Signature of RN or LSN

# **Medication Administration Requirements**

Diagnosis, treatment of illness, and/or prescribing medications are the responsibility of physicians, not school personnel. School personnel will administer medications that have been prescribed by a physician to be given during school hours with parent permission. Morning or evening medications should be given at home to avoid interruptions in the school day.

**Medication Administration Authorization form** is required to be completed annually by your child's physician, with a written or electronic authorization by a parent/guardian, for a medication to be dispensed to your child from the health office during the school day.

- Parents/guardians must inform the building nurse when a student requires medications during the school day. Students observed by school personnel self-administering unauthorized medications shall be reported to their parents/guardians.
- Required for the administration of ALL medications. This includes prescription and over-the counter (i.e. Tylenol, Ibuprofen) medications. The form must include the student's name, diagnosis, name of medication, dose, time to be given, date of order and signatures parent/guardian and physician.
- Prescription medication must be provided in a pharmacy-labeled container that indicates pharmacy name and telephone number, student's name, physician, name and dosage of medication, and description of medication inside. Parent/guardian should request from the pharmacist a duplicate labeled bottle for the prescription if it will need to be given at home and school.
- Over-the-Counter medication must be in the original container.
- The building nurse will administer prescribed medication. In the absence of the nurse, the medication will be administered by a trained designee named by the principal, in consultation with the building nurse.
- Check the expiration dates of the medication(s). Expired medications will not be administered.
- Controlled Substances. A Parent or legal guardian is responsible to pick up all medication(s) that are controlled substances at the request of the school.

**Self-Administration of Medication Authorization Form** Is required to be completed annually for selfcarry and self-administration. By completing this form, the parent/guardian is not requesting school personnel to store or administer the medication to the student. Parent/guardian will ensure the medication will be properly labeled for the student.

- Prescription asthma inhaler for asthma or reactive airway disease. A parent/guardian's written or electronic authorization and a review by RN with the student is required. (A physician's order is needed only if an inhaler is kept in the health office for nurse to administer).
- Epinephrine or other medication. A physician's order, parent/guardian written authorization, and a review by RN with the student is required.

**Self-Administration of Medication Form** is required to be completed annually, either written or electronic consent, for secondary students' self-carry and self-administration of:

- Non-prescription pain relief medication. A secondary student may possess and use non-prescription pain relief in a manner consistent with the labeling. The district may revoke a student's privilege to possess and use non- prescription pain relief if the district determines the student is misusing or abusing this privilege.
- Ephedrine or pseudoephedrine containing products. This form does not allow students to possess or use any non-prescription medications with ephedrine or pseudoephedrine as an active ingredient.

All medication forms are available on the ISD 279 district website under Services > Health Services-> Forms, <u>https://www.district279.org/services/health-services</u> or can be requested from the building nurse at your child's school
