 CREDIT PREREQUISITE: N/A

This course will integrate the desktop publishing, word processing, and graphic capabilities of the personal computer. In this class, students will produce and design professional publication documents such as announcements, fliers, posters, certificates, brochures, menus, catalogs, newsletters, newspapers, and reports. Students will also create and design a professional web page using web page editing software. Proper digital citizenship will be stressed throughout each project during the course.

B12010

INTRODUCTION TO BUSINESS (GRADES 9-12) 50 CREDIT

CREDIT: PREREQUISITE: N/A

This course is designed to introduce students to basic business and economic principles through a hands-on exploratory approach. Students will read a variety of texts for vocabulary development and acquisitions and use the internet to research. Concepts that are integrated throughout the course include entrepreneurship, international business, management, marketing, accounting, economics, the stock market, and career exploration. Specific computer applications will be incorporated into a variety of classroom projects.

B21510 CREDIT:

COMPUTER APPLICATIONS: **MANIPULATE IT (GRADES 9-12)** .50 CREDIT

PREREQUISITE: N/A

This course will integrate spreadsheet, database, and presentation software for the management of data. Students will explore how to manage data in a variety of network settings, such as in a Cloud, network, or single user computer throughout the course. Students will use database software to create, maintain, and manipulate large data files. Construction of formulas, various functions, and "If Statements" will be taught utilizing spreadsheet software. Students will manipulate graphs, charts, images, sounds and video, along with the data from spreadsheets and databases to be included in digital presentations. This course is an excellent way to develop those needed computer skills that will set you apart from others!

B26010

(GRADES 10-12) 50 CREDIT CREDIT:

PREREQUISITE: N/A

This course will focus on the real-world business perspective by using examples from the marketing world to illustrate features, concepts, and activities. Sports and Entertainment Marketing is an exciting and competitive business in the world today and students will recognize its relevance due to the local pro sports teams and theaters. It is our hope to create partnerships with those entities to allow students to work directly with them and learn hands-on. Concentration will be on basic principles of marketing and economics, including demographics and the marketing mix, with special emphasis on sports and entertainment marketing. Literacy and research skills will be improved as students read a variety of texts and articles and use the internet to search for marketing ideas to complete class projects.

SPORTS AND ENTERTAINMENT MARKETING

B34010

FINANCIAL LITERACY (GRADES 11-12) .50 CREDIT

CREDIT: PREREQUISITE: N/A

Financial Literacy teaches students how to manage their money in the 21st century! We dive into the real world of money, including behavioral economics, managing a checking account, buying a vehicle, managing credit, avoiding common financial mistakes, saving for the future, investing for retirement, purchasing insurance for your most valuable assets, preparing taxes, and more. This course utilizes engaging simulations so students can practice the skills they will need to manage their personal finances throughout their lives, not just read or hear about them. Even better, this course often kickstarts lots of helpful money conversations between students and their loved ones. It's a win for the next generation and for the adults in their lives!

B37010 ACCOUNTING 1 (GRADES 10-12) **CREDIT: 1.00 CREDIT** PREREQUISITE: N/A

The complete accounting cycle is presented by means of specific principles and situations. Accounting theory and concepts will be applied to maintain journals, ledgers, and formulating fundamental financial statements including a Balance Sheet, Income Statement, and Trial Balance. Students will study payroll accounting and multiple journals in a manual system as well as an automated system. Directed practice through carefully planned projects and problems provides the student opportunities to perform accounting tasks commonly found in business. In addition, students will complete a program from the IRS on understanding taxes.

B47010 ACCOUNTING 2 (GRADES 10-12) **CREDIT: 1.00 CREDIT**

PREREQUISITE: ACCOUNTING 1 WITH A "C" OR HIGHER

This course is a continuation of the study of accounting through financial statements. This one-credit elective course is offered to students who have successfully completed Accounting 1 with a "C" or higher. Topics include long-term receivables and payables, inventory, fixed assets, accruals, and equity (i.e. common stock, dividends, earnings per share, and additional paid-in capital). The course will then focus on specialized accounting procedures relating to departmentalized accounting, internal controls, and managerial and cost accounting systems. Throughout the course, automated accounting procedures are emphasized.

B48510

INTERNATIONAL BUSINESS AND ETHICS (GRADES 10-12) 50 CREDIT

CREDIT: PREREQUISITE:

N/A

provides content and activities for This one-term course understanding the role, factors, and impact of engaging in a global business environment. Course topics include international business communications, environment, ethics, finance, management, marketing, and import/export trading. A major requirement of the course includes a simulated project whereby students will choose a country with which to do business. Students will use literacy and research skills to become familiar with significant aspects of the country such as their culture, economy, customers, and business etiquette. Students will then choose a product and develop a marketing plan based on the needs and wants of that country. These activities provide the foundation for becoming an informed participant in the global economy.

B49010 BUSINESS LAW (GRADES 10-12) CREDIT: .50 CREDIT PREREQUISITE: N/A

This course involves the principles of law that apply to daily living. It includes the study of legal rights and duties concerning torts and crimes, contracts, and insurance. Class activities include discussion of current events as they relate to the law, debates on current legal issues, research and reports on various related legal topics, a mock trial, and reading, analyzing, and discussing court cases followed by a trip to the Erie County Court House and Prison.

B49510 ENTREPRENEURSHIP (GRADES 10-12) CREDIT: .50 CREDIT PREREQUISITE: N/A

This course provides students with a hands-on opportunity to study the process of starting and running a business. Students will learn concepts such as forms of ownership, management, raising capital, financials, and analyzing their market and competition. These concepts will be integrated and reinforced through a Virtual Business simulation where students will start and run their own business. The course will conclude with a Virtual business competition and business plan presentation for their business simulation. Students will conduct market research and participate in a job shadowing experience.

Center for the Performing Arts

P11010 GUITAR (GRADES 9-12) CREDIT: .50 CREDIT PREREQUISITE: N/A

Are you ready to embark on an exploration into the intriguing world of guitar, where you'll unlock the power of six strings and tap into your inner musician? This course is your passport to the thrilling realm of guitar playing, designed for absolute beginners who want to learn the art of playing the guitar.

P11510 PIANO (GRADES 9-12) CREDIT: .50 CREDIT PREREQUISITE: N/A

Are you ready to unlock the captivating world of music? Dive into the rhythms and melodies that lay the foundation for a lifetime of music making. This course is your gateway to the realm of piano playing, designed for absolute beginners who want to experience the joy of creating music.

P12010 CONCERT BAND (GRADES 9-12) CREDIT: 1.00 CREDIT PREREQUISITE: PARTICIPATION MAY BE LIMITED BY AUDITION FOR SOME INSTRUMENTS

Are you prepared to embark on an electrifying musical voyage? Join the ranks of the McDowell Concert Band. This course is your ticket to the grand stage, where you'll experience the sheer thrill of performing captivating music with like-minded, passionate musicians. You and your friends will perform cinematic hits, current popular songs, and original music for band.

P14110 CREDIT:

MCDOWELL CHORAL PROJECT (GRADES 9-12) 1.00 CREDIT

PREREQUISITE: N/A

Get ready to elevate your vocal skills and embark on an enchanting musical journey in the McDowell Choral Project (formerly Mixed Chorus). This course is designed for high school students who are ready to take their vocal talents to the next level. You and your friends will perform Broadway hits, current popular songs, and original music for chorus. Join our vibrant choir family and immerse yourself in the art of singing with passion, precision, and artistic expression.

P16010 PERFORMING ARTS 1 (GRADES 9-12) CREDIT: 1.00 CREDIT PREREQUISITE: N/A

Step into the spotlight and discover the magical world of theater, where acting, music, dance, and technology converge. This course is your key to igniting your dramatic journey, encompassing both the art of musical theater and the magic behind the scenes. Designed for budding performers, tech enthusiasts, and theater lovers, this thrilling course will take you on a captivating voyage through the heart of the stage, where the Broadway musical comes to life.

P23010 JAZZ BAND (GRADES 9-12) CREDIT: 1.00 CREDIT PREREQUISITE: DIRECTOR RECOMMENDATION UPON SUCCESSFUL AUDITION

Step into the exhilarating world of jazz, where every note is a canvas for artistic expression and every performance is a dynamic journey through rhythm, harmony, and improvisation. Join the McDowell Jazz Band, an electrifying musical experience that will transport you to the heart of the jazz movement. Designed for passionate musicians who are ready to embrace the spirit of jazz, this course will unleash your inner improviser and groove to the rhythms of the jazz age.
 P24010
 WIND ENSEMBLE (GRADES 9-12)

 CREDIT:
 1.00 CREDIT

 PREREQUISITE:
 MUST HAVE DIRECTOR RECOMMENDATION

Get ready to embark on an extraordinary musical odyssey as we invite you to join the McDowell Wind Ensemble. If you're a dedicated wind or percussion instrumentalist looking to explore musical excellence, this course is your path to an exhilarating journey through the world of performance. Experience the power of performing challenging musical compositions with a community of passionate musicians and friends.

P25010 CREDIT: PREREQUISITE:

ORCHESTRA (GRADES 9-12) 1.00 CREDIT STUDENTS MUST HAVE SOME EXPERIENCE PLAYING A STRING INSTRUMENT

Prepare to embark on an extraordinary musical journey in the McDowell Orchestra. This course is your gateway to the mesmerizing world of orchestral music, where every note carries the soul of a composition and every performance is a grand adventure through the symphonic realm. Designed for passionate musicians ready to join an ensemble of exceptional talent, this course will immerse you in the harmonious tapestry of orchestral sounds and unlock the secrets of symphonic storytelling.

P26010 CREDIT: PREREQUISITE:

PERFORMING ARTS 2 (GRADES 10-12) 1.00 CREDIT SUCCESSFUL COMPLETION OF PERFORMING ARTS 1 AND/OR DIRECTOR RECOMMENDATION

Welcome to the second stage of your theatrical adventure in the McDowell CPA program. In this thrilling continuation of our theater program, we delve deeper into the intricacies of both performance and technical elements. This course is designed for aspiring actors, writers, tech enthusiasts, and theater lovers who seek to further explore the world of musical theater. Join us on this captivating journey where storytelling, creativity, and the magic of technology unite to create unforgettable performances.

P27510

CREDIT: PREREQUISITE:

MUSIC THEORY/MUSIC HISTORY (GRADES 10-12) 1.00 CREDIT RECOMMENDATION FROM MUSIC TEACHER

Unlock the captivating world of music theory with a modern twist. This course is designed for those eager to dive deep into the heart of musical understanding. This enchanting journey combines the time-honored principles of music theory along with an introduction to music technology. Immerse yourself in a world where classical harmony meets digital innovation, and where creativity knows no bounds.

P28010 POPULAR DANCE (GRADES 9-12) CREDIT: .50 CREDIT PREREQUISITE: N/A

Get ready to go on a dance adventure like no other in Popular Dance Class. This class is your gateway to the world of movement, expression, and creativity. Discover the joy of dance in contemporary styles, and let your passion for dance ignite in a world where your imagination knows no bounds.

Get ready to embark on a spectacular dance journey that fuses the elegance of ballet, the rhythm of tap, and the vibrancy of jazz dances. Open to dancers of all ability levels, this class fills 10th-12th grade PE requirements (9th graders can take as an elective). This class is your passport to a world of artistic expression and physical prowess, where you'll master three distinctive dance forms while unlocking the secrets of grace, rhythm, and style.

Computer Science

D11010 CREDIT:

INTRODUCTION TO COMPUTER SCIENCE (GRADES 9-12)

50 CREDIT

PREREQUISITE: N/A This course is an intro computer science course with a unique focus on creativity and problem-solving. Students explore several important topics of computing, such as programming, digital citizenship, networks, and web design.

D12510 CREDIT:

FOUNDATIONS OF COMPUTER **PROGRAMMING 1 (GRADES 9-12)** .50 CREDIT

PREREQUISITE: ALGEBRA 1 WITH AT LEAST A "C" AVERAGE Computer Science 1 is an elective course offered to students who are interested in learning about the foundational concepts of computer science and challenges them to explore how computing and technology impact the world. Additionally, students will investigate how computers represent all types of information and how the internet allows that information to be shared with people. Students will research and identify methods to store large and complex pieces of digital information in computers. Concepts introduced include variables, user input, text strings, Boolean expressions, and ifstatements. Students will explore the fundamental topics of programming, algorithms, and abstraction while learning to programmatically design a digital scene.

D13510

FUNDAMENTALS OF CYBERSECURITY (GRADES 9-12) .50 CREDIT

CREDIT: PREREQUISITE: N/A

This course is designed for students with some exposure to computer science. Students will learn foundational cybersecurity topics, including networking fundamentals, software security, system administration, and the basics of cryptography and programming. The content is a mix of web-based and physical activities. Students will modify existing code and run it in the browser, investigate cyber related topics and reflect on them and discuss them, create digital presentations, and engage in in-person collaborative exercises with classmates.

D16010 **SMART MANUFACTURING (GRADES 9-12) CREDIT:** .50 CREDIT PREREQUISITE: N/A

This course would include Intro to Smart Manufacturing, Industrial Internet of Things, Python, AI and Machine Learning, Cybersecurity, and Careers in Smart Manufacturing. This would be done with collaboration and guidance from West Virginia University. Implementing their scalable curricula for Smart Manufacturing and using their models.

D21010 WEB DESIGN 1 (GRADES 10-12) **CREDIT:** .50 CREDIT PREREQUISITE: N/A

This course provides an introduction to creating web pages using HTML. It is designed for high school students who have completed a Computer Applications course. The course will begin with an introduction to the Internet and World Wide Web. Emphasis is then placed on design techniques used to produce effective web pages. The course will then proceed through the process of creating and editing a web page; creating a website with links; creating tables in a website and creating frames on a web page. A major requirement will entail the development of any original website that contains links to multiple web pages.

D22010 CREDIT:

WEB DESIGN 2 - MOBILE APP **DEVELOPMENT (GRADES 10-12)** .50 CREDIT WEB DESIGN 1 WITH AT LEAST A "C" PREREQUISITE: AVERAGE

Web Design 2 - Mobile App Development will take what was learned in Web Design 1 to the next level by providing the advanced tools you need to create mobile apps that run on just about any smartphone or tablet. You will learn advanced features of HTML5 and CSS and will be introduced to jQuery and JavaScript to add interactivity to your site. Ultimately, you will design and build a mobile app that will be both attractive and effective.

D22510

FOUNDATIONS OF COMPUTER **PROGRAMMING 2 (GRADES 9-12)** .50 CREDIT

CREDIT: PREREQUISITE:

"C" AVERAGE Computer Science 2 is a continuation of the learning presented in Computer Science 1. Students will explore the technical, legal, and ethical questions from computers enabling the collection of data to the analysis and use of the data. Additionally, students will continue

COMPUTER SCIENCE 1 WITH AT LEAST A

to develop their ability to program in the industry standard languages. Concepts introduced include arrays, functions, classes, and advanced structures. Students will also differentiate between listprocessing and be introduced to advanced programming topics using Object Oriented Programming.

D23010

GAME DEVELOPMENT AND PROGRAMMING (GRADES 9-12) 50 CREDIT

CREDIT: **RECOMMENDATION FROM COMPUTER PREREQUISITE: SCIENCE 1 TEACHER**

In this course, students will learn technical skills such as programming, graphic design, animation, testing and debugging relating game development and design. Skills taught will be transferable to other STEM* career paths. Game Development will begin with drag-n-drop programming and advance to more complex projects that involve writing code. The engineering problem-solving cycle plays a large role in integrating physics and math principles into game functionality.

