

MMS Goes to TechGirlz 2023

Thanks W.IN, Micron, Sponsors, & Volunteers!

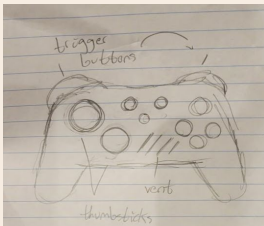

A fun-filled day of networking with other students, learning about STEAM careers, and participating in hands on workshops.

The day started with a group activity to get the students up and moving and design thinking! They got to choose one of three problems to solve around game controllers, ideate a solution, build a visual prototype, and “pitch” their idea to their mentor.

Afterwards, the students navigated the College of Idaho’s campus to attend 2 different STEAM workshops + Techzone exploration and lunch!

Design Thinking STEAM Challenge

1st & 2nd Place Team Design Challenge Winners

1st place

2nd place

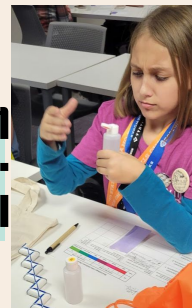

Session Workshops

Wind
Turbine
Design &
Build with
Idaho Power

Colorful
Chemistry

Think Make
Create Lab
Creations

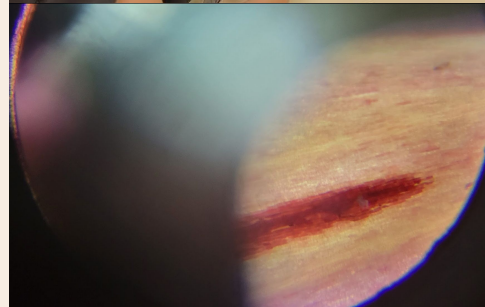

Intro to Surgical
Techniques &
Healthcare

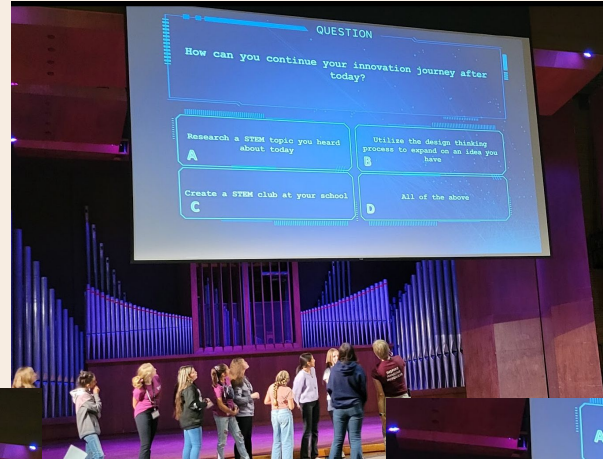

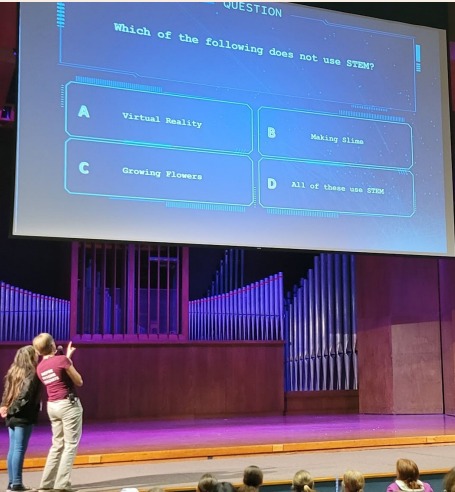

Session Workshops

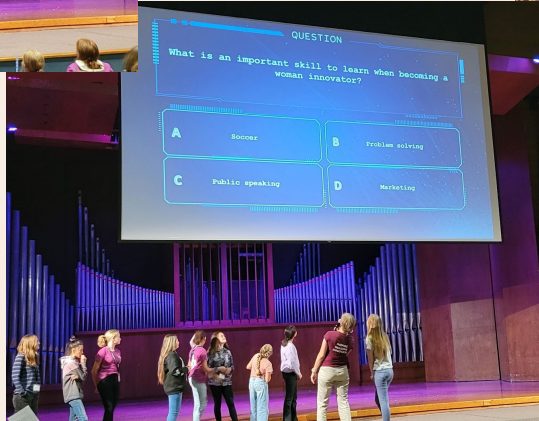

Idaho
