Re: Lead in Drinking/Cooking Water Sampling
Encinal Elementary School
195 Encinal Avenue, Atherton, CA
ACC Project No: *3238-001.01*

Dear Ms. Guevara:

ACC presents this project documentation package, summarizing project activities designed and/or supervised by ACC Environmental Consultants, Inc. (ACC). ACC was authorized by Sandra Guevara with Menlo Park City School District to provide water-monitoring services for Oak Knoll Elementary School, located at 1895 Oak Knoll Lane, Menlo Park, California. Services were performed in accordance with the scope of work outlined in ACC proposal 81302, dated Tuesday, April 18, 2023.

CONTAMINANTS OF CONCERN

ACC conducted water sampling during zero occupancy periods at the site. The primary contaminant of concern surveyed in this assessment is total lead. The California State Water Resource Control Board regulates these contaminates under AB2370. The CSWRCB has set the lead water limits to 5 parts per billion (ppb).

The primary exposure to lead in this setting is the ingestion of lead dissolved or suspended in water. Symptoms of lead exposure include weakness or exhaustion (lassitude), insomnia, weight loss, malnutrition, constipation and abdominal pain, anemia, tremors, kidney disease hypertension, and others. Lead is particularly harmful to young children and developing embryos and can lead to a range of developmental problems.

SAMPLING METHODOLOGIES

Water sampling on April 19, 2023 was conducted by Rachael Gehrman, and water sampling on April 27, 2023 was conducted by Anson Casanares of ACC Environmental Consultants, following the recommended sampling procedures for lead in water as outlined below:

Sampling
Activities began and were completed before the first person arrived on site in the morning, aside from the sampler and the site representative. Activities included:

- Verification that no tampering or outlet use has been conducted.
- Verification that no leaks were present.

- Verification that adequate stagnation time had passed (a minimum of 8-hours).
- Verification that the map was complete and updated.
- Removal of the bagging and signage for the sample outlets.
- Sampling each sample outlet and obtaining 100% of flow without spillage.
- Sampling final flush sample after 30-second flush has occurred and without spillage.
- Removal of all signage throughout facility after sampling is completed.
- Completion of facility checklist, facility and yard map, and self-certification questionnaire.
- Completion of sample chain of custody.

SAMPLING RESULTS

The results of sampling on April 19, 2023 are outlined below:

Sample ID	Sample Location	Analyte	Concentration (ppb)	Limit (ppb)
W-1-1	Building K, Class 2	Lead	<1.00	5
W-1-2	Building K, Class 2 – Post Flush	Lead	<1.00	5
W-2-1	Building K, Class 3	Lead	<1.00	5
W-2-2	Building K, Class 3 – Post Flush	Lead	<1.00	5
W-3-1	Building K, Class 4	Lead	<1.00	5
W-3-2	Building K, Class 4 – Post Flush	Lead	<1.00	5
W-4-1	Building B, Class 10	Lead	<1.00	5
W-4-2	Building B, Class 10 – Post Flush	Lead	<1.00	5
W-5-1	Building E, Class 9	Lead	<1.00	5
W-5-2	Building E, Class 9 – Post Flush	Lead	<1.00	5

The results of sampling on April 27, 2023 are outlined below:

Sample ID	Sample Location	Analyte	Concentration (ppb)	Limit (ppb)
Sink-A	Water Bottle Filling Station Room 4	Lead	<1.00	5
Sink-B	Water Bottle Filling Station Room 21	Lead	<1.00	5
Sink-C	Water Fountain Gym	Lead	<1.00	5
Sink-D	Water Fountain K4	Lead	<1.00	5
Sink-E	Water Fountain Room 13	Lead	<1.00	5
Sink-A (PF)	Water Bottle Filling Station Room 4	Lead	<1.00	5

RESULTS AND RECOMENDATIONS

The results did not indicate concentrations above the threshold of 5 ppb.

CLOSING

Sixteen (16) total samples were collected from sample outlets utilized at the facility. All sixteen samples were direct pulls from the active outlets. Lead was not detected above the Reporting Limit in any of the samples. This should not pose a risk to health.

The attached documents provide further details for this Lead Assessment. Please contact ACC Project Manager, Rachael Gehrman at (510) 710-8543, or email rgehrman@accenv.com if you have any questions. Thank you for including ACC in this project. We are available to help with any of the findings and recommendations contained in this report.

Sincerely,
ACC Environmental Consultants, Inc.

Rachael C. Gehrman
Associate Project Manager
Certified Asbestos Consultant #22-7069
CDPH Lead I/A/PM (LRC#6277 &7004)

Analytical Results

Client Sample Description SINK-A POST FLUSH
WATER BOTTLE FILLING STATION ROOM 4 ***Collected:*** 4/27/2023 ***Lab ID:*** *332307718-0006*

Method	*Parameter*	*Result*	*RL*	*Units*	*Prep Date & Analyst*	*Analysis Date & Analyst*
METALS						
200.8	Lead	<1.00	1.00	µg/L	4/28/2023 XL	5/1/2023 XL

Definitions:

MDL - method detection limit
J - Result was below the reporting limit, but at or above the MDL
ND - indicates that the analyte was not detected at the reporting limit
RL - Reporting Limit (Analytical)
D - Dilution Sample required a dilution which was used to calculate final results