D32530**

AP® COMPUTER SCIENCE PRINCIPLES (GRADES 10-12) 1.00 CREDIT

CREDIT: PREREQUISITE: ALGEBRA 1 WITH A "B" OR HIGHER

AP® Computer Science Principles introduces students to the creative aspects of programming, abstractions, algorithms, large data sets, the Internet, cybersecurity, and how computing impacts our world. Students will develop the computational thinking skills needed to fully exploit the power of digital technology and help build a strong foundation in core programming and problem-solving.

- Engaging Students New to Computer Science: The course is designed to engage students from diverse backgrounds and those new to computing-and excite students with a curriculum that focuses on the core ideas that shape the landscape of computer science and its impact on our society.
- Project-Based and Collaborative Learning Approach: Using project-based lessons and materials throughout, students will work to address real-world problems and design solutions to put computational thinking into practice. These culminate in a capstone Performance Task project where students can demonstrate what they've learned-to become creators, instead of merely consumers, of the technology all around them.

Students who choose to participate in an AP® course will be required to take the AP® Exam for that course.

D33030 AP® COMPUTER SCIENCE A (AP CSA) (GRADES 10-12) CREDIT: 1.00 CREDIT PREREQUISITE: AP® COMPUTER SCIENCE PRINCIPLES (3 OR BETTER ON AP® EXAM) AND ALGEBRA 2 (B OR BETTER)

This rigorous course introduces students to software engineering and object-oriented programming and design using the Java programming language. The curriculum covers a broad range of topics, including the design of solutions to problems, the use of data structures to organize large sets of data, the development and implementation of algorithms to process data and discover new information, the analysis of potential solutions, and the ethical and social implications of computing systems. Students who choose to participate in an AP® course will be required to take the AP® Exam for that course.

D50030 TECHNOLOGY DUAL ENROLLMENT CREDIT: 1.00 CREDIT PREREQUISITE: CRITERIA LISTED BELOW AND PRINCIPAL PRE-APPROVED

Juniors (mostly second semester) with an unweighted GPA of 3.5 and Seniors with an unweighted GPA of 3.25 may attend college courses (either at a local college campus or an RCl site). The college course and grade earned will be placed on the high school transcript. Where school dismissal is required to attend such classes, the schedule at McDowell shall be adjusted. course utilizes whole-class novels and independent student practice to bolster decoding, fluency, comprehension, grammar, and vocabulary abilities. Students are guided through large-group, smallgroup, and independent work. These literacy skills will be applied in real-life situations as students engage in career and vocational training in the community.

E11010

ENGLISH LANGUAGE AND CULTURE (GRADES 9-12) **2.00 CREDIT**

CREDIT: PREREQUISITE: N/A

This course is for students who are beginning their study of the English language. We will introduce the basics of English listening, speaking, reading, and writing for students who are new to the American school setting. You will explore culture and meaningmaking across your languages as well as practical language skills for social and academic purposes.

E12010 FILM APPRECIATION AND ANALYSIS (GRADES 9-12) CREDIT: .50 CREDIT

PREREQUISITE: N/A

Come watch movies during school! Join us as we see how production teams put together frames, lights, sound, sets, and costumes. We won't be making our own movies, but we'll watch a range of genres to explore the basics of film studies.

E12210 DISNEY: THE HAPPIEST ELECTIVE ON EARTH (GRADES 9-12) .50 CREDIT CREDIT: PREREQUISITE: N/A

Experience a whole new world of Disney animation while revisiting old classics and new releases. You will take a look at the progression of Disney films from early movies to contemporary "live-action" remakes. What were the fairy tales that inspired the early films? How have Disney films represented or misrepresented people from around the world? What is it about Disney that makes so many of us keep

E12610** FANTASY AND SCIENCE FICTION LITERATURE (GRADES 9-12) CREDIT: .50 CREDIT

coming back? Join us in this elective to find out!

PREREQUISITE: N/A

Revolutionaries! Aliens! Adventurers! Magical creatures! Impressive technology! In this elective, we will discover fantastical landscapes, dystopian governments, and far-away worlds. We will read short stories, explore a few novels, and view films that help us define the fantasy and science fiction genres. See what fantasy and science fiction authors have to say about our current, everyday world and why these stories continue to be created and enjoyed.

E13010

DIGITAL CONTENT CREATION (GRADES 9-12) 50 CREDIT

CREDIT: PREREQUISITE: N/A

Ever wonder how to take a GOOD picture with your smartphone WITHOUT a filter? Want to know how TikTok influencers create cool transitions? Dream of being a YouTuber? In this course, students explore the world of media by understanding the basic building blocks of what makes a video. The course starts with the basics of photography and then moves into how a video is actually made of moving pictures. Students will plan, write scripts, film with video cameras, and edit using basic video editing software.

E13210**

HOLOCAUST AND JEWISH LITERATURE (GRADES 9-12) 50 CREDIT

CREDIT: PREREQUISITE: N/A

The Holocaust, as a genocidal event in the twentieth century, continues to draw attention and study. In this course, we will read nonfiction accounts and historical fiction to illuminate the horrors of antisemitism and the resistance to dictatorship. However, the Jewish experience is not limited to the 1930s and 1940s. This course will also consider contemporary literature by Jewish authors featuring Jewish characters that move beyond the Holocaust. This course would make a great extension of the Justice Education elective.

E13610 MARVEL, DC, AND BEYOND (GRADES 9-12) CREDIT: .50 CREDIT PREREQUISITE: N/A

We will never be able to settle which comic universe is better, but we can try! Join us in sifting through illustrations, words, and movies to explore the world of comics, manga, and graphic novels. We will take a look at the history of this storytelling form and then jump into the many ways we now mix and match words and pictures to tell convincing stories. We will discuss and debate heroes, supervillains, adventure, and entertainment, and even explore how comics comment on the world we live in!

| E14010** | ACADEMIC ENGLISH 9 |

| Anyone who want | s to expand their writing ability hey |

Anyone who wants to expand their writing ability beyond a TDA, constructed response, or a 5-paragraph essay should try journalism. Here, students learn to become newspaper and magazine writers with the potential to see their names in print in a McDowell publication! Students get to choose their own topics in the areas of opinion, news, feature, or sports writing. Students research, interview, write, revise and publish their stories on a deadline.

E38010** YOUNG ADULT LITERATURE (GRADES 10-12) CREDIT: .50 CREDIT

PREREQUISITE: N/A

The goal of the Young Adult Literature course is for students to see themselves in the novels they read, analyze how authors craft character identities, build empathy for the world they interact in, and, ultimately, grow within their own identities. Students will read a wide variety of current YA novels that focus on identity/coming of age. This class is for avid readers and will largely be structured through independent reading time, inquiry discussions, and project-based activities.

E44010** ACADEMIC ENGLISH 12 CREDIT: 1.00 CREDIT PREREQUISITE: N/A

Academic English 12 focuses on the mastery of the Pennsylvania Core Standards for English Language Arts of reading, writing, speaking, and listening. Literacy skills in both print and non-print media are developed. Students will read representative selections of English literature. The composition component of the course is directed toward both expository and research writing. Vocabulary study supplements both the reading and writing components of the course. Emphasis on written and spoken communication skills provides opportunities to prepare for post-secondary experiences.

AP® ENGLISH LITERATURE AND COMPOSITION 12 (GRADE 12) 1.00 CREDIT

CREDIT: PREREQUISITE:

A "B" AVERAGE IN AP® ENGLISH LANGUAGE AND COMPOSITION 11 <u>AND/OR</u> A RECOMMENDATION FROM THE 11TH GRADE TEACHER

This AP® course follows the College Board Advanced Placement® curriculum and prepares students to take the Advanced Placement® Exam in May. This course develops specific analytical approaches to literature. The course includes an emphasis on various types of writing based upon a college text on composition. In addition to reading from various genres, students will concentrate on literary devices in the specific works studied utilizing meta-cognitive tools for reading. This concentration involves taking at least four AP® practice exams with the intention of preparing students to take the AP® Exam. Students are required to write 2 essays per quarter of 500 words or 5 paragraphs based on the works covered during that quarter. Additional in-class assignments include written reflections, journals, text summaries, and research based upon the cognitive dimension. Some works of literature studied in the AP® English 12 course are read in the summer preceding the AP® English course. Students who choose to participate in an AP® course will be required to take the AP® Exam for that course.

Juniors (mostly second semester) with an unweighted GPA of 3.5 and Seniors with an unweighted GPA of 3.25 may attend college courses (either at a local college campus or an RCI site). The college course and grade earned will be placed on the high school transcript. Where school dismissal is required to attend such classes, the schedule at McDowell shall be adjusted. See your counselor in Guidance for more information.

Family and Consumer Sciences

F10510 **CREDIT:**

EXPLORING CULINARY ARTS (GRADES 9-12) .50 CREDIT

PREREQUISITE: N/A

Exploring Culinary Arts is an introductory course in foods and nutrition. Students will have the opportunity to cook in each unit, as well as participate in food preparation demonstrations and various classroom activities. Units will include Safety & Sanitation, Kitchen Tools & Techniques, Kitchen Appliances, Microwave Cooking, Basic Nutrition, Menu Planning, and Grocery Shopping.

F10810

LIFETIME NUTRITION (GRADES 9-12)

50 CREDIT **CREDIT:** PREREQUISITE: N/A

Lifetime Nutrition is a course based on a wide range of cooking experiences. Students will have the opportunity to learn and practice culinary techniques from all food groups, including grains, fruits, vegetables, dairy, eggs, and proteins. Special diets for health concerns will also be addressed in this course.

CREATIVE COOKING (GRADES 9-12) F11210 CREDIT: .50 CREDIT PREREQUISITE: N/A

Creative Cooking is a culinary course focusing on advanced cooking techniques and ingredients. Students will prepare recipes from the following units: Meats, Poultry, Beans, Soups, Stocks, Sauces, Spices and Herbs, Salads and Dressings, Casseroles, Appetizers, Party Planning, and Entertaining.

BAKING & PASTRY ARTS (GRADES 9-12) F11610 CREDIT: .50 CREDIT PREREQUISITE: N/A

This course is designed to enhance the students' knowledge of baking techniques and ingredients. They will have the opportunity to explore the creative aspects of baking to include the following units: Breads, Cakes and Cake Decorating, Pies, Pastries, Cookies, and Candies.

F12010 FASHION & FABRICS 1 (GRADES 9-12) **CREDIT:** .50 CREDIT PREREQUISITE: N/A

This course is designed to introduce the student to the world of fashion and clothing construction techniques. Students will be able to apply the principles of design to fashion and fabrics while completing a variety of sewing projects.

F21610

BAKING AND PASTRY ARTS 2 (GRADES 10-12)

CREDIT: PREREQUISITE:

.50 CREDIT "B" OR BETTER IN BAKING AND PASTRY ARTS

Baking and Pastry Arts 2 is an upper-level course that provides indepth work in various baked goods and confections, which require skills, techniques, and knowledge from Baking and Pastry Arts. Each unit will focus on a specific skill in baking and the student's ability to use that skill successfully and creatively to make, create, and/or modify a variety of baked and dessert products. Students will learn how to apply the principles of baking to produce quality products while focusing on visual appeal, taste, texture, and nutritional content. Students will be tasked researching baked goods to create their own recipes to achieve desired outcomes, including nutritional aspects. The students will be equipped to prepare a variety of baked goods and varying degrees of difficulty for a variety of occasions in their lives

FASHION & FABRICS 2 (GRADES 9-12) F22010 **CREDIT:** .50 CREDIT PREREQUISITE: **FASHION & FABRICS 1**

This course is offered to students who successfully completed Fashion and Fabrics 1. The students will advance their sewing skills while applying a creative approach to the world of fashion. Students will expand their skills on the conventional sewing machine and become proficient on the serger and embroidery machines.

F23010 **EDUCATION PROFESSION LEVEL 1** (GRADES 9-12) **CREDIT:** 1.00 CREDIT

PREREQUISITE: **CLEARANCES REQUIRED**

This course is designed to help students prepare for a career in early childhood education or to simply learn more about children in general. The curriculum teaches techniques to guide children through a variety of daily experiences in safe, educational ways. Success in working with children begins by understanding children. This course begins with an overview of the physical, intellectual, social, and emotional characteristics of young children. The curriculum goes on to teach practical techniques for guiding children as one establishes rules and handles daily routines. In addition, students will learn techniques for keeping children safe, healthy, and nourished, as well as learning to provide experiences and lessons that build children's enthusiasm for learning. Also, students will spend time observing and doing fieldwork in our on-site preschool. Please note, there are student fees required for this course. See guidance for details.

CAREER EXPLORATION (GRADES 10-12) F27010 **CREDIT:** .50 CREDIT PREREQUISITE: N/A

This course guides students through an informed career decisionmaking process, which includes several self-awareness experiences, and directs them through career research, post-secondary education research, and a budget and lifestyle component. Students research careers they are interested in, and they complete a final exam project that incorporates the career choice as well as other course experiences and information. It is recommended this course be taken during the 10th and 11th grade year.

FABRIC ENTREPRENEURSHIP F32010 (GRADES 10-12) CREDIT: 1.00 CREDIT

PREREQUISITE: FASHION & FABRICS 1 & 2

This class allows students to further develop their skills and techniques related to clothing construction. Students will continue to complete various projects and performance tasks while furthering their construction skills. Emphasis will be placed on concepts and skills associated with entrepreneurship in related areas of Fashion and Fabrics. Students will operate an existing business, Trojan Tailors while advancing their skills in alteration, embroidery, and product design. A wide variety of career opportunities related to the clothing industry will also be covered.

| F33010 | EDUCATION PROFESSION LEVEL 2 (GRADES 10-12) |
|---------------|--|
| CREDIT: | 1.00 CREDIT |
| PREREQUISITE: | EDUCATION PROFESSION LEVEL 1, "B" |
| | AVERAGE, TEACHER RECOMMENDATION, |
| | CLEARANCES REQUIRED |

This course is a laboratory experience designed for motivated students who have demonstrated effective work habits in Education Profession Level 1 and have a strong interest in possible careers working with children. A student selecting the Education Profession Level 2 course will have the personal opportunity of observing firsthand the concepts taught in Education Profession Level 1, concerning the physical, social, emotional, and cognitive development of the preschool child through observation and teaching of children in a preschool classroom located within our community. This experience also includes planning, children's activities in weekly and daily block plans, teaching lessons to children around various subject areas and themes, maintaining portfolios, completing written observations, and continued work in meeting CDA Competencies. Please note, there are student fees required for this course. See guidance for details.

F34010

SURVIVING AND THRIVING ADULTHOOD (GRADES 11-12)

The Surviving and Thriving Adulthood course is designed to create a smooth transition from high school into the "real world". Students will work through units of study designed to create a foundation of knowledge and skills that will better equip them to handle adult challenges and obstacles. Areas of study will include healthy dating relationships, personal and career success, adult behaviors, and skills. In addition, students will explore current events and participate in service learning opportunities.

F43010 **EDUCATION PROFESSION LEVEL 3** (GRADES 11-12) **CREDIT:** 1.00 CREDIT

PREREQUISITE: EDUCATION PROFESSION LEVELS 1 & 2, **TEACHER RECOMMENDATION -CLEARANCES REQUIRED**

Students who have taken both Education Profession Level 1 and Education Profession Level 2 courses and have obtained the necessary teacher recommendation, may choose to select the Education Profession Level 3. The Education Profession Level 3 is recommended for students who have a sincere interest in pursuing a career in Early Childhood Education, Elementary or Secondary Education, daycare, or related fields dealing with children. The curriculum is designed to help students understand child growth and development through direct interaction with children in a setting where they are with a certified teacher. In-class time is devoted to preparation/completion of the CDA Ready Certificate Requirements. Please note, there are student fees required for this course. See guidance for details.

| G44510 | UNITED STATES ACADEMIC DECATHLON |
| | (GRADE 12 ONLY) |
| CREDIT: | .50 CREDIT |
| PREREQUISITE: | N/A |
| This course is open to any 9th-12th grade student who would like | |

This course is open to any 9th-12th grade student who would like to participate in the United States Academic Decathlon competitions. The topics of study include Language & Literature, Fine Arts, Music, Mathematics, Science, Economics, Social Science, Essay, Interview, Prepared Speech, and Impromptu Speech. This course is definitely NOT designed solely for honors students. In order for McDowell to compete successfully, students are needed from all academic levels: Honors (GPA 3.75-4), Scholastic (GPA 3.0-3.74), and Varsity (GPA 3.0 and below). Participation in United States Academic Decathlon League affords all students, regardless of GPA, the opportunity to earn college scholarships as well as other awards. Former participants will also attest to the benefit they have gained in their study skills and personal communication skills because of USAD. Students may also participate individually in the program without being in the class with the prior permission from the instructor.

Note: This is an extracurricular activity as well as a class, and students should not sign up for the class unless they are prepared to meet after school and occasional weekends.

|---------------|-----------------------------|
| G37610 | DAILY LIVING (GRADES 11-12) |
| CREDIT: | 1.00 CREDIT |
| PRERECUIISITE | IFP |

Students needing instruction with personal care and developing independent skills at home and in the community will be scheduled for this elective course. Topics may include personal hygiene, basic cooking, daily schedules, cleaning, laundry, grocery shopping, and self-advocacy. Field trips into the community to practice and develop these skills will be a part of the curriculum.

| G17710 | WORK SKILLS (GRADES 9-10) |
|---------------|----------------------------|
| G37710 | WORK SKILLS (GRADES 11-12) |
| CREDIT: | 1.00 CREDIT |
| PREREQUISITE: | IEP |

Students needing a high level of support to develop employable skills will be scheduled for this elective course. Instruction will focus on the development of soft skills and hard skills for the workplace. Work experiences in school and in the community will be a part of the curriculum.

G24030**AP® SEMINAR (GRADES 10-11)CREDIT:1.50 CREDITPREREQUISITE:ADMINISTRATIVE APPROVAL REQUIRED

AP® Seminar is a foundational course that engages students in cross-curricular conversations where they can explore the complexities of academic and real-world topics and issues by analyzing divergent perspectives. Using an inquiry framework, students practice reading and analyzing articles, researching foundational, literary, and philosophical texts; listening to and viewing speeches, broadcasts, and personal accounts; and experiencing artistic works and performances. They synthesize information from multiple sources, develop their own perspectives in written essays, and design and deliver oral and visual presentations, both individually and as a team. Ultimately, the course aims to equip students with the power to analyze and evaluate information with accuracy and precision so they can craft and communicate evidence-based arguments. Students who choose to participate in an AP® course will be required to take the AP® Exam for that course.

G29110 INDEPENDENT STUDY (GRADES 9-10) G39110 INDEPENDENT STUDY (GRADES 11-12) CREDIT: .50 CREDIT PREREQUISITE: APPLICATION PROCESS

Independent Study is a program that is available for students who wish to pursue an in-depth study of a particular topic. Both teacher and student-designed programs are available and scheduled by quarter/semester only. Students may earn a maximum of one credit, per year, for independent study. The course will be Pass/Fail and will not be included in class rank, but will count as an elective credit for graduation. A PowerPoint presentation must be produced to explain your independent study project. The student must complete Independent Study paperwork and be approved before Independent Study can be placed on a students' schedule. **Independent Study will not be scheduled until approved.** Contact the Guidance Office for further information.

G30510 ACADEMIC SUPPORT (GRADES 11-12) CREDIT: .50 CREDIT PREREQUISITE: IEP

Students with academic needs will schedule this elective course. This program provides reinforcement and support for the student and develops study skills and learning strategies in the content areas. Taking this course will help students develop organizational skills, a greater understanding of their own learning styles, and develop learning strategies. Grading is Pass/Fail.

G33510 CURRENT EVENTS (GRADES 11-12) CREDIT: .50 CREDIT PREREQUISITE: IEP

Students requiring a higher level of instruction to understand current events will be scheduled for this course. Topics will be focused on current local, state, and national events and how it impacts the individual.

G44030** CREDIT:

AP® RESEARCH (GRADE 12) 2.00 CREDIT

PREREQUISITE: ADMINISTRATIVE APPROVAL REQUIRED AP® Research allows students to deeply explore an academic topic, problem, or issue of individual interest. Through this exploration, students design, plan, and conduct a yearlong investigation to address a research question. In the AP® Research course, students further develop the skills acquired in the AP® Seminar course by learning research methodology, employing ethical research practices, and accessing, analyzing, and synthesizing information. Students reflect on their skill development, document their processes, and curate the artifacts of their scholarly work through a process and reflection portfolio. Students who choose to participate in an AP® course will be required to take the AP® Exam for that course.

| G48510 | INTERNSHIP/JOB SHADOWING |
|--------|--------------------------|
| | (GRADES 11-12) |

CREDIT: .50 CREDIT PREREQUISITE: 2.0 GPA AND 90% ATTENDANCE RATE

Internship is an opportunity for students to get outside the walls of McDowell and job shadow in a field they have an interest in learning more about and/or pursuing after graduation. It is an opportunity to gain real-world experience, build community connections, develop professional skills, and looks great on a transcript and resume. Students will shadow 4 hours per week during Monday-Thursday. Every Friday, students report to class for instruction/reflection/ experience sharing. Students are required to find their own replacement and must provide their own transportation. Students can take this elective for a max of 2 quarters, with a different shadowing experience each quarter.

| G48610 | MCDOWELL MANUFACTURING INTERNSHIP |
|---------|-----------------------------------|
| | (GRADES 11-12) |
| CREDIT: | .50 CREDIT |
| | |

PREREQUISITE: 2.0 GPA AND 90% ATTENDANCE RATE

This course is an opportunity for students to develop new and additional career awareness and career education activities to better prepare for the workplace and post-secondary education. Students with specific career objectives are matched with related employment experiences as they will be creating real parts for local manufacturing companies and adding value to the local supply chain. Schedules are individualized based on employer and student needs. Students will be doing their internship in the McDowell Manufacturing Lab located on the McDowell campus.

Mathematics

| M11010 | MATH (GRADES 9-12) |
|-------------------|--------------------------------------|
| CREDIT: | 1.00 CREDIT |
| PREREQUISITE: | TEACHER RECOMMENDATION |
| OTHER INFO: | CAN BE TAKEN MORE THAN ONCE |
| This course rovie | we math computation and word problem |

This course reviews math computation and word problems while introducing algebraic concepts using manipulatives and guided practice. Students engage with the material through large-group, small -group, and independent work. These mathematical skills will be applied in real-life situations as students engage in career and vocational training in the community.

| M12010** | MATH 1 (GRADE 9) |
|---------------|------------------|
| CREDIT: | 1.00 CREDIT |
| PREREQUISITE: | IEP |

This course is designed for students who need additional support with the Algebra 1 curriculum. The Math 1, Math 2, and Math 3 courses provide the full Algebra 1 curriculum. Students are scheduled for this course by recommendation from an advisor or counselor.

M13910A** ACADEMIC ALGEBRA 1 Part A CREDIT: **1.00 CREDIT** PREREQUISITE: N/A

This course is designed for students who have shown sufficient knowledge of fundamental operations and Pre-algebra concepts. Students will begin learning concepts of algebra including a thorough review of Pre-algebra skills, solving equations and inequalities, linear functions, and systems of equations. Students who complete this course successfully will be scheduled into Algebra 1 Part B.

ACADEMIC ALGEBRA 1 Part B M13910B** **CREDIT:** 1.00 CREDIT PREREQUISITE: SUCCESSFULL COMPLETION OF ALGEBRA 1 PART A

This course is designed for students who have completed Algebra 1 Part A successfully. Students will finalize their learning of concepts of algebra including solving systems of equations, working with exponents and radicals, investigating data analysis and probability, and solving with polynomials. Students who complete this course successfully will be prepared for Geometry and Algebra 2.

M14010** ACADEMIC ALGEBRA 1 **CREDIT:** 1.00 CREDIT PREREQUISITE: RECOMMENDATION FROM AN ADVISOR **OR COUNSELOR**

Algebra 1 is a one-semester, one-credit course designed as a beginning study of Algebra. The course introduces students to variables, algebraic expressions, functions, linear equations and inequalities, linear systems, polynomials, probability, and data analysis while giving students the opportunity to explore and solve real-world application problems.

| M22010** | MATH 2 (GRADE 10) |
|--------------|-------------------|
| CREDIT: | 1.00 CREDIT |

Honors Algebra 2 is a one-semester, one-credit course that introduces students to advanced functions, while emphasizing problem-solving and reasoning. Students will engage in a study of functions, linear equations, systems, matrices, polynomials, rational expressions and equations, quadratics, exponential and logarithmic functions, series and sequences, probability, and statistics and will apply this learning to solve real-world mathematical problems

| M34720 |
|---------|
| CREDIT: |

HONORS FINANCIAL ALGEBRA (GRADES 11-12) 1.00 CREDIT

PREREQUISITE: ACADEMIC ALGEBRA 2 <u>OR</u> HONORS ALGEBRA 2

This honors-level course is designed to empower students with the mathematical skills and financial knowledge necessary to navigate the complex world of personal finance and make informed decisions about their financial futures. The course combines fundamental algebraic concepts with practical applications in the context of personal finance, investments, and economics.

M42010 CONSUMER MATHEMATICS (GRADE 12) CREDIT: 1.00 CREDIT PREREQUISITE: N/A

This course is designed for students who plan to complete their fourth credit in mathematics outside the traditional college preparatory curriculum. Mathematical procedures will be applied to everyday consumer problems. Units will include budgeting, banking, earning and spending money, taxes, and managing household and travel expenses.

M45010** ACADEMIC TRIGONOMETRY/ALGEBRA 3 CREDIT: 1.00 CREDIT PREREQUISITE: AT LEAST A "C" AVERAGE IN ALGEBRA 2 AND GEOMETRY WITH A TEACHER RECOMMENDATION

This course is designed for students who are college bound and/or contemplate math or science-related careers. The depth and difficulty of problems demand that computations be completed with speed and accuracy, which will be a focal point of this course. College-bound students who contemplate math or science-related careers are encouraged to take this course to expand their problem-solving and analyses skill sets.

| M46020** | HONORS PRE-CALCULUS/TRIGONOMETRY |
|-------------------|---|
| CREDIT: | 1.00 CREDIT |

| | ALGEBRA 2 OR AT LEAST A "B" AVERAGE |
| | IN TRIGONOMETRY/ALGEBRA 3 WITH A |
| | TEACHER RECOMMENDATION |
| This course is de | esigned to effectively prepare the college-hour |

This course is designed to effectively prepare the college-bound student with the appropriate math skills, manipulative methods, and concept comprehension requisite to successfully study calculus. It is a blending of the major topics from Algebra 3, Trigonometry, and Analytical Geometry. Students needing to study calculus in the pursuit of their careers would benefit from this course. These fields of study include engineering, science, mathematics, business, medicine, finance, economics, architecture, and education.

M50030 MATHEMATICS DUAL ENROLLMENT CREDIT: 1.00 CREDIT PREREQUISITE: CRITERIA LISTED BELOW AND PRINCIPAL PRE-APPROVAL

Juniors (mostly second semester) with an unweighted GPA of 3.5 and Seniors with an unweighted GPA of 3.25 may attend college courses (either at a local college campus or an RCl site). The college course and grade earned will be placed on the high school transcript. Where school dismissal is required to attend such classes, the schedule at McDowell shall be adjusted. See your counselor in Guidance for more information.

M56020** HONORS CALCULUS CREDIT: 1.00 CREDIT PREREQUISITE: AT LEAST A "B" AVERAGE GRADE IN HONORS PRE-CALCULUS WITH TEACHER RECOMMENDATION

Honors Calculus is a full credit course offered to those students with high math aptitude and mastery of acquired prerequisite math skills. The curriculum will be similar to an introductory college-level course including functions, graphs, limits, derivatives, integrals, applications, modeling, and use of technology. Students who need to study calculus in college will benefit from this course. These include students majoring in science, business, mathematics, engineering, medical, and computer-related fields. M56030S** CREDIT: M56030Y** CREDIT: PREREQUISITE: AP® CALCULUS AB (GRADES 11-12) 1.00 CREDIT—SEMESTER AP® CALCULUS AB (GRADES 11-12) 2.00 CREDIT—YEARLONG "A" AVERAGE IN HONORS PRE-CALCULUS WITH A TEACHER RECOMMENDATION

A Pre-calculus packet must be completed prior to the first day of class. This packet will be available in the Guidance Office once the course is added to a student's schedule. Calculus AB includes topics equivalent to most college level Calculus 1 and some Calculus II. This course will follow the College Board Advanced Placement® Exam in May. It is offered to those students with exceptional math aptitude and mastery of algebraic, geometric, trigonometric, analytical, and calculator skills. Modern themes of the revised AP® curriculum to be emphasized include multi-representational approaches of functions, graphs, limits, derivatives, integrals, applications, modeling, and use of technology. Test-taking strategies requisite for successful performance on the AP® Exam will be emphasized throughout the course. Students who choose to participate in an AP® course will be enguired to take the AP® Exam for that course.

M57010** PROBABILITY AND STATISTICS (GRADES 11-12) CREDIT: 1.00 CREDIT PREREQUISITE: AT LEAST A "B" IN ALGEBRA 2 OR HIGHER This is a course designed to effectively prepare college-bound

This is a course designed to effectively prepare college-bound students with the appropriate statistical tools and theory necessary to collect and analyze data wisely. The students will also be able to use the data to draw the appropriate inferences for populations and regarding hypothesis testing. Students interested in pursuing a career in technology, medicine, engineering, business, economics, nursing, mathematics, psychology, sociology, or education will benefit from this elective.

M57020**

HONORS PROBABILITY AND STATISTICS (GRADES 11-12) 1.00 CREDIT

CREDIT: PREREQUISITE:

"A" OR "B" IN HONORS ALGEBRA 2 OR HIGHER MATH WITH A TEACHER RECOMMENDATION

This is a course designed to effectively prepare college-bound students with the appropriate statistical tools and theory necessary to collect and analyze data wisely. The students will also be able to use the data to draw the appropriate inferences for populations and regarding hypothesis testing. Topics are presented at an accelerated pace and in greater depth than the academic course. Students interested in pursuing a career in technology, medicine, engineering, business, economics, nursing, mathematics, psychology, sociology, or education will benefit from this elective.

M57030** CREDIT: PREREQUISITE:

AP® STATISTICS (GRADES 10-12) 1.00 CREDIT "A" OR "B" IN HONORS ALGEBRA 2 OR HIGHER MATH WITH A TEACHER RECOMMENDATION

AP® Statistics involves the study of four main areas: exploring data, sampling and experimentation, anticipating patterns using probability, and statistical inference. This is **not** Calculus-based statistics. The materials presented will allow the students to not only calculate the data but also interpret and communicate the data effectively. This course, unlike other math courses, requires the students to read the text and answer questions with written explanations on a daily basis. In addition to reading, the students will also learn through a variety of discovery, group and calculator activities that allow the students to develop their own understanding at a higher level of thinking. **Students who choose to participate in an AP® course will be required to take the AP® Exam for that course.**

 M58030**
 AP® CALCULUS BC (GRADES 11-12)

 CREDIT:
 1.00 CREDIT

 PREREQUISITE:
 HONORS OR AP® CALCULUS WITH A

 TEACHER RECOMMENDATION REQUIRED

Calculus BC includes topics equivalent to most college level Calculus I, II, and some Calculus III. Through the use of the unifying themes of derivatives, integrals, limits, approximation and applications, and modeling, the course becomes a cohesive whole rather than a collection of unrelated topics. The course emphasizes a multi-representational approach to calculus, with concepts, results, and problems being expressed graphically, numerically, analytically, and verbally. The connections among these representations also are important. Students who choose to participate in an AP® course will be required to take the AP® Exam for that course.

NOTE:

Students are not able to take two math courses in one school year without teacher recommendation, administrative approval, and parent consent.

****NCAA APPROVED COURSE**

Science

| C10010 | SCIENCE |
|---------------|-------------|
| CREDIT: | 1.00 CREDIT |
| PREREQUISITE: | IEP |

Students with academic needs will schedule this elective course. The course focuses on developing science skills and understanding used in real life situations.

| C14110** | ACADEMIC ENVIRONMENTAL SCIEN (GRADE 9) | |
|----------|---|--|
| CREDIT: | 1.00 CREDIT | |

PREREQUISITE: TEACHER RECOMMENDATION The environmental science student at McDowell will study earth processes and resources and evaluate how human use of those resources impacts the environment. Topics include plate tectonics, earth's resources, land use, watersheds, sustainability and climate change. By the end of the course, students will have a better understanding of how to live more sustainably in order to balance environmental protection and the development of human society.

C15510 EARTH AND SPACE SCIENCE (GRADES 9-12) CREDIT: .50 CREDIT PREREQUISITE: NOT FOR STUDENTS WHO HAVE TAKEN EARTH AND SPACE SCIENCE 1.0 CREDIT

In this course, students will examine concepts through experimentation and research. These topics may include but are not limited to Astronomy, Meteorology, and Geology. In Astronomy, possible topics include the universe, galaxies, stars, motions of the Earth, moon phases, and the Solar System. In meteorology, topics may include air and atmosphere, weather conditions, and severe storms. In Geology, topics may include weathering and erosion, Earth's history, and rocks and minerals.

C22010**APPLIED BIOLOGYCREDIT:1.00 CREDITPREREQUISITE:TEACHER RECOMMENDATION

Biology is designed to meet the state standards of biological sciences. The emphasis of this course is on the characteristics of life, classification of living things, the chemical and cellular basis of life, genetics, evolution, and ecology. The course includes laboratory experiences and frequent quizzes. Students are expected to keep an organized binder and to be able to work both in groups and independently. Students will take the Keystone Biology Exam upon completion of the course.

C24010** ACADEMIC BIOLOGY CREDIT: 1.00 CREDIT PREREQUISITE: TEACHER RECOMMENDATION

Academic Biology meets the state standards for biological sciences and offers a broad survey of biology with emphasis on the characteristics of life, classification of living things, the chemical and cellular basis of life, microscopy, genetics, DNA technology, evolution, and ecology. Students are expected to keep an organized notebook, complete independent reading of the text, apply analytical skills in laboratory investigations, and demonstrate high motivation. Students will take the Keystone Biology Exam upon completion of the course.

C24020** HONORS BIOLOGY (GRADES 9-10) CREDIT: 1.00 CREDIT PREREQUISITE: AN "A" IN GRADE 8 SCIENCE AND AN "A" OR "B" IN GRADE 8 HONORS ENGLISH LANGUAGE ARTS

Honors Biology is designed for college-bound students who have maintained an "A" or "B" average in previous honors level math and science classes. Students are expected to have a strong interest in science as well as a desire to challenge themselves. The course stresses the depth of subject matter to begin to prepare students for future biology courses while covering the state standards for biological science. Students experience a rigorous study in the areas of biochemistry, cytology, genetics, and evolution, enhanced by in-depth laboratory investigations. Students will take the Keystone Biology Exam upon completion of the course.

C25030** CREDIT: PREREQUISITE: AP® BIOLOGY (GRADES 11-12) 2.00 CREDIT HONORS BIOLOGY (FINAL GRADE OF "B" OR HIGHER) <u>AND</u> HONORS/AP CHEMISTRY (FINAL GRADE OF "B" OR HIGHER) WITH PRE-APPROVAL FROM THEIR CURRENT SCIENCE INSTRUCTOR. RECOMMENDED COMPLETION OR CONCURRENT ENROLLMENT IN A STATISTICS COURSE.

AP® Biology is a rigorous course focusing on enduring, conceptual understandings and the content that supports them. Students will spend a large amount of time on inquiry-based learning of essential concepts, develop reasoning skills necessary to engage in the "6 Science Practices", and is laboratory intensive. Students who take AP® Biology will also develop advanced inquiry and reasoning skills, such as designing a plan for collecting data, analyzing data, applying mathematical routines, and connecting concepts in and across domains. The result will be readiness for the study of advanced topics in subsequent college courses. The AP® Biology course is equivalent to a two-semester college introductory biology course covering four "Big Ideas": Evolution, Cellular Processes, Genetics & Information Transfer, and Biological Interactions. This AP® course will follow the College Board Advanced Placement® curriculum and will facilitate students preparing to take the Advanced Placement® Exam. **Students who choose to participate in an AP® course will be required to take the AP® Exam for that course.**

C28010** CSI FORENSIC SCIENCE (GRADES 11-12) CREDIT: .50 CREDIT PREREQUISITE: AN "A" OR "B" IN ACADEMIC/HONORS BIOLOGY

The focus of this laboratory intensive, upper-level course will be to introduce students to some of the specialized fields of forensic science, the principles of science and technology upon which they are based, and the application of these principles to various analyses of crime scene evidence. Students will examine forensic sciences, criminal cases, and the law from an interdisciplinary approach. Students will be exposed to tools and techniques employed by forensic science, expert witnesses, and the application of forensic science to the law. Example topics include History of Forensic Science, types of evidence; crime scene investigation, latent fingerprints; trace evidence; hair and fiber analysis; soil and glass analysis; blood and serology; DNA analysis; drugs and toxicology; human remains; firearms, tool marks, and impressions; forensic entomology and decomposition. Other possible topics include fraudulent document identification, as well as fire and explosives examination. The laboratory experience will involve analyses based on methods such as observation; thin-layer chromatography, microscopic examination and evaluation; forensic photography; latent fingerprint lifting and analysis; density and refractive index of glass; luminal detection of blood, blood spatter analysis, ABO and Rh blood typing, DNA extraction and gel electrophoresis; measurement and comparison. Students will be required to complete "Crime Reports" based on evidence they have collected.

C31010** SCIENCE IN THE COMMUNITY CREDIT: 1.00 CREDIT PREREQUISITE: IEP

Science in the Community is the hands-on practical study of scientific principles in the real world. Students will study concepts and principles in the area of general science by conducting experiments and laboratory activities.

C32010** APPLIED CHEMISTRY CREDIT: 1.00 CREDIT PREREQUISITE: TEACHER RECOMMENDATION

In this course each unit presents a science-technology-society problem or issue then develops the chemistry concepts that help to resolve the issue. The course focuses on 4 units that explore fundamental chemistry concepts: Water: Exploring Solutions, Materials: Structure and Uses, Petroleum: Breaking and Making bonds, and Air: Chemistry and the Atmosphere.

MECHANICAL SCIENCE (GRADES 11-12) C33010** CREDIT: **1.00 CREDIT**

PREREQUISITE: N/A

This course emphasizes hands-on laboratory analysis, with a focus on problem-solving abilities and communication. Students will collaborate to investigate simulations of experiences in the science industry. The physical science course will examine topics such as coding, electroplating, innovation through work in the fields of physics, chemistry, manufacturing, and engineering. Students will be given real-world scenarios that will duplicate situations experienced in the industry. The students will then be required to work together with groups, assuming varied roles in the group to interpret data, evaluate situations, create solutions and propose changes based on the simulated scenarios.

C33510** **CONSERVATION SCIENCE (GRADES 11-12)** CREDIT: **1.00 CREDIT** PREREQUISITE: N/A

Students will develop skills, build an understanding of science and learn scientific techniques taught through the lens of conservation with an emphasis on hands-on, real-world activities. The curriculum focuses on wildlife conservation and the outdoor recreational activities that financially support the North American model of Wildlife Conservation, such as hunting, fishing, trapping, conservation work, shooting sports, and boating.

OTHER INFO:

PREREQUISITES TAKEN EARLY Human Anatomy & Physiology is an elective course offered to students who are interested in the health and science-related fields after graduation. These include such areas as a medical doctor, physician assistant, nursing, physical therapy, occupational therapy, dentistry, x-ray technician, exercise science, mortuary, and many others. Students will learn about evidence-based medicine and the human body (integumentary, skeletal, muscular, digestive, respiratory, cardiovascular, urinary, and reproductive systems) in depth. There is extensive lab time spent with small mammal (fetal pig/cat/mink) dissection, organ (heart, eye, kidney, etc.) dissections, models, charts, and personal physiology. Students are required to complete all dissections and coursework. This class is taught at the level of a firstyear college Anatomy & Physiology course.

C37010** **ENVIRONMENTAL ISSUES (GRADES 10-12)** CREDIT: .50 CREDIT PREREQUISITE: NOT FOR STUDENTS WHO HAVE **COMPLETED ENVIRONMENTAL SCIENCE**

The environmental issues student at McDowell will evaluate how human use of resources impacts the environment. Topics include watersheds, sustainability and climate change. By the end of the course, students will have a better understanding of how to live more sustainably in order to balance environmental protection and the development of human society.

C37030** CREDIT:

AP® ENVIRONMENTAL SCIENCE (GRADES 10-12) 1.00 CREDIT **RECOMMENDATION FROM** PREREQUISITE:

HONORS BIOLOGY TEACHER

The goal of the AP® Environmental Science course is to provide students with the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world, to identify and analyze environmental problems both natural and human -made, to evaluate the relative risks associated with these problems, and to examine alternative solutions for resolving or preventing them. Students who choose to participate in an AP® course will be required to take the AP® Exam for that course.

SOCIAL STUDIES 1.00 CREDIT

Students with academic needs will schedule this elective course. The course focuses on developing social studies skills and understanding used in real life situations.

S14110** ACADEMIC WORLD GEOGRAPHY CREDIT: 1.00 CREDIT PREREQUISITE: N/A

IFP

The purpose of 9th grade World Geography is to develop an understanding of geographical elements (physical, economic, political, human, and cultural) that contribute to the world we live in. Students will demonstrate knowledge of how these features make world regions distinct but will also determine how we contribute to a global society. Students will exhibit their understanding by successfully mastering a variety of geographic skills.

S14120** HONORS WORLD GEOGRAPHY CREDIT: 1.00 CREDIT PREREQUISITE: CRITERIA IS BASED ON PREVIOUS ACHIEVE-MENT AND TEACHER RECOMMENDATION

This course is an honors level course that will develop an understanding of geographical elements (physical, economic, political, human, and cultural) that contribute to the world we live in. Students will demonstrate knowledge of how these features make world regions distinct but will also determine how we contribute to a global society. Students will exhibit their understanding by successfully mastering a variety of geographic skills. This course is designed for college-bound students with higher level thinking skills. Students will be required to engage in oral reporting, in-depth reading, library research, and major projects.

S18010POSITIVE PSYCHOLOGY (GRADES 9-12)CREDIT:.50 CREDITPREREQUISITE:N/A

Positive Psychology uses scientific methods to study and develop ways for people and communities to thrive. This course will look at the history and development of the field of positive psychology as well as introduce students to the important psychologists in this field. Students taking this course will have the ability to practice researched based methods to improve their mental well-being and learn about the science behind developing habits and engaging in activities and thought processes that can lead to a more meaningful life. Students taking this course must be willing to try to implement various methodologies (gratitude journal, engaging in flow practice) as well as taking online happiness inventories.

S23510** CURRENT ISSUES (GRADES 9-10) CREDIT: .50 CREDIT PREREQUISITE: N/A

This course will introduce students to issues and events that impact our lives in a global and multicultural society. It will focus on the big ideas of how conflict and change affect society at a local, regional, national, and global level. Students will research current economic, political, and social problems and will explore how conflicts affect groups, as well as individuals. Students will analyze, evaluate, and formulate informed positions on topics dealing with business and economics, environmentalism, teenage issues, health and medicine, law and politics, science and technology, ethics, society and culture, and war and diplomacy. Students will participate in tasks such as debates, discussions, and presentations.

S23710** INTRODUCTION TO CRIMINAL JUSTICE (GRADES 9-12) CREDIT: .50 CREDIT

PREREQUISITE: N/A

The purpose of this course is to provide an overview of three major areas of the criminal justice system: Law Enforcement, Courts, and Corrections. Students will explore the process of criminal investigations, functions of local, state, and federal courts, and individual rights. The course will require students to apply content using critical thinking and logical reasoning.

S24110** ACADEMIC WORLD HISTORY 10 CREDIT: 1.00 CREDIT PREREQUISITE: N/A

This is an academic level course that covers U.S. History and World History through the 19th and early 20th centuries. The course will cover political, economic, geographic, cultural, and legal developments of the time periods. Students will engage in a variety of learning activities including class discussion, oral presentations, library research, and instruction utilizing computer/internet resources. This course will prepare students for post-secondary experiences.

S24120** CREDIT: PREREQUISITE:

HONORS WORLD HISTORY 10 1.00 CREDIT PLACEMENT IS BASED ON PREVIOUS ACHIEVEMENT AND TEACHER RECOMMENDATION

This is an honors level course that covers U.S. History and World History through the 19th and early 20th centuries. The course will cover political, economic, geographic, cultural, and legal developments of the time periods. This course is designed for college -bound students with higher level thinking skills. Students will be required to engage in oral reporting, in-depth reading, library research, and major projects.

S24130**

AP® WORLD HISTORY: MODERN (GRADES 10-12)

CREDIT: PREREQUISITE:

1.00 CREDIT RECOMMENDATION FROM HONORS WORLD GEOGRAPHY TEACHER

In AP® World History: Modern, students investigate significant events, individuals, developments, and processes from 1200 to the present. Students develop and use the same skills, practices, and methods employed by historians: analyzing primary and secondary sources; developing historical arguments; making historical connections; and utilizing reasoning and comparison, causation, and continuity and change over time. The course provides six themes that students explore throughout the course in order to make connections among historical developments in different times and places: humans and the environment, cultural developments and interactions, governance, economic systems, social interactions and organization, and technology and innovation. Students who choose to participate in an AP® course will be <u>required</u> to take the AP® Exam for that course.

S25030** AP® HUMAN GEOGRAPHY (GRADES 10-12) CREDIT: 1.00 CREDIT PREREQUISITE: RECOMMENDATION FROM HONORS WORLD GEOGRAPHY TEACHER

The AP® Human Geography course is equivalent to an introductory college-level course in human geography. The course introduces students to the systematic study of patterns and processes that have shaped human understanding, use, and alteration of Earth's surface. Students employ spatial concepts and landscape analysis to examine the socioeconomic organization and its environmental consequences. They also learn about the methods and tools geographers use in their research and applications. By the end of the course, students should be more geoliterate, more engaged in contemporary global issues, and more multicultural in their viewpoints. They should have developed skills in approaching problems geographically, using maps and geospatial technologies, thinking critically about texts and graphic images, interpreting cultural landscapes, and applying geographic concepts such as scale, region, diffusion, interdependence, and spatial interaction, among others. Students should see geography as a discipline relevant to the world in which they live; as a source of ideas for identifying, clarifying, and solving problems at various scales; and as a key component of building global citizenship and environmental stewardship. **Students who choose to participate in** an AP® course will be required to take the AP® Exam for that course.

S28110** JUSTICE EDUCATION (GRADES 9-12) CREDIT: .50 CREDIT PREREQUISITE: N/A

This course allows students the opportunity to explore topics such as race relations, terrorism roots, prejudice and bias, genocide, and gender bias. We will explore the dangers presented by the presence of prejudice and hate in the world today and how to become active in preventing such actions. We will also investigate incidents of bias which include any acts against people or property that are motivated by prejudice based on race, religion, ethnicity, sexual orientation, gender social groups, ability or appearance. This course strives to cultivate an appreciation of the positive aspects of diversity in our society today. This course requires students to complete a final project as stipulated in the course syllabus.

S29010**CONSTITUTIONAL LAW (GRADES 10-12)CREDIT:.50 CREDITPREREQUISITE:10TH GRADE SOCIAL STUDIES TEACHER
RECOMMENDATION

Constitutional Law is an in-depth study for juniors and seniors to investigate how the Supreme Court has interpreted the US Constitution over time. This course dives deeply into exploring questions such as "What is freedom of speech?" and "How far does that freedom extend?" "What is freedom of religion?" and "How do the Establishment and Free Exercise Clauses protect it?" "How has the Equal Protection Clause of the Fourteenth Amendment been applied to current issues?" The constitutional text and Supreme Court decisions will guide our inquiry.

S33010** CONTEMPORARY ISSUES (GRADES 11-12) CREDIT: .50 CREDIT PREREQUISITE: N/A

Contemporary Issues will provide students with the opportunity to explore issues and events that impact our lives on an international, national, state and local scale. Through the course, students will also address pressing social issues in their world. Some of those issues will be selected by the teacher and others will be selected by the students. Students will investigate their issues and summarize and present their findings to the class, as well as lead a discussion on their chosen topics. As students address the various topics, they will develop a sense of where things are in the world, nation, state, and region. Students will develop a habit of checking the news at all different levels by accessing a variety of print and online sources. This course provides students with the foundational understanding, knowledge, and skills necessary to develop informed opinions about the global, national, state, and local issues.

S34110** ACADEMIC U.S. HISTORY 11 CREDIT: 1.00 CREDIT PREREQUISITE: N/A

This is an academic course that will provide a survey of the social, political, economic, cultural, and intellectual history of the United States from the Reconstruction era to the present. United States History examines industrialization, immigration, world wars, the Great Depression, Cold War, and post-Cold War eras. Themes that may be addressed include American culture, religion, civil and human rights, technological change, economic change, immigration and migration, urbanization and suburbanization, the expansion of the federal government, and the study of U.S. foreign policy.

S34120** CREDIT: PREREQUISITE:

HONORS U.S. HISTORY 11 1.00 CREDIT ITE: PLACEMENT IS BASED ON PREVIOUS ACHIEVEMENT <u>AND</u> TEACHER RECOMMENDATION

This is an honors course that will provide a survey of the social, political, economic, cultural, and intellectual history of the United States from the Reconstruction era to the present. United States History examines industrialization, immigration, world wars, the Great Depression, Cold War, and post-Cold War eras. The content and pace of themes are generally accelerated, and students will be required to draw upon multiple analysis measures in their daily work. Themes that may be addressed include American culture, religion, civil and human rights, technological change, economic change, immigration and migration, urbanization and suburbanization, the expansion of the federal government, and the study of U.S. foreign policy. Required readings are detailed and require advanced critical thinking and analysis.

S34130** AP® U.S. HISTORY (GRADES 11-12) CREDIT: 1.00 CREDIT PREREQUISITE: RECOMMENDATION FROM HONORS SOCIAL STUDIES TEACHER

In AP® U.S. History, students investigate significant events, individuals, developments, and processes in nine historical periods from approximately 1491 to the present. Students develop and use the same skills, practices, and methods employed by historians: analyzing primary and secondary sources; developing historical arguments; making historical comparisons; and utilizing reasoning about contextualization, causation, and continuity and change over time. The course also provides seven themes that students explore throughout the course in order to make connections among historical developments in different times and places: American and national identity; migration and settlement; politics and power; work, exchange, and technology; America in the world; geography and the environment; and culture and society. Students who choose to participate in an AP® course will be <u>required</u> to take the AP® Exam for that course.

S44010** ACADEMIC U.S. GOVERNMENT 12 CREDIT: .50 CREDIT PREREQUISITE: N/A

This course presents the structure, function, and application of government and political systems at local, state, and federal levels. This course will prepare students for post-secondary experiences. This class requires students to complete an out-of-class project as stipulated in the course syllabus.

S44020** CREDIT: PREREQUISITE:

HONORS U.S. GOVERNMENT 12 .50 CREDIT PLACEMENT IS BASED ON PREVIOUS ACHIEVEMENT <u>AND</u> TEACHER RECOMMENDATION

Honors U.S. Government presents the structure, function, and application of the United States Government and political system with the main focus on the national level with some connections made to the state and local governments. Current events are used as a tool to help students to make connections to concepts and theories taught in the class to the real world situations of today. It provides honor students a faster paced and more challenging government course that expects them to grasp key concepts and information of the course through specified readings and class activities. This class requires students to complete an out-of-class project as stipulated in the course syllabus.

S45530**AP® U.S. GOVERNMENT AND POLITICS
(GRADES 10-12)CREDIT:1.00 CREDITPREREQUISITE:RECOMMENDATION FROM PREVIOUS
SOCIAL STUDIES TEACHER

This introductory college course will follow the College Board Advanced Placement® curriculum and prepare students to take the Advanced Placement® Exam in May. It will focus on the constitutional underpinnings of democracy, political beliefs and behaviors, political parties and interest groups, and mechanisms that facilitate the communication of interests and preferences of like-minded citizens. Also, Congress, the presidency, the bureaucracy, federal courts, institutions and policy processes, civil liberties, and civil rights will be covered. This course requires students to complete an out-of-class project as stipulated in the course syllabus. Students who choose to participate in an AP® course will be required to take the AP® Exam for that course.

S46010** ACADEMIC ECONOMICS 12 CREDIT: .50 CREDIT PREREQUISITE: N/A

This is an academic economics course that covers basic economic theory, comparative economics, consumer economics, and budgeting. This course will prepare students for post-secondary experiences.

S46020** CREDIT: PREREQUISITE:

HONORS ECONOMICS 12 .50 CREDIT PLACEMENT IS BASED ON PREVIOUS ACHIEVEMENT AND TEACHER

RECOMMENDATION This is an honors economics course that covers economic theory, comparative economics, consumer economics, and budgeting. It will provide honors students with a more challenging economics course through reading, writing, and numerous class activities.

S46030**AP® MACROECONOMICS (GRADE 12)CREDIT:1.00 CREDITPREREQUISITE:TEACHER RECOMMENDATION

AP® Macroeconomics provides students with a thorough understanding of the principles of economics. The course looks at the United States economy as a whole, while also investigating how the world's different economies affect each other. This course is designed to help the beginning economics student comprehend the principles essential for understanding the basic economizing problem, with a particular focus on a national income and price-level determination, and the study of other major macroeconomic policies and sectors. Students will be able to understand and apply the economic perspective, to reason accurately and objectively about economics matters, and develop a lasting and relevant interest in economics and the economy. Macroeconomics is a mathematical and technical look at the economy and the course will require an extensive time commitment outside of the classroom dedicated to reading, research, and problem-solving. **Students who choose to participate in an AP® course will be <u>required</u> to take the AP**® **Exam for that course**.

S48010** ACADEMIC PSYCHOLOGY (GRADES 11-12) CREDIT: 1.00 CREDIT PREREQUISITE: N/A

Academic Psychology is an elective course that is geared toward juniors and seniors who wish to explore the fascinating field of psychology. The focus of this academic course will be on important psychological concepts and principles, as well as their practical applications for life. Topics include approaches and history, research methods, biological basis of behavior, sensation and perception, states of consciousness, learning, cognition, motivation and emotion, developmental psychology, personality, abnormal psychology, treatment of psychological disorders, and social psychology.

S48020** CREDIT: PREREQUISITE:

HONORS PSYCHOLOGY (GRADES 11-12) 1.00 CREDIT STRONG PERFORMANCE IN ENGLISH AND

TE: STRONG PERFORMANCE IN ENGLISH AND SOCIAL STUDIES RECOMMENDED

Honors Psychology is an elective course that is geared toward juniors and seniors who wish to undertake a more challenging and indepth investigation into the field. This course uses a college-level textbook. Topics covered are approaches and history, research methods, biological basis of behavior, sensation and perception, states of consciousness, learning, cognition, motivation and emotion, developmental psychology, personality, abnormal psychology, treatment of psychological disorders, and social psychology.

S48030** CREDIT: PREREQUISITE:

AP® PSYCHOLOGY (GRADES 10-12) 1.00 CREDIT RECOMMENDATION FROM HONORS U.S. HISTORY 11, HONORS ENGLISH, OR HONORS SCIENCE TEACHER

This is the most advanced level of psychology designed for grades 10, 11, and 12 who are considering a major/career in psychology and will prepare to take the Advanced Placement® Exam, as well as enjoy the challenge of a college level course. The course follows the College Board Advanced Placement® Curriculum. It is more intense than the honors course and out-of-class expectations are greater. Students who choose to participate in an AP® course will be required to take the AP® Exam for that course.

S50030 CREDIT: PREREQUISITE:

SOCIAL STUDIES DUAL ENROLLMENT 1.00 CREDIT CRITERIA LISTED BELOW AND PRINCIPAL PRE-APPROVED

Juniors (mostly second semester) with an unweighted GPA of 3.5 and Seniors with an unweighted GPA of 3.25 may attend college courses (either at a local college campus or an RCI site). The college course and grade earned will be placed on the high school transcript. Where school dismissal is required to attend such classes, the schedule at McDowell shall be adjusted. See your counselor in Guidance for more information.

S55530**

AP® COMPARATIVE GOVERNMENT AND POLITICS (GRADES 11-12) 1.00 CREDIT

CREDIT: 1.00 CREDIT PREREQUISITE: TEACHER RECOMMENDATION

The AP® Comparative Government and Politics course enables students to learn about diverse political institutions and processes and teaches the tools that citizens need to understand global events. Students are encouraged to think about international politics in a way that enables comparison and generalization and to become more analytical in their understanding of political events. The course content includes a study of six countries-Britain, China, Iran, Mexico, Nigeria, and Russia. Students will utilize the United States as a measure of known concepts before engaging in how terms and concepts apply to the six nations. This AP® course focuses, not only on government systems, but also the economies, environments, institutions, and policies of these nations. Although this is a senior course, juniors will be considered for this course with a teacher recommendation. This AP® course fulfills the requirement for government courses at McDowell. Some supportive resources may be required readings over the summer months preceding the AP® Comparative Government and Politics course. Students who choose to participate in an AP® course will be required to take the AP® Exam for that course.

Technology Education

T11310 CREDIT:

INTRODUCTION TO WOOD & BUILDING TRADES (GRADES 9-12)

.50 CREDIT

PREREQUISITE: N/A In this course, we will cover the basics of tools, safety, machine operation measuring dimensional drawings and print reading along

operation, measuring, dimensional drawings, and print reading along with following procedures and instructions.

T12010FOUNDATIONS OF TECHNOLOGY
DESIGN AND ENGINEERING (GRADES 9-12)CREDIT:1.00 CREDITPREREQUISITE:N/AOTHER INFO:STUDENTS PURSUING ENGINEERING AND
INDUSTRIAL TECHNOLOGY PATHWAY WILL

BENEFIT FROM THIS COURSE (EIT) Students will be introduced to the Engineering Design Process to develop critical, creative thinking, and problem-solving skills. This course provides a meaningful context for learning scientific, mathematical, and technological concepts. Students will be introduced to Engineering Design Software Programs.

T13510 INTRO TO ROBOTICS (GRADES 9-12) CREDIT: 1.00 CREDIT PREREQUISITE: N/A

Intro to Robotics is a full credit high-level course that is appropriate for students who are interested in the design, engineering, and programming of robots or other technical careers. The Intro to Robotics course is designed to explore the past, current, and future use of automation technology in the industry and everyday use. The students will receive a comprehensive overview of robotic systems, the subsystems that comprise them, and how all of the parts work together to form one robot. Students will research, design, and build functioning robots to complete various tasks through remote control and basic programming. Careers in robotics, programming, and engineering will be discussed also. Intro to Robotics focuses heavily on prior knowledge from STEM-related courses and further develops understanding and supports further exploration of STEM in other subject areas.

T14510 INTRODUCTION TO WELDING (GRADES 9-12) CREDIT: .50 CREDIT

PREREQUISITE: N/A

This course will cover the basics of welding. Starting with the MIG welder, we will go over how to choose the correct settings on your welder, several different techniques/positions of welding, the different types of joints, and how to work with different types of metals. Once we finish with the MIG welder, we will then move on to using the stick welder. In this unit, we will cover the different types of welding rods, what they are used for, and how to choose the correct rod for the task at hand.

T15010 MATERIALS MANUFACTURING: METAL TECHNOLOGY 1 (GRADES 9-12) CREDIT: .50 CREDIT

PREREQUISITE: N/A

This beginning metals course introduces students to the basic fundamental metal working process. Areas of content include basic CAD, safety, measuring/layout, sheet metal, machining, welding, foundry, and forging. Students will be working on the required projects. This course is recommended for the pre-engineering student.

T17010

ENVIRONMENTAL AGRICULTURE AND LANDSCAPING (GRADES 9-12) .50 CREDIT

CREDIT: .50 PREREQUISITE: N/A

This course will introduce students to multiple areas of the agriculture field and agricultural practices. Students will develop agricultural knowledge that will allow them to understand the complexity of food and natural resources, sustainable environmental practices, agricultural practices, and agricultural career fields. The study of agriculture will allow students to be active participants and problem solvers in real agricultural issues that affect the community and on a global scale. Through a variety of engaging hands-on lessons, students will develop industry skills and become more aware of their own environment.

T21110 MATERIALS MANUFACTURING: WOOD TECHNOLOGY 2 (GRADES 9-12) CREDIT: 1.00 CREDIT PREREQUISITE: INTRODUCTION TO WOOD & BUILDING TRADES

This course is a continuation of the Materials Manufacturing: Wood Technology 1 course. This course places more emphasis on the engineering and design process. Students will continue to develop critical, creative, and problem-solving skills as they create solutions to designs related to the woodworking industry. This course provides meaningful contexts for learning scientific, mathematical, and technological concepts. Additionally, students will utilize design software programs currently used in the workplace.

T21310 BUILDING TRADES 1 (GRADES 9-12) CREDIT: 1.00 CREDIT PREREQUISITE: INTRO TO WOOD & BUILDING TRADES

Introduces general aspects of building trades, the building process, and its phases. Emphasizes health and safety issues related to the building trades. Explores print reading, building design, building site planning, site preparation, and estimating as it relates to construction. Includes an overview of applicable equipment and materials required in the building trades.

T21510 HOME MAINTENANCE (GRADES 9-12) CREDIT: .50 CREDIT PREREQUISITE: RECOMMENDATION FROM METAL 1 OR WOOD 1 TEACHER

This course provides students with an opportunity to explore the many different areas in construction that relate to home maintenance and repair. Students will develop advanced problem-solving skills as they relate to home repair and essential life skills that will help make them self-reliant in maintaining or updating a residential structure along with basic vehicle maintenance. Examples of projects students will work on are electrical, plumbing, roofing, drywall and including vehicle maintenance projects.

T22110 ARCHITECTURAL DESIGN (GRADES 10-12) CREDIT: 1.00 CREDIT PREREQUISITE: FOUNDATIONS OF TECHNOLOGY DESIGN AND ENGINEERING

This course follows "Foundations of Technology: Design and Engineering". Students will utilize the Engineering Design Process and continue to develop critical, creative, and problem-solving skills as they create solutions to engineering design problems. This course provides meaningful contexts for learning scientific, mathematical, and technological concepts. Additionally, students will utilize design and manufacturing software programs currently used in the workplace.

T23510ROBOTICS 2 (GRADES 10-12)CREDIT:1.00 CREDITPREREQUISITE:RECOMMENDATION FROM
ROBOTICS 1 TEACHER

This course will build upon the foundation knowledge built in Robotics 1. The course will follow the FIRST (For the Inspiration and Recognition of Science and Technology) Robotics curriculum. The students will develop both a robot to meet current year game guidelines and the development of team components such as promotion, travel, fundraising, programming, graphic design, team strategy, and community outreach. This course will provide students with specialized task teams designed to operate in a "business" style setting.

T24510 **ADVANCED WELDING (GRADES 9-12) CREDIT:** .50 CREDIT

PREREQUISITE: **INTRODUCTION TO WELDING**

In this course, we will start with a guick review of the stick welder. Once this is complete, we will move on to the more advanced techniques of using the stick welder and perfecting their skills, as it would be needed in the field. We will then move on to the most difficult form of welding, which is TIG welding. During this unit, we will focus on how to choose the correct setting on your welder and how to control the welding torch. Finally, we will learn how to properly use filler rod to make an aesthetically pleasing and strong weld.

T25010 MATERIALS MANUFACTURING: METAL **TECHNOLOGY 2 (GRADES 9-12) CREDIT** 50 CREDIT

PREREQUISITE: MATERIALS MANUFACTURING: METAL **TECHNOLOGY 1**

This course is designed to give the students an in-depth study of machine metalworking. This course will continue to explore machine metalworking with an emphasis on tolerances and specifications as prescribed by working drawings selected by the instructor. Each student will also be introduced to Mast CAD/CAM and CNC machine prototyping.

BUILDING TRADES 2 (GRADES 9-12) T31310 **CREDIT: 1.00 CREDIT** INTRO TO WOOD & BUILDING TRADES AND BUILDING TRADES 1 PREREQUISITE:

This course is designed for students wishing to enter one of the building trades, such as carpentry, sheet rocking, formwork, concrete work, painting, or other related trades. Areas also included will be electrical, HVAC and plumbing.

T32110 ADVANCED COMPUTER DESIGN AND **MANUFACTURING (GRADES 11-12)** CREDIT: **1.00 CREDIT** PREREQUISITE: **ARCHITECTURAL DESIGN**

This course follows Architectural Design. This course will allow students to focus their study in either the architectural or mechanical design disciplines. The Engineering Design Process will continue to be used to develop critical, creative, and problem-solving skills as they create solutions to engineering design problems. This course incorporates higher level math, science, and technological concepts.

| T36010 | GRAPHICS TECHNOLOGY 1 |
|---------------|------------------------------|
| | (GRADES 11-12) |
| T46010 | GRAPHICS TECHNOLOGY 2 |
| | (GRADES 11-12) |
| CREDIT: | .50 CREDIT |
| PREREQUISITE: | N/A |

To keep pace with technology, a computer-aided design/drafting and graphics course will be offered as a new approach to creative art and geometric design. In this course, students will develop critical thinking and problem-solving skills. This course will integrate the technological and problem-solving methods with the knowledge of math, communications, and their discipline. It will provide students with an opportunity to research, design, develop, build, and evaluate solutions to real-life problems. This information will then be applied in the design process as students work individually and in groups on a number of . design activities.

T41010 **CNC MANUFACTURING (GRADE 12) CREDIT: 1.00 CREDIT** PREREQUISITE: **TEACHER RECOMMENDATION, WOOD 1** AND METAL 1

This course is for the student who would like to advance their knowledge, skills, and capabilities in the use of Master CAD/CAM and CNC woodworking machinery. Topics include safety, speeds, feed, tooling, setups, and programming. The student project will be computer- based design, layout, and machining techniques as used in the industry.

T41310 **BUILDING TRADES 3 (GRADES 9-12) 1.00 CREDIT** CREDIT: PREREQUISITE: INTRO TO WOOD & BUILDING TRADES AND

BUILDING TRADES 1 AND BUILDING TRADES 2 This course is designed for students to create a capstone project that incorporates carpentry, sheet rocking, formwork, concrete work, painting, electrical, HVAC, plumbing, and other related trades.

CREDIT:

INTRODUCTION TO APPLIED **ENGINEERING (GRADES 10-12) 1.00 CREDIT ALGEBRA 2**

PREREQUISITE: **OTHER INFO:**

STUDENTS PURSUING ENGINEERING AND INDUSTRIAL TECHNOLOGY PATHWAY WILL **BENEFIT FROM THIS COURSE (EIT)**

Students interested in engineering as a career will explore hands-on projects. Students must be able to use mathematical and physical science skills to solve engineering problems and apply this knowledge construct models/prototypes. Emphasis will be placed on to developing skills needed by first-year college engineering students.

Visual Arts Department

A10110 **DESIGN EXPLORATION (GRADES 9-12) CREDIT:** .50 CREDIT PREREQUISITE: N/A

Art Survey is an introductory course providing an opportunity for beginning art students interested in gaining experiences in a variety of media. Students will examine the fundamentals of both two and threedimensional design within historical and multi-cultural contexts.

CERAMICS 1 (GRADES 9-12) A13010 **CREDIT:** .50 CREDIT PREREQUISITE: N/A

This course deals with ceramic construction and design techniques and may include coil binding, sculpture, pinch method, hard slab, soft slab, tile making, throwing on the potter's wheel, and surface decoration of ceramics. A current and historical perspective of ceramic objects will be explored.

A14010 DRAWING 1 (GRADES 9-12) **CREDIT:** .50 CREDIT PREREQUISITE: N/A

Drawing 1 introduces students to the fundamentals of drawing. The course explores elements and principles of design through observational, abstract, and nonrepresentational drawing. Emphasis will be on technique, perspective, composition, building form, value, and light. Students may use tools such as pencils, Conte crayons, charcoal, pastels, and ink to explore such themes as still life, portraiture, and figure drawing.

A15010 **DIGITAL TECHNOLOGY IN ART** (GRADES 9-12) CREDIT: .50 CREDIT

PREREQUISITE: N/A

Digital Art is an introductory course providing an opportunity for students interested in gaining experience in digital media. Students will learn how to use appropriate software to create a variety of artworks. Additionally, students will compose artwork that employs multiple disciplines, applications, and materials. Students will be required to utilize basic art skills, knowledge, and creativity to be successful.

A16010 **INTERIOR DESIGN 1 (GRADES 9-12)** CREDIT: .50 CREDIT PREREQUISITE: N/A

This course is offered to students who have an interest in interior design, home furnishing, and housing design. The focus is on the use of the art elements and principles of design through various creative, hands-on projects involving interior space and home furnishing/ accessories. Course may include color schemes, floor plans, furniture/ accessory product design, housing careers, elevations, blueprints, housing styles and history, style boards, interior design treatments, and field trips.

A17010 PAINTING 1 (GRADES 9-12) **CREDIT:** .50 CREDIT PREREQUISITE: N/A

Painting 1 covers the fundamentals of the element of color, color theory and mixing, composition, and form in space. Students will develop skills in watercolor, tempera, acrylic, and other painting media. Emphasis will be placed on the development of technical abilities, observation skills, and acquisition of knowledge within the discipline of painting set against the cultural fabric of art history.

A18010 CREDIT:

SCULPTURE (GRADES 9-12) .50 CREDIT

PREREQUISITE: N/A

Sculpture will provide students with the opportunity to explore the elements and principles of three-dimensional design. Sculpting processes such as modeling, carving, and assembly may be employed to create original forms. A wide variety of media such as paper, cardboard, wood, metal, brick, plastics, clay, and found objects will provide the media from which to make sculpture. Historical, contemporary, and cultural sculpture forms will be examined to assist students in image and design options.

GRAPHIC ARTS (GRADES 9-12) A21310 .50 CREDIT CREDIT: PREREQUISITE: N/A

Graphic Arts is a course providing an opportunity for students interested in gaining experience using digital media in the content area of graphic arts. Students will use computers as a base to compose graphic artwork that employs multiple disciplines, applications, and materials. Students will work with product design, advertising concepts, marking designs, etc. Students will be required to utilize basic art skills, knowledge, and creativity to be successful.

A21810 **ANIMATION (GRADES 9-12) CREDIT:** .50 CREDIT PREREQUISITE: N/A

Animation provides an opportunity for students interested in gaining experience in various aspects of creating art through the use of animation. Students will learn how to use appropriate software to create a variety of animation projects. Projects will include different types of animation, applications, and techniques employed within the process itself based on the principles of animation. Students will be required to utilize basic art skills, knowledge, and creativity to be successful.

A23010 CREDIT: PREREQUISITE:

CERAMICS 2 (GRADES 9-12) .50 CREDIT SUCCESSFUL PERFORMANCE IN

CERAMICS 1 Ceramics 2 is designed to allow students to expand their understanding of the basic principles of ceramic practice. Construction and design techniques may include coil binding, sculpture, pinch method, hard slab and soft slab, tile making, and throwing on the potter's wheel. Students will continue to build on their knowledge of . alaze techniques.

A23510 **CREDIT:** PREREQUISITE:

.50 CREDIT N/A This intermediate-level class builds on basic art skills, utilizing drawing and painting media, fibers, printmaking, sculpture, assemblage, photography and graphic arts to explore how combining those various media and techniques allows the student to create artwork with a personal thematic approach. Contemporary mixed media techniques and concepts, with emphasis on understanding the fundamentals of artistic expression, are a means for each student to experiment,

MIXED MEDIA (GRADES 9-12)

discover, and develop personal imagery. Student s will also research how artists create a brand using personal imagery. The various media are presented as a means to improve technical and perceptual art abilities and to demonstrate their proficiency with each media on a technical as well as conceptual level.

53

A24010 DRAWING 2 (GRADES 9-12) CREDIT: .50 CREDIT

PREREQUISITE: SUCCESSFUL PERFORMANCE IN DRAWING 1 Drawing 2 expands on fundamentals learned in Drawing 1. The course employs the elements and principles of design with exploratory media in order to develop techniques. Students will practice observational skills and abstraction process and make informed design-based decisions for nonrepresentational pieces. Media may include pen and ink, markers, Conte crayons, charcoal, and pastels. The importance of art history in drawing will also be explored.

A27010 PAINTING 2 (GRADES 9-12) CREDIT: .50 CREDIT PREREQUISITE: SUCCESSFUL PERFORMANCE IN PAINTING 1 Painting 2 further develops the fundamentals of painting. Emphasis will include the concepts of space, light and shade, and color and composition through the student's direct observation of subject matter and non-observational images. The development of the technical facility and the forging of a personal artistic style is the ultimate goal of this course. Sketchbooks will be required to record ideas for painting. The importance of art history in painting will also be explored.

A33010 CERAMICS 3 (GRADES 10-12) CREDIT: .50 CREDIT PREREQUISITE: SUCCESSFUL PERFORMANCE IN CERAMICS 2

Ceramics 3 will focus on the mastery of individual aesthetic development. Students may expand on techniques such as pinch, coil, hard slab and soft slab, methods of hand building, along with some skill in throwing on the potter's wheel, as well as explore the use of them in combination. Successful completion of this course, along with an additional art course, fulfills the prerequisite for AP® art courses.

A34010 DRAWING 3 (GRADES 10-12) CREDIT: .50 CREDIT PREREQUISITE: SUCCESSFUL PERFORMANCE IN DRAWING 2 Drawing 3 will focus on the mastery of individual aesthetic development. Students will expand on thematic foci such as still life, portraiture, cartooning, figure, landscape, fantasy, or experimental subject matter. Drawing media may include a variety of tools such as charcoal and pastel, ink and Conte crayon. Successful completion of

this course, along with an additional art course, fulfills the prerequisite

A36010 INTERIOR DESIGN 2 (GRADES 9-12) CREDIT: .50 CREDIT PREREQUISITE: SUCCESSFUL PERFORMANCE IN INTERIOR DESIGN 1

for AP® art courses.

This course further develops advanced skills in the fields of Interior Design, Decorations, and Living Environments. Students will build upon knowledge gained in areas such as the elements and principles of design, basic color theory, choosing backgrounds, and space planning to further develop their artistic and creative skills in the design and maintenance of living environments. Students will explore the various components of an Interior Design career and practical skills for living environments, such as interior construction, furniture styles and selection of furniture, remodeling and renovating, storage design, home maintenance, budgeting, and the relatively new field of Redesign. Sketchbooks will be required for this course.

A44030 AP® STUDIO ART: DRAWING (GRADES 10-12) CREDIT: 1.00 CREDIT

PREREQUISITE: SUCCESSFUL PERFORMANCE IN DRAWING 3 AP® Drawing Studio is a semester-long college-level course that focuses on the techniques, skills, and media surrounding the study of drawing. A portfolio is assembled through the course of the students' best work that is then submitted to the College Board in lieu of taking an exam in the spring. Technical skills will be sharpened and creative experimentation with various forms of media encouraged. Prerequisites include Drawing 1, 2, and 3 as well as a portfolio application prior to acceptance into the class. Students who choose to participate in an AP® course will be <u>required</u> to take the AP® Exam for that course.

Wellness

H14010 CREDIT: PREREQUISITE: OTHER INFO:

AQUATICS (GRADE 9) .50 CREDIT N/A 9TH GRADE PHYSICAL EDUCATION REQUIREMENT

This course is divided into four units: 1) Stroke Mechanics, 2) Basic Water Skills, 3) Basic Water Safety, and 4) Aquatic Sports. The first unit is devoted to stroke mechanics including the six styles of swimming: Front Crawl, Elementary Backstroke, Back Crawl, Sidestroke, Breaststroke, and Butterfly. The second unit deals with basic water skills (i.e. surface diving, diving entries, treading water, and underwater swimming). This unit is designed to give students personal water safety skills to use in case of an aquatic emergency. The third unit offers basic water safety including elementary forms of rescue and activities using clothes for flotation and the canoe for rescue. The fourth unit, aquatic sports, offers students the opportunity to participate in an aquatic sports tournament. Sports included in this unit are Water Volleyball, Water Basketball, and Inner Tube Water Polo. All students receive Red Cross swimming certificates based on competencies performed throughout the course.

H14210 AQUATICS II (GRADE 10-12) CREDIT: .50 CREDIT PREREQUISITE: SUCCESSFUL DEEP-WATER TEST IN AQUATICS AND COMFORTABLE SWIMMING MULTIPLE LENGTHS OF THE POOL

This course is divided into four units. Unit 1 (Stroke Mechanics and Basic Water) is devoted to stroke mechanics, including the six styles of swimming: Front Crawl, Elementary Backstroke, Back Crawl, Sidestroke, Breaststroke, and Butterfly. Unit 1 will also cover basic water skills (i.e., surface dives, diving entries, treading water, floating, turns, transitions, and starts). Unit 2 (Water Safety and Basic Rescues) is designed to give students personal water safety skills to use in an aquatic emergency. It offers basic water safety, including survival float/swim, elementary forms of rescue, cold water survival skills, wading rescues, and scenarios that require rescue decisionmaking. In Unit 3 (Swimming Endurance and Cardiovascular Training), students will be given the opportunity to improve their fitness level through endurance swimming and other cardiovascular exercises in and out of the water, including water aerobics and water exercises. Unit 4 (Water Sports and Water Activities) will focus mainly on the sport of water polo but will also cover basic diving board techniques and recreational activities such as water basketball, water volleyball, and kayaking/canoeing/paddleboarding. This course does fulfill a physical education requirement.

H14510 HEALTH 9 CREDIT: .50 CREDIT PREREQUISITE: N/A

This required course is designed to encourage students to improve health literacy and to recognize personal responsibility for their well being by examining their own lives and choices concerning their health. Through a variety of classroom activities and community guest speakers, students will evaluate and discover new ways to improve or maintain their present health status. Current teen health issues drive the curriculum that includes wellness, self-esteem, mental health, eating disorders, nutrition, drug education, relationships, infectious diseases, STI's, and abstinence education.

H15010ADVANCED TEAM SPORTS (GRADES 9-10)H35010ADVANCED TEAM SPORTS (GRADES 11-12)CREDIT:.50 CREDITPREREQUISITE:N/A

This course is designed to provide students with the opportunity to improve physical fitness through competitive advanced team sports. Demonstration and explanation of safety techniques/rules as well as rules/game strategy/play will be given to the students. The student will complete written, skills, and fitness tests. Warm-ups will include cardiorespiratory endurance activities. Instruction in high intensity team sports with an emphasis on cardio will be included. The student will use the information provided to create a new competitive game as a final project.

H17010 CREDIT:

CREDIT: .50 CREDIT PREREQUISITE: N/A

PE Dance class fulfills the student's physical education requirement **but does not fulfill the 9th-grade Aquatics requirement.** The PE Dance is divided into three disciplines: Ballet, Jazz, and Tap. Students in the course are then divided into beginner, intermediate, and advanced levels prior to beginning each discipline. Levels are determined by audition. The technique is stressed in each class and routines are choreographed for group recitals. This is an excellent course for any student (male or female) who wishes to study dance or is interested in the theater.

PE DANCE (GRADES 9-12)

| H23110 | PERSONAL FITNESS (GRADES 9-10) |
|--------------|---------------------------------|
| H33110 | PERSONAL FITNESS (GRADES 11-12) |
| CREDIT: | .50 CREDIT |
| PREREQUISITE | N/A |

This course allows students to improve physical fitness through aerobic activities and resistance training. Content may include, but not limited to high intensity interval training, circuit training, yoga, biking, Zumba Dance, kickboxing, functional equipment training (kettlebells, medicine balls, resistance bands, etc.), and other forms of fitness activities. The student will learn about five components of fitness, be tested in each component, and plan how to achieve a healthy level of each. Students will be required to use heart rate monitors to ensure they meet moderate-vigorous intensity guidelines. Resistance training exercises will be taught to improve basic muscle tone, flexibility exercises will be utilized to increase range of motion, and cardiovascular exercises will be completed to improve heart health. Weather and facility availability will determine the specific activities offered throughout the course's duration.

H24010 PHYSICAL EDUCATION 10 (GRADE 10 ONLY) CREDIT: .50 CREDIT PREREQUISITE: N/A

The physical education classes are quarter classes meeting every day for the nine weeks. The physical education program has been designed to meet the needs of our Intermediate High School students with an emphasis on physical fitness. The program consists of individualized lifetime fitness activities and sports. All activities will be co-educational.

| H23010 | WEIGHT TRAINING (GRADES 9-10) |
|--------------|--------------------------------|
| H33010 | WEIGHT TRAINING (GRADES 11-12) |
| CREDIT: | .50 CREDIT |
| PREREQUISITE | N/A |

Content for this course includes an emphasis on (1) healthy living, (2) health-related fitness, and (3) skills and habits necessary for a lifetime of activity. This course is designed to help students of multiple athletic backgrounds develop their muscular strength and muscular endurance. Content for this course includes an emphasis on healthy weightlifting, types of lifting, and skills and habits necessary for a lifetime of resistance training. Finally, upon completion of this course, students will have developed the foundation skills and understandings necessary for continuing a healthy, active lifestyle for the remainder of their lifetime. In addition, they will be encouraged to continue physical activity beyond their high school career to remain healthy in their future endeavors. This course does fulfill a physical education requirement.

H34510 HEALTH 11 CREDIT: .50 CREDIT PREREQUISITE: N/A

This quarter course is designed to help prepare the students for the challenge of modern life, to meet personal needs for the future, and to assist students in making healthy, lifestyle choices. Stress management, reproduction and sexuality, AIDS, substance abuse, domestic violence, first aid/CPR, and death education are some examples of units that are covered.

PHYSICAL EDUCATION 11/12 (GRADES 11-12) .50 CREDIT

CREDIT: .50 CREDTT: .50 CREDTT

The program in physical education provides students an opportunity to improve their personal fitness level through many types of physical activity. Students will rotate through a variety of team, individual, and recreational sports.

| H48010 | INTRODUCTION TO HEALTH SCIENCES (GRADE 12 ONLY) |
|---------------|---|
| CREDIT: | .50 CREDIT |
| PREREQUISITE: | A "B" IN ACADEMIC BIOLOGY, ACADEMIC CHEMISTRY, AND 11TH GRADE HEALTH |

This senior course prepares students for careers in health professions. Course topics will include human anatomy and physiology, medical terminology, disorders, diseases, and health care. The body systems covered include anatomical terminology, skeletal system, muscular system, respiratory system, cardiovascular system, and the nervous system.

World Language

W14010** FREN CREDIT: 1.00 C PREREQUISITE: N/A

FRENCH 1 (GRADES 9-12) 1.00 CREDIT

French 1 is carefully designed to guide students toward proficiency in communication while developing general communication into how languages work. The goal is to equip students: 1) to function in a French-speaking culture, 2) to use the language for a lifetime of personal enjoyment and enrichment, and 3) to appreciate the role of French culture in a global context. The relevancy of developing world language proficiency in all career pathways will be evident in this course. Many literacy strategies are incorporated into each of the four modalities of world language study (listening, speaking, reading, and writing).

W15010** GERMAN 1 (GRADES 9-12) CREDIT: 1.00 CREDIT PREREQUISITE: N/A

German 1 is carefully designed to guide students toward proficiency in communication while developing a general communication into how languages work. The goal is to equip students: 1) to function in a German-speaking culture, 2) to use the language for a lifetime of personal enjoyment and enrichment, and 3) to appreciate the role of German-speaking cultures in a global context. The relevancy of developing world language proficiency in all career pathways will be evident in this course. Many literacy strategies are incorporated into each of the four modalities of world language study (listening, speaking, reading, and writing).

W17010** SPANISH 1 (GRADES 9-12) CREDIT: 1.00 CREDIT PREREQUISITE: N/A

Spanish 1 is carefully designed to guide students toward proficiency in communication while developing a general insight into how languages work. The goal is to equip students: 1) to function in a Spanish-speaking culture, 2) to use the language for a lifetime of personal enjoyment and enrichment, 3) to appreciate the role of Hispanic cultures in a global context, and 4) to continue expanding their proficiency for further education or for the workplace. The relevancy of developing world language proficiency in all career pathways will be evident in this course. Many literacy strategies are incorporated into each of the four modalities of world language study (listening, speaking, reading, and writing).

W24010** FRENCH 2 (GRADES 9-12) CREDIT: 1.00 CREDIT PREREQUISITE: FRENCH 1 WITH AT LEAST A "C" AVERAGE PLUS TEACHER RECOMMENDATION

French 2 is a second-year course with an emphasis placed upon the reinforcement of the audio-lingual skills, the acquisition of a broader active vocabulary, and the development of reading and writing skills through personal involvement and association of ideas. The relevancy of developing world language proficiency in all career pathways will be evident in this course. Many literacy strategies are incorporated into each of the four modalities of world language study (listening, speaking, reading, and writing).

W24510** FRENCH CULTURE (GRADES 10-12) CREDIT: .50 CREDIT PREREQUISITE: SUCCESSFUL COMPLETION OF FRENCH 2

PREREQUISITE: SUCCESSFUL COMPLETION OF FRENCH 2 This is a quarter-long bilingual course and will include the following units: Fine Arts, Current Events, History and Governmental Structure, and traditional holidays and foods of French-speaking countries. The course will be structured around and incorporate the National Standards for Foreign Language Learning. W25010** CREDIT: PREREQUISITE:

GERMAN 2 (GRADES 9-12) 1.00 CREDIT GERMAN 1 WITH AT LEAST A "C" AVERAGE PLUS TEACHER RECOMMENDATION

German 2 continues the reading and writing skills in the target language. The abilities of speaking and understanding are stressed continuously throughout the year. German 2 offers a more detailed study of vocabulary and grammar with emphasis on the use of the language in both oral and written exercises. The relevancy of developing world language proficiency in all career pathways will be evident in this course. Many literacy strategies are incorporated into each of the four modalities of world language study (listening, speaking, reading, and writing).

W25510** GERMAN CULTURE (GRADES 10-12) CREDIT: .50 CREDIT PREREQUISITE: SUCCESSFUL COMPLETION OF GERMAN 2

This is a quarter-long bilingual course and will include the following units: Fine Arts, Current Events, History and Governmental Structure, and traditional holidays and foods of German-speaking countries. The course will be structured around and incorporate the National Standards for Foreign Language Learning.

SPANISH 2 (GRADES 9-12)

W27010** CREDIT: PREREQUISITE:

1.00 CREDIT SPANISH 1 WITH AT LEAST A "C" AVERAGE PLUS TEACHER RECOMMENDATION

Spanish 2 is a continuation of Spanish 1. Spanish 2 begins with an opening unit that acts as a "bridge" from past learning to the content to come. Each chapter teaches all four communication skills, with communicative objectives provided for new word sections and grammar sections. A strong cultural strand reveals the richness and diversity of the Spanish-speaking world. The relevancy of developing world language proficiency in all career pathways will be evident in this course. Many literacy strategies are incorporated into each of the four modalities of world language study (listening, speaking, reading, and writing).

W27510** CREDIT:

SPANISH CULTURE (GRADES 10-12) .50 CREDIT

PREREQUISITE: SUCCESSFUL COMPLETION OF SPANISH 2

This is a quarter-long bilingual course and will include the following units: Fine Arts, Current Events, History and Governmental Structure, and traditional holidays and foods of Spanish-speaking countries. The course will be structured around and incorporate the National Standards for Foreign Language Learning.

W34020** CREDIT: PREREQUISITE:

HONORS FRENCH 3 (GRADES 9-12) 1.00 CREDIT FRENCH 2 WITH AT LEAST A "B" AVERAGE PLUS TEACHER RECOMMENDATION

French 3 is an honors course that is a continuation of French 2. French 3 begins with an opening unit that acts as a "bridge" from past learning to the content to come. Each chapter teaches all four communication skills. There is a reciprocal relationship between proficiency-based teaching and the development of critical thinking skills. Students begin incorporating higher-order thinking skills, from simple observing, sorting, identifying, restating, and describing through the very highest levels of justifying, persuading, assessing, predicting, and hypothesizing.

W35020**HONORS GERMAN 3 (GRADES 9-12)CREDIT:1.00 CREDITPREREQUISITE:GERMAN 2 WITH AT LEAST A "B" AVERAGE
PLUS TEACHER RECOMMENDATION

Honors German 3 is a continuation of German 2. This course helps students to develop proficiency in the four basic communication skills: listening, speaking, reading, and writing. German 3 aims to increase the students' knowledge and appreciation of the diverse cultures of Germany and the German-speaking countries of Europe. The opportunity for creative use of the language is stressed, both in oral and written exercises. Many literacy strategies are incorporated into each of the four modalities of world language study (listening, speaking, reading, and writing).

W37020**HONORS SPANISH 3 (GRADES 9-12)CREDIT:1.00 CREDITPREREQUISITE:SPANISH 2 WITH AT LEAST A "B" AVERAGE
PLUS TEACHER RECOMMENDATION

Honors Spanish 3 is a continuation of Spanish 2. Spanish 3 begins with an opening unit that acts as a "bridge" from past learning to the content to come. Each chapter teaches all four of the communication skills. Students begin incorporating higher-order thinking skills from simple observing, sorting, identifying, restating, and describing through higher levels of justifying, persuading, assessing, predicting, and hypothesizing. The relevance of developing world language proficiency in all career pathways will be evident in this course. Many literacy strategies are incorporated into each of the four modalities of world language study (listening, speaking, reading, and writing).

W44020**HONORS FRENCH 4 (GRADES 9-12)CREDIT:1.00 CREDITPREREQUISITE:HONORS FRENCH 3 WITH ATLEAST A "B" AVERAGE PLUSTEACHER RECOMMENDATION

French 4 is an honors course that is a continuation of French 3. Each chapter works on all four communication skills. Students continue to incorporate higher-level thinking skills and build proficiency. There is a complete review of grammar and the introduction of new concepts. Students will be given the opportunity to write a children's story in French. French 4 aims to develop the student's understanding of the French culture and that of various French-speaking countries around the world.

W45020**HONORS GERMAN 4 (GRADES 9-12)CREDIT:1.00 CREDITPREREQUISITE:HONORS GERMAN 3 WITH AT
LEAST A "B" AVERAGE PLUS
TEACHER RECOMMENDATION

This honors course places equal emphasis on the oral and written aspects of German. There is a complete review of grammar and selected texts deal with German literature featuring various wellknown authors. The course also includes video and German TV series, German cinema, and news and current events in German. If possible, students may teach lessons to elementary children. Many literacy strategies are incorporated into each of the four modalities of world language study (listening, speaking, reading, and writing).

W47020**HONORS SPANISH 4 (GRADES 9-12)CREDIT:1.00 CREDITPREREQUISITE:HONORS SPANISH 3 WITH AT
LEAST A "B" AVERAGE PLUS
TEACHER RECOMMENDATION

Spanish 4 is an honors course that is a continuation of Honors Spanish 3. Each chapter works the four modalities of world language study. Students will continue to incorporate higher-level thinking skills and build their Spanish proficiency. Activities provide students practice in interpreting, expressing, and negotiating meaning through constant interactions as they continue to work on more open-ended, personalized speaking and writing tasks. FOREIGN LANGUAGE DUAL ENROLLMENT 1.00 CREDIT CRITERIA LISTED BELOW AND

PRINCIPAL PRE-APPROVED Juniors (mostly second semester) with an unweighted GPA of 3.5 and Seniors with an unweighted GPA of 3.25 may attend college courses (either at a local college campus or an RCI site). The college course and grade earned will be placed on the high school transcript. Where school dismissal is required to attend such classes, the schedule at McDowell shall be adjusted. See your counselor in Guidance for more information.

W57020** CREDIT: PREREQUISITE:

HONORS SPANISH 5 (GRADES 9-12) 1.00 CREDIT HONORS SPANISH 4 WITH AT LEAST A "B" AVERAGE PLUS TEACHER RECOMMENDATION

Spanish 5 is an honors level course that will take the knowledge and skills developed through Spanish 1-4 and apply them to new learning tasks. This class is the bridge between the different styles and requirements of high school and university instruction. Students will use a variety of resources (such as literature, music, art, periodicals, the Internet, textbooks, and videos) to make connections from culture to culture in a relevant and authentic way. As in levels 1-4, the four modalities of language will be strengthened and assessed with an emphasis on speaking in various situations.

In the first year of the Art & Design program, students receive training in core art skills, including color theory, perspective and illustrative drawing, lettering photography, and basic graphic design. Students also focus on work skills such as preparing a resume, writing business correspondence and acquiring basic computer skills. In the second and third years, students receive complex training in problem-solving skills by applying the design process to projects. Using a combination of computerization, photographic and conventional illustrative methods, students prepare portfolios of approximately 30 pieces of artwork. Prospective students should possess the following characteristics: 1) a demonstrated talent in drawing; 2) solid verbal and written communication skills; 3) a good sense of color, proportion, and design; 4) applied math skills; 5) developed problem-solving skills, and 6) fine motor skills. Students completing the Art & Design program can earn up to 15 credits at the Art Institute of Pittsburgh.

PREREQUISITE: APPLICATION PROCESS The Graphic Media and Design program introduces students to theoretical aspects as well as hands-on experiences using computers, darkroom equipment, and printing presses. Students acquire marketable skills in job planning, design and layout, copy preparation, proofing, plate making, offset press operation, bindery, and finishing. Desktop publishing and computer graphics have become an essential part of the printing industry. To meet the demands of the industry, students acquire introductory skills in electronic imaging techniques using software applications including Adobe Photoshop and PageMaker. Prospective students should possess the following characteristics: a creative mind, good typing skills, a good background in English and spelling, strong mechanical skills, good attention to detail, organized, and neatness.

Students achieve entry-level skills in areas of computer operations, data entry, and computer programming depending on their ability and interests. Combined with a background of knowledge, skills, and appreciation of the data processing industry, each student is able to seek employment in the area of their interest. This course aims to present current and future practices in the ever-changing world of data processing. All instructional materials provide students with entry-level skills for positions in data processing through hands-on experience. Studies include the basics of computer science in such areas as design and internal functions, operations, computer operation and programming, data processing, and systems design. The Computer Information Systems program allows students to explore a career path that can lead to higher education in computer programming and many other related fields. Students will gain marketable skills to use computers in any field. Prospective students should be able to think logically, have good speaking, reading and writing skills, and pay attention to detail

COMPUTER NETWORKING (GRADE 10) COMPUTER NETWORKING (GRADE 11) COMPUTER NETWORKING (GRADE 12) 4.00 CREDIT

PREREQUISITE: APPLICATION PROCESS

This course is designed to provide students with classroom and laboratory experience in current and emerging networking technology that will empower them to further their education and training in the computer networking field. Instruction includes safety, networking, network terminology, and protocols, network standards, local area networks (LANS), wide-area networks (WANS), Open System Interconnection (OSI) models, cabling, cabling tools, routers, router programming, Ethernet, Internet Protocol (IP) addressing, and network standards. Particular emphasis is given to the use of decision-making and problem-solving techniques in applying science, mathematics, communication, and social studies concepts to solve networking problems. In addition, instruction and training are provided in the proper care, maintenance and use of networking software, tools and equipment and all local, state and federal safety, building and environmental codes, and regulations.

Cosmetology is an art and a science involving the study of the skin, hair, and nails. The Cosmetology program provides each student with the knowledge and skills required to become a licensed cosmetologist. The license requires 1,250 hours of instruction. The curriculum includes specialized classroom training in 1) hair and scalp analysis; 2) hair cutting, setting, and styling techniques; 3) hair coloring and permanent waving; 4) skin care, facials, and make-up techniques; 5) manicures and pedicures; 6) wig styling; 7) anatomy and physiology; 8) sanitation and sterilization, and; 9) salon management. Students receive hands-on experience by using mannequin heads and live models during clinic service. The proper use of tools, equipment, safety procedures, and state laws and regulations are also important elements of the curriculum. Prospective students should possess creative and artistic aptitude, enjoy working with people, physical stamina, flexibility, and patience.

The Culinary Arts program assists the student who is interested in the fast-paced and ever-growing food services industry. The program offers a comprehensive presentation of basic principles and techniques necessary to obtain an entry-level position in the food service industry or prepare for continued training and education. Incorporating theory and practical experience, this program introduces students to a variety of food preparation techniques using the school's fully equipped commercial kitchen and restaurant. Realistic instruction is provided by using the dining room, instructional kitchen, cafeteria, baker, and theory room. Students learn the preparation of soups, sauces, salads, meats, shellfish, poultry, vegetables, presentation, garnishing, and the preparation of desserts. In addition, instructional areas include safety and sanitation, proper use of equipment, purchasing, inventory control, menu planning, diet and nutrition, serving, and food service management. Prospective students should enjoy working with people and be able to work well under pressure; have physical stamina and coordination; good organization skills; and basic math and reading abilities.

V21510EARLY CHILDHOOD EDUCATION (GRADE 10)V31510EARLY CHILDHOOD EDUCATION (GRADE 11)V41510EARLY CHILDHOOD EDUCATION (GRADE 12)CREDIT:4.00 CREDITPREREQUISITE:APPLICATION PROCESS

The Early Childhood Education program provides the student with the necessary skills for entry-level positions in the childcare field, with an emphasis on the preschool environment. The students gain knowledge of child development principles and will learn positive guidance techniques needed for working with children. In this program, students participate in both group theory lessons and in individualized, self-directed training toward an occupational goal. Students select and work on competency-based learning guides, which lead to mastery of specific childcare skills in a preschool setting. Curriculum areas include preschool teaching techniques, child development and growth, nutrition, art, music, and children's literature. Students work three days per week in the Tech Tikes preschool as a Preschool Aide. Prospective students should enjoy children and have a pleasant personality, even temperament, patience, and good communication skills, particularly spelling and grammar.

The Emergency and Protective Services program is an ideal choice for students considering a career in the field of public safety and security. Communities rely on professionals to ensure public safety, respond to community needs, and assist in times of crisis. The Emergency and Protective Services program will train students in the areas of safety, security, firefighting, corrections and law enforcement, and emergency response. Students will engage in practical applications and hands-on training within the lab and through field experiences with local agencies. The need for certified professionals is growing, and students will have the opportunity to earn industry certifications. Prospective students should have good communication and interpersonal skills, be problem solvers, be team players, be compassionate, and be service-oriented.

The Health Assistant program is ideal for students considering a career in the health and medical field. This program introduces students to various career opportunities that exist in health care. It prepares the student to enter the health care system as a competent assistant to the healthcare professional. The course exposes the student to health and medical practices such as physical therapy, occupational therapy, dietetics, medical office, nursing, medical secretary, and medical laboratory. Students are introduced to basic medical procedures. An emphasis is placed on work attitudes necessary to be caring men and women sensitive to the complex needs of patients. Prospective students should possess good communication and interpersonal skills, neatness and cleanliness, manual dexterity, good professional appearance, the ability to maintain confidentiality, and the ability to lift fifty pounds.

When you work in lodging or food service, you're part of the hospitality profession. You are also part of the largest, fastest-growing industry in work-travel and tourism, where opportunities abound. The Tourism & Lodging Management program has everything you will need to get started in a hospitality career. Upon graduation, students are ready to begin their hospitality career or continue their education at a college or university. In this program, students participate in classroom activities that teach valuable lodging skills and knowledge. Students will also participate in internships supervised by the instructor and a worksite mentor. Major instructional units in the curriculum include an overview of lodging management, the front office, housekeeping, leadership and management, marketing and sales, and food and beverage service. The objectives of this program correspond to competency lists used in the American Hotel & Motel Association's Educational Institute's post-secondary curriculum and form the basis for articulation agreements with colleges and universities. A national certificate from the Hospitality Business Alliance (HBA) will be issued to recognize student achievement, both in the classroom and in the workplace. Future employers and college admissions officers will recognize the HBA credential as evidence of a graduate's preparation for hospitality success. This credential can put you on the road to management in one of America's largest industries.

The Sports Therapy and Exercise Science career major will prepare students to work in the field of physical therapy, occupational therapy, and sports medicine. Coursework starts with foundations in human anatomy, physiology, medical terminology, and clinical rehabilitation skills. Students will develop skills in injury prevention, assessment, and rehabilitation. Other topics covered include nutrition and hydration, emergency care, human development, and mental health. Upon completion of the program, students will be prepared to assess injuries and illnesses, provide care for various patient populations, and design basic rehabilitation and fitness programs. Prospective students should possess good communication and interpersonal skills, manual dexterity, a professional attitude and appearance, the ability to maintain confidentiality, and the ability to lift fifty pounds.

| PREREQUISITE: | APPLICATION PROCESS |

Drafting careers are changing rapidly as computer technology replaces traditional procedures and functions. The course instructs students in industry standards while using one of the most up-to-date drafting laboratories in the area. The Drafting & Design Engineering program prepares students to step into the workplace or it gives them an important edge if choosing to further their education in this field. Drafting, mechanical drafting, and CAD involve making precise, instrument-aided drawings that show how to construct machines, buildings, and infrastructures. The Drafting & Design Engineering curriculum includes all facets of drawing, including the preparation of reports, charts, and data sheets. The Drafting & Design Engineering program is designed for those students interested in drafting, mechanical design, engineering, and architectural drawing. Prospective students should possess the following characteristics: creative mind and a good imagination, logical thinking, basic math skills, accuracy, and artistic ability.

| CREDIT: | 4.00 CREDIT |
| PREREQUISITE | APPLICATION PROCESS |

Students in this program learn the fundamentals of electrical skills and theory. The Electrical Engineering students acquire the skills for employment in all industrial electric occupations. The students learn in detail the theory and hands-on application of alternating current, direct current, hydraulics, pneumatics, motor controls, programmable logic controllers, and residential wiring. Using a variety of hand tools and electrical testing equipment, the students learn how to wire a variety of industrial-rated components (relays, motor starter, motors, transformers, timing relays, push buttons, selector switches) and all components used in residential wiring applications. In addition, the students receive instruction in reading residential wiring schematics, and hydraulic or pneumatic schematics. Prospective students should possess mechanical aptitude, ability in basic math, and manual dexterity.

V27510METAL FABRICATION (GRADE 10)V37510METAL FABRICATION (GRADE 11)V47510METAL FABRICATION (GRADE 12)CREDIT:4.00 CREDITPREREQUISITE:APPLICATION PROCESS

This is a comprehensive program designed to give students entrylevel skills in the field of metal fabrication. Areas of study include the techniques and fundamentals of pattern development, fabrication, design, proper use of hand and power tools., acetylene welding, acetylene cutting, and metal inert gas welding. Students experience training on a variety of machines. Emphasis is placed on bench work, precision measuring instruments, shearing, forming, rolling, assembly, welding, heat treatment, blueprint reading, layout and design, quality control, press brake operation, gas tungsten arc welding (TIG) and shielded metal arc welding. Prospective students need manual dexterity, mechanical aptitude, physical stamina, and basic math skills.

| V48010 | PRECISION MACHINING (GRADE 12) |
| CREDIT: | 4.00 CREDIT |
| PREREQUISITE: | APPLICATION PROCESS |

The machinist is a skilled worker who forms and shapes metals from their raw state to a finely finished and accurately shaped part. Students trained in this program develop the necessary skills to be entry-level machinists. The Precision Machining program gives students the opportunity to manufacture machine parts from various metals on machines such as engine lathes, vertical and horizontal milling machines, surface and cylindrical grinders, drill presses, and the band saw. Students learn the properties of steel, aluminum, and brass. Then they see how these properties are applicable in the trade. This basic-to-advanced curriculum offers in-depth training from hand and power tools to state-of-the-art techniques such as computerized numerical control and electrical discharge machining. The understanding of shop mathematics, trigonometry, blueprint reading, and precision measuring instruments are critical elements of this program. Prospective students should possess above-average math skills, good work attitudes, mechanical aptitude, eve-hand coordination, and the patience of work neatly and accurately.

AUTOMOTIVE BODY REPAIR (GRADE 10) AUTOMOTIVE BODY REPAIR (GRADE 11) AUTOMOTIVE BODY REPAIR (GRADE 12) 4.00 CREDIT

PREREQUISITE: APPLICATION PROCESS

This course presents current and future practices in the rapidly changing world of auto body repair. Projects and class work use the latest technologies, equipment, and shop practices. The latest approaches to modern automobile repair and reconstruction require skilled workmanship. Students in the Auto Body Repair program learn all phases of auto body repair including the proper use of hand and power tools; damage analysis; rebuilding, reconditioning, sanding, and refinishing; basic metalworking and dent repair; frame straightening; spray painting; welding; glass installation; and safety practices. Students also learn how to estimate, prepare job orders, and general shop operations. The program uses demonstration automobiles to provide students with the opportunity to develop confidence by applying the theoretical concepts. Prospective students should have good hand-eye coordination, manual dexterity, multi-limb coordination, mechanical aptitude, skill with tools, physical strength, accuracy, and the ability to work with minimal supervision.

| PREREQUISITE: | APPLICATION PROCESS |

Changes in automotive technology have increased the importance of the automotive technician. This program provides the student with the theory and practical experience needed to diagnose and repair automotive systems and their components. Students meeting the requirements will be eligible to take the state inspection test for a Class One License. This course covers the repair and maintenance of the ignition system, tires, braking, steering and suspension, alignment, electrical and electronic systems, fuel injection, engine repair, engine performance, and cooling system. Major and minor tune-up and inspection procedures are also included. An appropriate share of the program is devoted to studying automotive theory. Students use repair manuals, textbooks, and computers for diagnosing problems. A major emphasis of this course is to promote safe, clean, and efficient work habits. Prospective students should have mechanical aptitude, manual dexterity, skills with tools, physical stamina, good hand-eye coordination, physical strength, willingness to work in an uncomfortable environment and the ability to think logically.

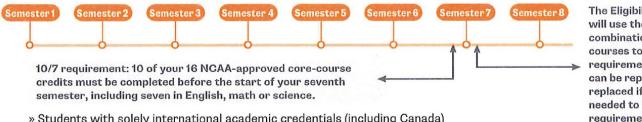

DIVISION I ACADEMIC STANDARDS

Division I schools require college-bound student-athletes to meet academic standards for NCAAapproved core courses, **core-course GPA** and test scores. To be eligible to practice, compete and receive an athletics scholarship in your first full-time year at a Division I school, you must meet all of the following requirements:

1. Earn 16 NCAA-approved core-course credits in the following areas:

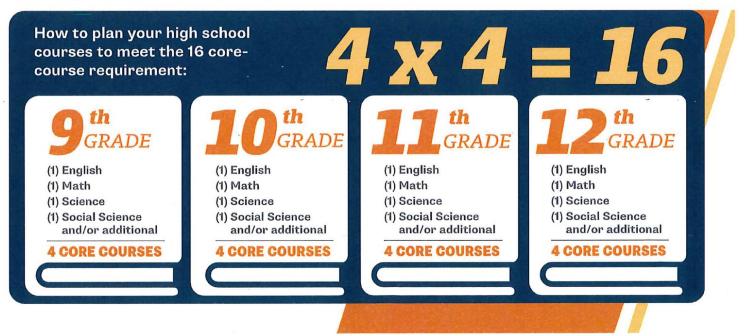

2. Complete 10 of your 16 NCAA-approved core-course credits, including seven in English, math or science, before the start of the seventh semester. Once you begin your seventh semester, any course that is needed to meet the 10/7 requirement cannot be replaced or repeated.

The Eligibility Center will use the best combination of core courses to meet the 10/7 requirement. Courses can be repeated or replaced if they are not needed to meet the 10/7 requirement.

- » Students with solely international academic credentials (including Canada) are not required to meet the 10/7 requirement.
- **3.** Complete your 16 NCAA-approved core-course credits in eight academic semesters or four consecutive academic years from the start of ninth grade. If you graduate from high school early, you still must meet core-course requirements.
- 4. Earn a corresponding test score that matches your core-course GPA (minimum 2.3) on the Division I sliding scale (see page 22).* More information regarding the impact of COVID-19 and test scores can be found at on.ncaa.com/COVID19_Spring2023.
- 5. Submit your final transcript with proof of graduation to the Eligibility Center.

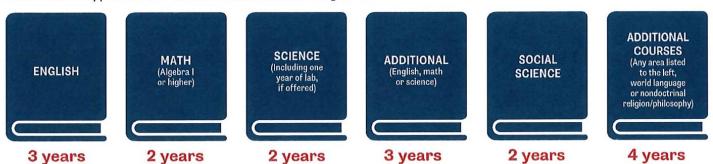

DIVISION II ACADEMIC STANDARDS

Division II schools require college-bound student-athletes to meet academic standards for NCAA-approved core courses, **core-course GPA** and test scores. To be eligible to practice, compete and receive an athletics scholarship in your first full-time year at a Division II school, you must meet *all* of the following requirements:

1. Earn 16 NCAA-approved core-course credits in the following areas:

- Earn a corresponding test score that matches your core-course GPA (minimum 2.2) on the Division II qualifier sliding scale (see page 26). More information regarding the impact of COVID-19 and test scores can be found at on.ncaa.com/COVID19_Spring2023.
- 3. Submit your final transcript with proof of graduation to the NCAA Eligibility Center.

Student-athletes enrolling at an NCAA member school Aug. 1, 2021, or later who do not meet Division II qualifier standards will be deemed partial qualifiers. All Division II partial qualifiers may practice and receive an athletics scholarship, but may NOT compete, during their first year of full-time enrollment at a Division II school.
